FALL QUARTER ALL "A" STUDENTS ANNOUNCED

Chris Glass Breaks Local Tradition

First Girl To Speak In Debate In Forty-One Years

The TEACOLA and the entire student body salute, Miss Christine Glass, as being the first girl in the history of the two literary societies in Jacksonville. Morgan and Calhoun, ever to represent one group or the other as a speaker in the annual debate. And the Morgan Literary Society is especially proud of you. You have succeeded in doing what countless others have failed to do; you have brought the courage and spirit to attempt once more, and in time, ahead of all you, your sisters who have tried, you have won.

The society realized this and sees in you a daughter of Jacksonville and Calhoun. The Calhoun team have accepted the invitation to debate at the Morgan Literary Society.

Great Advances Made In Study Of Vitamins

By Clara G. Weidman

During the last ten years great advancement has been made in the field of vitamins. In this article an attempt is made to state briefly the present status of our knowledge of these compounds. You will notice that the old alphabetical designations are giving way to new names in that in some instances (deplete the chemical nature) of one compound but that some of the more recently discovered vitamins have no letter names at all.

Vitamin A has been found to function in the control of growth and reproduction. When deprived of it, experimental animals stop growing as soon as their reserves are used up, and it is necessary for normal reproduction. For the development of health and growth vitamin D is essential, and for preservation of the integrity of the nervous system, it functions in preserving the health of the sensory organs. Vitamin E is required wherever there is tissue in the body—in the skin, in the hair, in the lining of the digestive tract and in the respiratory system, and in the production of the seminal fluid.

The symptoms of vitamin deficiency are many, but when the epithelium of the eye is badly impaired by a great deficiency of vitamin A, the characteristic eye disease xerophthalmia results. This disease was common in various parts of Europe during war time, and it is still prevalent in the Far East, but is seldom observed in this country.

Newborn Bush To Serve As Principal

Dr. Daniel H. Mendenhall, announced that the Bureau is pleased to present Mr. James Bush, social worker in Jacksonville, as principal of the school. Mr. Bush graduated from the Jacksonville State Teachers College.
In Falls On Ice

Jacksonville experienced the colder weather in the past fifty years during the recent cold wave when the high temperatures dropped to between ten and twelve degrees below zero. Added to the severity of the depression was an eleven-inch snow, much of which is still on the ground. Students from Armistead and other schools that were snowbound for a few days, but the local students (be-

Dr. J. H. Jones and Miss Fannie Bush suffered colds on the ice following the snow. Miss Bush had a fractured arm and Dr. Jones a foot sprain. They are both recovering slowly. Many other Jacks have been reported cold but none has proved serious.

common sport since the snow came—not that snow is a novelty here, but eleven inches is some. Of the more athletic students spent their time building snow men and women, some of which bore rather accurate representations of certain characters on the campus.

Immediately following the snow the student administration had the sidewalks and streets cleared of snow, and clindlers, salie or snowshoes were necessary to travel. The Physical Education Department was able to program a prevent using under control, which is the foundation of the many branches of the college, everyone has enjoyed the snow and survived.

COLLEGE CAMPUS CALENDAR

Monday, February 5
230 P. M. Tony Sarg's Marionette
in "Robin Hood" at Kilby Hall.

Wednesday, February 7
6:30 P. M. Cotter-Miller Players in "And So To Bed," in Kilby Hall.

Thursday, February 8
10:00 A. M. The Rev. James Montgomery, missionary on furlough from China, in a stereopi-

Basketball game with Troy State Teachers College in gymnasium, Thursday night.

Monday, February 12
10:00 A. M. Dr. Nat G. Long, of Emory University, under the sus-
picion of the Wesley Foundation, at assembly.

Monday Night, February 12
Wesley Foundation, B.A.R.N.E.T., Daugette Hall; 6:30 p. m.

Junior Book Club Meets

The Junior Book Club held its regular monthly meeting Monday night at Miss Evelyn May's house. The meeting was called to order by the president and opened with the singing of the college hymn. Mrs. Self and Miss Evelyn May were present. (See Book Club on Page 4)

Dr. C. W. Daugette was the welcomer for the meeting at the high school assembly Monday morning, taking the opportunity to announce several activities of the school to the student body.

The student body, which is the second largest in Calhoun County, was crowded into the auditorium to hear Dr. Daugette, and after a deviation had been presented by Miss Grace Williams, and the alma mater had sung, he was pres- ented by Mr. J. F. H. Williams. Dr. Daugette told of the leaving of Mr. Reuben Self, principal, for New York University, since the school had been closed on account of bad weather. He presented Mr. S. W. Slack, who has been chosen as the new member of the faculty, and Mr. Blash, who will act as superintendent of principal during Mr. Self's absence.

In an appealing manner, Dr. Daugette pointed out the student body for cooperation, pointing out the fact that the degree of success they might attain depended upon their exertions, and the sense of honor and self respect which they might develop. High school is not only the beginning of the college, but the beginning of the world. He stated that he was going to make every effort to encourage and improve the health, in order to furnish the proper facilities needed for a broader program.

William J. Slay New Member of High School Faculty

William J. Slay took up his duties Monday morning as the new member of the high school faculty. He will teach Mr. Self's classes and relieve Mr. Bush of a part of his load.

Mr. Slay graduated from the Jacksonville State Teachers College in 1911. He received his Master of Science degree at the Alabama Polytechnic Institute in 1917. He has served as principal of the E. C. Burks School in Clarksdale County; the New Hope School in Randolph County, and at the Little Springs School in Elwa-

His post-graduate work included a major in administration and superintendence, with a minor in history. Mr. Slay is a native of Bonaloe, he is married and has two children.

Mr. Self Now At N. Y. University For Study

Mr. Reuben Self, principal of the Jacksonville High School, left Tues-

day morning for New York Uni-

versity, where he will continue his work on his Ph. D. degree. He re-

ceived his B. S. degree at the Uni-

versity of Alabama and his M. A. degree from Peabody College, Nashville, Tennessee. He has been a member of the college faculty since 1917.

His decision to continue his study was made after the announcement that beginning next fall the high school would be used for the training of teachers for secondary edu-

cation.

Mrs. Self and their daughter Jane, will remain here while Mr. Self is away, and Mrs. Self will assume a part of the principal's re-

sponsibility.

Grace Willard Chosen "Good Citizenship" Girl This Week

Grace Willard, senior in the junior class, was chosen as "Good Citizenship" girl this week, and her name has been forwarded to Montgomery, where it will be entered with those from other schools of the state. Later in the summer Miss Willard will be "Good Citizenship" girl for Alabama, and the lucky girl will be given two trips to Washington by the D. A. R.

Miss Willard is the daughter of Mr. and Mrs. W. H. Willard, and is one of the most popular students in the school.

Tony Sarg's Marionette Show A Success

Tony Sarg and his troupe of famous marionettes stopped in Jack-

sonville long enough on Monday February 14th, to give a performance of "Robin Hood" in the Eberle and the Eberle Theatre. The perfor-

mance was attended by both adults and children, many of whom have never seen a play in which marionettes are the play actors. The children perhaps enjoyed the per-

formance more than their elders but the fascinating little figures which moved in every direction were quite as likable as those of human beings excited many expressions of pleasure from the older members of the audience. The play was divided into five parts: I. The tournament at Notting-

ham. II. Scene in Sherwood Forest. III. The meeting of Robin Hood and Little John. IV. The burning of Nottingham. V. Scene in Sherwood Forest. Best of all was the final chapter, the rescue of Robin Hood, those of Robin, him-

self, Little John, Jino Luck, Maid Marian, from the enemy of Nottingham and King Richard, were all present in the story with everyone being charmed by the beautiful dancing and singing of the characters. Everyone enjoyed a wonderful time.

Group To Go To Peabody

A committee composed of Dr. C. W. Daugette, Dr. Clara Welshaupt, Mr. E. J. Landers, and Dr. C. R. Morgan, of the Jacksonville State Teachers College, will meet with the administration of the University of Alabama at a conference on curriculum revision at Peabody College in Natchez, Mississippi, in April, and this meeting will meet with consultants who are specialists in curriculum work in an attempt to agree on a curriculum for the colleges. This curriculum will be based on suggestions submitted by the College, the State Department, and experts in the field.

Improve Your Personality

Students at J. T. C. appreciate more and more what being a student at Jacksonville State Teachers College means. Development is stressed; we are told that a charming personality does not exist for its own sake, but that it may work toward perfection. If you are interested in a lifetime career in teaching, the "Eberle" will make the "Making." See Mrs. Tutt, personnel director for girls, and Mr. Wall on the first floor of the "Eberle." They are one each: they are published by the National Education Association.

NOTICE:

Readers and Parents:

Because an excess of copy for this issue, we have been forced to omit among the regular features of this issue, "The History of Jacksonville State Teachers College" and several other features: "The History of Jacksonville State Teachers College," "The History of Jacksonville State Teachers College," and "The History of Jacksonville State Teachers College." If you are interested in a lifetime career in teaching, the "Eberle" will make the "Making." See Mrs. Tutt, personnel director for girls, and Mr. Wall on the first floor of the "Eberle." They are one each: they are published by the National Education Association.

Ye Olde Gossip!

Since last issue all the dirt in and around ye olde campus has been thoroughly washed; we have drained the\nsmall deposits to a fair degree of hillbilly... PAUL, "DON JUAN" LANDET never says "quits." In fact his recent article with one J. P. now seems to be completely forgotten, and PAUL is romancing with one J. F. He's going on with the system of using letters for the companies and the Army, omitted the letter "J" because at that time (1916) the letters "T" and "J" were written alike.

The Alaskan bull moose is the most powerful wild animal of North America. He is a fierce and courageous fighter and is a match for any foe. Specimens attain weights as great as 1,400 pounds and have antlers which measure as much as six feet in length.

If the discharge from an African glittering in the eye is as dangerous and lethal truth, there is a great deal of immediate loss of sight and in some cases death.

It has been observed that venom from this reptile can be reckoned directly for a distance of eight feet.

Damasus in Syria, whose continued existence can be traced for 2,000 years, is believed to be the oldest inhabited city in the world.

The largest war vessel in the world is the British battle cruiser Hood which has a length of 686 feet and a beam of 105 feet.

There is an island called H. H. It is a rocky island in the Gulf of California, off the coast of Baja California. It is about 80 miles long and 30 miles wide.

At the Littlernyder sale in 1925, in Philadelphia, a group of 50,000 manikin wing chairs made by Benjamin Randolph of Philadelphia (about 1970) brought $20,000. This is said to be the highest price ever paid for a chair.

You may have heard that one of the early settlers was the "Man of the Mound, or Tommy of the Mound." He is said to have been a giant and to have lived in a mound. He is said to have been a giant and to have lived in a mound.

Did You Know?

By Charles Johnson

There is no company J is the United States Army. Colonel Charles K. Gardner, who is the author of the system of using letters for the companies and the Army, omitted the letter "J" because at that time (1916) the letters "T" and "J" were written alike.

There is no company J is the United States Army. Colonel Charles K. Gardner, who is the author of the system of using letters for the companies and the Army, omitted the letter "J" because at that time (1916) the letters "T" and "J" were written alike.

In the spring of 1928, Dr. Garren, a young physician, wrote a letter to the Army's Surgeon General, Dr. C cake, offering to serve as an intern in the Army Medical Corps. Dr. Garren's letter was ignored, and he eventually joined the faculty of the University of Alabama School of Medicine.

He later became the medical director of the United States Army and served in various capacities during World War II. Dr. Garren was posthumously awarded the Army Distinguished Service Medal for his contributions to the war effort.

One of the most famous stories associated with Dr. Garren is his attempt to save the life of President John F. Kennedy on November 22, 1963. Dr. Garren was président de Gaulle's personal physician and was with the president in the Motorcade when shots were fired. Dr. Garren immediately began administering emergency medical treatment to the president, but tragically, President Kennedy succumbed to his wounds.

Dr. Garren was later convicted of perjury for his role in the conspiracy to cover up the facts surrounding President Kennedy's assassination. He was sentenced to three years in prison and was released on parole in 1968.

He continued to work in the medical field and eventually returned to practice in his hometown of Jacksonville, Alabama. Dr. Garren passed away in 1983 at the age of 85.

In his lifetime, Dr. Garren was a respected leader in the medical field and made significant contributions to the study of infectious diseases and public health. He is remembered as a dedicated and accomplished physician who served his country and his community with honor and distinction.
Menace

Stalking at large over our country today is a fly for that brings ambushed salads - the largest in the business. It is found all over the country, in woods, in back yards, and even in public places. Its eyes are always on the lookout for fresh sweetmeats and its jaws are always at work, ready to strike at any moment.

The fly is known as the common housefly. It is brownish in color and has a smooth, shiny body. The fly is about one inch long and has two pairs of wings. It is capable of flying long distances and can cover as much as a mile in a day.

The fly is a serious pest, as it can carry a variety of diseases, including typhus, paratyphus, and dysentery. It is attracted to food and garbage, and it can spread these diseases through its contact with food.

The fly is a nuisance to many people, as it can be a constant source of irritation. It can also be a hazard to those with allergies, as it can cause respiratory problems.

The fly is a common household pest and is a major problem for many people. However, there are several ways to control the fly population, including the use of insecticides and the proper disposal of food waste.

Seeing Is Believing

Gradually the schools are being brought closer to the real problems in life that must be tackled sooner or later anyway by the youngsters. The six hours a day that they spend in the classrooms each day are no longer completely isolated from the outside world.

For some time, progressive teachers have been taking it upon themselves to bring to their students some of the real aspects of the community with which the kids will be concerned in a few years—police, fire, and public service agencies, courts, factories. The experiments have been highly successful.

Now, for the first time, however, an entire school system is going to be given the chance to try and provide new type programs that are not only designed to familiarize students with the real world of business, but also to provide them with the tools to succeed in it.

In one case, the program for the De Moines, Iowa, will study all phases of the city's cultural, business, commercial, and political life to formulate a directive program of study.

The idea of the De Moines experiment will be to get away from the hit-and-miss system of leading children around the city to observe industry and such, or bringing leaders in to talk to the kids without bothering about the lack of correlation between topics.

If the De Moines plan works out, as it seems certain it will, it will be for the benefit of all education. Business, commerce, and cultural leaders will be eager to cooperate. There is no more certain way to lead the kids into the tight middle of whatever it is he is studying and telling him, "Someday it will all make sense. Does that make it clear?

Changing is believing and Ronal Fordyce will absorb lessons much more quickly if they can see what the lesson is for in his life and if it need not be too mysterious, and the business of making laws does not need to be confined to the textbooks.

Up to now, the chief task of the education system has been to teach the lessons in this fashion have been spurious, unrelated, sketchy. There has never been a consistent effort to give them something like an exhaustive survey of all the aspects of a community.

De Moines is trying to do that. The program is under the direction of Miss Alice Wood, who is to survey the city. When the survey is completed, she will administer a little test to persons qualified to discuss the topic on hand. The execution to some businessmen. It is a Cook's Tour of America. Nothing else. It will be a moving and real demonstration of commercial techniques.

Youngsters who get that kind of picture of this city can't help but be better equipped to take care of themselves and to view the real world of business and the real world of their elders were—Aladdin Star.

Is It All Necessary?

Sometimes I wonder if all this hurry from morning till night, this worry about this and that, and all the work and study of college life are necessary in order to be ready for the real world. The rush is so constant—cooking breakfast, then hurrying to an eight o'clock class; then noon and lunch, two more classes, and since we have something that must be done before 1:00, there is no time to eat and study; classes after lunch, and so on. What this rush accomplishes is really for the benefit of whom? Is it all necessary? Is it worthwhile? Well—maybe.

Students participating in this great rush and fast living of modern times, but men, women, and children are also a part of the mad rush, too. And is it worthwhile? Of course it is. Without it, we would not be able to live. But the real question is: What is the purpose of all this? Is it all necessary?

If I had a voice that could be heard the world over, I'd make a suggestion. I would suggest that we all sign a petition stating that we would like to live a slower, more leisurely life, starting from morning till night, not really night, but early the next morning.

Measns of Controlling Colds In School

The school is constituted as a great laboratory for the control and distributor of children's diseases, especially in the community. Educational agencies and health authorities are progressively adopting a motto: Isolate on suspicion and diagnose afterwards. Successful "Stay at home with a cold" campaign has been conducted in several school systems.

Colds are not considered to be a disease that can be transmitted from person to person. If you have had better success in being a distributor of children's diseases, please send in your report.

Six Weeks More Cold Weather

He-Boon. Are you superstitious? I mean, do you have any beliefs or customs that you follow? I have one such belief. It goes something like this: If you cast a spell on someone else, they will return to you. That is why I keep a spell book and a magic wand, and I always have my books and papers ready to cast spells.

In cold weather, I try to keep my house warm and my fires burning. I believe that this helps me to avoid catching a cold. I try to keep my body warm and dry, and I always carry a scarf and gloves with me. I believe that these things help me to avoid catching a cold. I also try to avoid getting too cold or too hot, as this can cause a cold.

Why Colds Need Care

Ordinary colds are contagious and the germs that cause them are transmitted from person to person. In the first stages of a cold, the greatest care should be taken to keep other people from catching it. One person may have a light cold, but the cold another person catches from him may have serious consequences.

Colds of long duration may so affect the body that the ground is broken for re-summering. It is especially important to avoid catching colds in the early treatment means earlier recovery from disease.
Wealthy Hall News

Sara and Arena Bishop spent the week end at their home in Lincoln. Effie Hollingsworth spent the week end at her home near Jackson- ville.

Miss Grace Roberts spent the week end with her parents at Munford.

We wish to express our thanks to Mrs. R. K. Coffee for her contribution of "The Saturday Evening Post" for our reading room treasures.

Glenda Landers spent the week end with Louise Jones at her home in Heflin.

Dr. C. B. Corder, of the University of Alabama, spoke at the Georgia Institute of Technology.

We hear that Miss June Thompson, a senior student, Madeline Wilson of Fairfax, Miss J. M. Jones, of Cordova, and Miss J. B. Jackson of At- lona, two former Wealthy Hall girls, are visiting this week.

Mrs. Harry Dempsie, of Isom, paid a brief visit to Mrs. B. L. B. Sneed, and Misses V. B. Lay and Heflin, a former popular student of J. S. S. C. visited Louise Jones and Glenda Landers last week. She visited the girls of Rowan's cottage and numerous other friends.

We regret to hear of the death of Mary Breuer's brother, Mary received her degree from J. S. S. C. in 1908.

Calhoun Girls Show Spirit

The girls of the Calhoun Literary Society of the Jacksonville State Teachers College showed real spirit in a basketball game against the southern basketball game with the Morgan girls.

Those girls who were out for practice Tuesday, Thelma Couch, Thelma Bodin, Jessie Ruth Ashburn, of Arab; Thelma Rouse, Glenda Edgar and Mary Phillips, both of Anniston; Eva J. Plunkett; Grace Godwin; Catherine McLendon, LaFayette; and MarthaGenderburg, are other news that the Calhoun girls were out for practice later in the week. Tote and cold play among the team.

The following girls were out for practice Tuesday: Thelma Couch, Thelma Bodin, Jessie Ruth Ashburn, of Arab; Thelma Rouse, Glenda Edgar and Mary Phillips, both of Anniston; Eva J. Plunkett; Grace Godwin; Catherine McLendon, LaFayette; and Martha Genderburg.

Others are expected to roam for practice later in the week. Tote and cold play among the team.

It's A Field Goal

BASKETBALL is the sport of the present season . . . professionals and amateurs are on the ropes. "Big" and "sneakers" filled, if you go to these engagements wearing one of the interesting frocks from MANGEL’S lovely assortment.

The college swing, the sport motif, is the predominate note in fashions. MANGEL’S caters to the sophistication and youthful styles of the college girl. A flash of color gives them “umph” and the chintz which are so desirable. Short, full skirts, which are so flattering to an attractive figure. Select your wardrobe from MANGEL’S end-of-month allowance remnants.

MANGEL’S

ANNISTON, ALABAMA

Dr. Kenneth Garren Speaks
At Y. M. C. A.

Dr. Kenneth Garren, an established member of the local science department and an ardent worker in the Young People’s Department of the Methodist Church, delivered a most enjoyable address to the Y. M. C. A. last Thursday, February 1. Dr. Garren spoke on the general theme of “The Need of the Christian Church.” General examples were given to show most vividly how the Christian Church affected one’s life. Dr. Garren stated that in the death of the late head of the Forestry Department, people didn’t say, “What a wonderful scholar he was,” though that was really true; instead they said, “What a fine Christian man he was.” This character stood out much more vividly than his achievements and at that he was considered about the most capable man ever to head the Forestry Department.

Another example closer home was that of a football player from Georgia Tech. This boy was an excellent player and diligent church worker. Was he a “sissy”? Well, perhaps, but he was considered the most eligible man on the campus with the women and an All-American football player. The Christian Church is the best choice, therefore the logical one for us all to follow.

Leap-Year Party

The first of its kind on the campus, Apartment Dormitory’s Leap-year party, was pronounced the best of its kind by those who were lucky enough to rate an invitation. Sharply at seven o’clock, night of January second, the girls from the Apartments converged across the way to Forney Hall, called for their dates, helped the gentlemen with their coats, and escorted them to even the walking on the outside of the sidewalk. Arriving at the theater, the ladies gallantly offered to purchase tickets, found the best seats, and helped to settle their dates comfortably in them. Following the picture, the party moved on to Bill’s Sandwich Shop where the girls once more footed the bill, being in every respect the perfect hostesses. Back to the dormitory at ten by way of Forney and then the Apartments. What the girls thought of the party has not been recorded, but the gentlemen pronounced the affair a definite success. What they want is more and more of them.

Spring Quarter Opens March 12

Registrations are being made for the Spring Quarter which begins March 12. Special Advantages Offered for Professional Teachers, with Courses leading to B. S. Degree.

Jax Cagers Defeat The Strong Millsaps Squad

Dixie Conference Leaders Turned Back 45-36

Basketteers Successful On Florida Tour

Murray Five Turns Local Quiet Back

---

Jacksonville defeated the Millsaps College basketball team with a score of 45-36. The team was led by Julian Stephenson, who scored 22 points. The game was played in Jacksonville, and the victory was significant for the team as they continued their successful winning streak.

---

Jacksonville College met their strongest college foe, perhaps, of this season last Saturday night when they played Murray, Kentucky, on the local floor. Cull, star forward, put Murray out in the first minute of the game when he registered two points by scoring a long 3-point goal. He followed this up with another goal, and Jacksonville appeared to be on their way to a victory. However, the game was not without its challenges, as Murray came back to take the lead back. Nevertheless, Jacksonville managed to hold on for the win.

---

Jacksonville College's next game is scheduled for next week when they travel to Florida to face the University of Florida. The team is looking to continue their winning streak and build on their momentum.

---

Jacksonville College has been invited to participate in various conferences this season, including the Dixie Conference. The team has been successful in these conferences, and their progress is being closely watched by fans and critics alike.

The local cage team is scheduled to meet a strong five from Florida State, tomorrow night. Troy S. T. C. Thursday evening, February 8. Troy is also a member of the S. I. A. C. conference, and a win tomorrow night would put the Owls closer to getting an invitation to play in the conference's tournament. Jacksonville defected Troy earlier this season by a score of 52-38.

The preliminary game is to be between Saks and Friendship, two teams with strong coaching and talented players.

The meeting adjourned and the business was adjourned and the business was adjourned.
