DEBATERS FOR THE MORGAN LITERARY SOCIETY

Morgans Dominate Campus Organizations

Each student upon entering college here is confronted with the problem of a literary society with which to affiliate. The Calhouns have long boasted that they furnish the "brains" and leaders on this campus, while the Morgans have only numbers or quantity; the Morgans are made up of the "herd," as they put it. Let us, however, give a true picture of the situation. As someone has said, "Know the truth and you will become Morganian."

NUMBER THIRTEEN

DEBATE FOR THE MORGAN LITERARY SOCIETY

MORGAN EDITION OF

THE TEACOLA

A Student Publication, Jacksonville State Teachers College

FEATURING SPRING QUARTER FRESHMEN

Morgan Girl Is Selected As Miss J. S. T. C.

Morgans Are Seven To One Favorites

Gettup Poll Gives Calhouns Chance

LUMP PITTS, PREETIEST SOPHOMORE, IS CHOSEN OVER NINETEEN BEAUTIES TO REPRESENT OUR SCHOOL

Morgan Girl

MISS MYRLE PITTS, PETITE YOUNG DAUGHTER OF MR. AND MRS. PERRY M. PITTS OF CLANTON, ALA., WAS LAST FRIDAY NIGHT CROWNED MISS J. S. T. C. 1940. LUMP, AS SHE IS KNOWN BY MOST OF THE COLLEGE PEOPLE, WAS CHosen FROM A BEvy OF NINETEEN COLLEGE BEAUTIES. THE THREE JUDGES WERE FROM OUT OF TOWN. THEY WERE, NAMELY, MISS EVELYN COX, OF OXFORD, CARL E. W. KILLION AND MR. "RED" GRIF. BOTH OF ANNISTON.

Morgans Are Seven To One Favorites

Change In C. L. S. Debating Personnel Is Responsible For Drop In Morgan Hopes

KEMP, LEOTA GREGG Are Morgan Leaders

"RED" TO ACT AS MORGAN PREXY FOR SECOND CONSECUTIVE ANNUAL DEBATE; HE WILL ALSO BE DEBATE CHAIRMAN THIS YEAR.

The Morgans held a short meeting immediately after the excitement of their second victory over the Calhouns. Here are the MORGAN HOUSEMATES shown from left to right: Ted York, Christine Glass, and Excell Baker, students of the regular TEACOLA Club and the Morgan Literary Society. Ted York, of Valley Head, Alabama, is a junior and he is honored by being selected to act as first speaker for the Morgan Literary Society.

Christine Glass is also a member of the junior class, and she won the alternate speaking position over keen competition from male candidates. Christine broke a forty-one year tradition and gained state-wide recognition when she became a participant in the yearly debate. She is the first co-ed to break into forensic activity at this school. Miss Glass is outstanding as a cheerleader, having held the number-one yelling position throughout the football and basketball seasons. She is also active in other student organizations.

Excell Baker, graduate of Crossville High School, is debating for his first time this year, and judging by his tryout speech, he is an orator of great capacity. He is number two speaker for the Morgans. In addition to his forensic honors, Excell is editor-in-chief of the student Morgan edition of the TEACOLA and sports editor of the regular TEACOLA, and he served as president of the Morgan Literary Society during the Winter Quarter. "Shine," as he is fondly called by his friends, is also an athlete, having participated in several major sports on the campus squad.

Fourteen per cent of the student body believe that the Calhouns have at least an outside chance of winning.

By Don Morgan and Family

The Calhouns should make good actors. We would add athletics as well, but the last census report did not list any female Calhoun Literary Society members. Don't take this article as a statement of fact; go look up the census results and check up on us.

Why do we say that the Calhouns are potential actors? Why, some of the members of this minority group have tried to-and with a certain small degree of success-impress the public with the fantastic and foolish notion that the Calhouns have a chance, however small it may be, to give the Morgans a run for their money in the forthcoming forensic duel.

Recent developments have given added weight to these shaky arguments that the Calhouns are advancing, but the poll of public opinion indicates that the Morgans still hold a slight edge as pre-debate favorites.

The afore-mentioned recent developments have to do with a substitute that has been experi
A highlight of the college year was the visit of Rabbi Lawrence Block, on the campus, Monday and Tuesday. He spoke to the Student Forum Monday night, and appeared in the English Department faculty in a special assembly Tuesday morning.

Rabbi Block stated in the beginning of his remarks that he knew he had not been a disappointment in the audience, as many people thought a rabbi was an old man, short and fat, with a long beard.

The young, well educated and versed in the English language, he held your audience every minute. He pointed out the fact that two-thirds of the people of the world are neither Christian nor Jew, and that all religions, other than these two, held many beautiful tenets, worthy of mention. He gave a brief explanation of the followers of Mohammed, Buddha, Confucius and others. He paid tribute to the custom of prayer which is observed in Islam, and stated that nothing could take the place of this act of remembrance of the greatness of the world with nature, likening the Palm tree to the Moslem, the Church to the Christian, the Temple of Jerusalem to the tree of the forest, the fruit of the olive, from which is produced olive oil, a necessity to the well being of all.

Rabbi Block was enthusiastically received by the student body and faculty, and his coming marked a broad step in the life of the college. It could be said, by those who observed its effect, that none could limit the future damage it would have done with less feeling more kindly toward the cause he represented.

Mr. Meray is a graduate of the Hebrew Union College, Cincinnati, and has done graduate work at the University of Georgia.

Your Opinion

Common error: Modern pronounced as if spelled "modern"; similar pronounced as if spelled "simular"; Your vocabulary: Dogmatic—relating to dogmas or doctrines; positive.

Jewish Rabbi Heard At College This Week

Annual Junior Prom Declared A Success

Yes, indeed, the Junior Prom was a success. Saturday night, March 9, crowned the worthy efforts of the junior class, which made a huge success. The program was held in the new gymnasium. The gym was attractively decorated in green and black, while electric lighting was used. The program was divided into three acts, with the appearance of mammoth shamrocks in several directions.

Music was provided by "Sun-kissed" Lanier Cowart and his Royal Turks. The orchestra which was the best was made up by Miss Iola Bink, escorted by Etes Hudson, president of the Junior class.

As a bit of very personal criticism, your correspondent, wishes to add this. Since we have been at J. S. R. C, we have seen so many more enthusiasts exhibited for every school social event as was shown for the Junior Prom. Everyone knows that, to prepare for an enjoyable social affair, a great deal of hard work is done beforehand. May we be the first to congratulate the members of the Junior class on the willfulness to work and cooperate.

FLASH!

Our news reporter has just uncovered an astounding bit of information! The Calhouns have a new member. Duckhead Evans, the confessed free lancer, has been limed from the ranks, into the Calhoun fold.

We don't blame the Calhouns for calling the matter from us. We would probably take similar steps if none of our collegiate members of our society were capable of leading us.

Bismark may possibly assume the mantle of the leader. He, being the first to accomplish this great undertaking.

In the meantime, the Morgans will miss Duckhead's beaming countenance at our future meetings. We're tak- ing it for granted, of course, that he will appear at the next of the regular sessions of the group over which he has been chosen to preside.

MYRTLE 'LUMP' FITTS

The Miss J. S. T. C. 1940 contest was co-sponsored by the Sophomore class and the businessmen of the town.

Lump, who is only eighteen years old, was last chosen Miss Clarion, 1939, from a large group of contestants. She is a Sophomore here at J. S. T. C., and is one of our shining stars. She is a member of the literary society, the Sigma Delta Phi, the Calhoun - the Morgan of course! She is also a member of the regular Tescola staff and of the Dramatic club.

Local Group To Appear Before Southern Association

In response to a request, Mrs. Sura McDonald, supervisor of the seventh grade, of the Laboratory School, in cooperation with Mrs. W. J. Calvert, of the Health and Physical Education Department, will present a country folk dance unit, correlated with other departments, at the beginning of the Southern Association of Health, Physical Education and Recreation, which will be held in Birmingham March 27-29-30.

The local group is scheduled to present the dance unit, and the lotus bed costume will wear appropriate costume and will be accompanied by a string orchestra, composed of college students.

Twenty girls and boys will take part in the performance.

Students Successful In Symphony Tryouts

Lanier Cowart, Montgomery, and Milton Porter, Anniston, were successful contestants in the recent tryout held for the National Youth Symphony in Birmingham. They were included in the fifteen musicians chosen out of fifty-five contestants.

On March 29, they will enter a second tryout in Atlanta, and later a third. If they are successful in all of the tryouts and are chosen to be members of the orchestra, they will make a tour of South America, with the famous director, Leopold Stokowski.

Cowart directs the college dance orchestra and plays the trumpet; Porter plays the clarinet and is a member of the orchestra.

JAMES B. KEMP

The Calhoun cage team had suf- fered, and elected officers for the Spring Quarter.

James B. "Red" Kemp, one of the stars of the team, was chosen president. Red is a Sand Mountain product, hailing from Douglas, and another Sand Mountain boy from Crossville, was chosen as vice-president.

Fifteen percent of the student body are sure to be interested in the chance to defeat the representatives of the Morgan Literary Society.

Students Vote on Tescola

We are sorry to learn that the Calhouns have gained the support of fourteen percent of the student body. This can mean only one thing. That is, that some of the Morgans are placing their faith in the Calhouns. We cannot judge when we learned that we, the Morgan Literary Society, had the support of only eighty-six percent of the students. We are certain that the membership of our great tribe includes a much greater portion of the college than is supporting us, but we are confident that future developments will brighten the Tescola banner to its rightful place in the hearts of a much greater percentage, as the honest-minded believers in everything that the Morgan Literary Society stands for.

Students Serve As Officials In Clay County Tourney

"Red" Kemp and Neil Royer served as officials at the Clay County Junior High School tournament, held last week.

Kemp is a native and is rounding out several years of activity with the varisty basketball team; Royer is a local sportsman and is one of the regional players in the college gymnasiums.

College Grounds To Be Beautified

According to Dr. Duquette, the Morgans and the Calhoun Literary Society have agreed on a beautification; the grounds around the buildings, the apartment dormitory, laboratory, library and physical education building, will be properly landscaped and planted. The grounds of the Laboratory School on the old campus, will be improved, also.

L. F. Ingram, director of Vocat- ional Agriculture in the High School, will have charge of the landscaping. Mr. Ingram has made a special study of landscaping and planting and is considered an author- ity on the subject.
The Teacola

Wednesday, March 20, 1940.

Current Science

By Dr. Kenneth Gareen

The yellow color of the branches of some of the red cedars indicates the presence of the staminate cones that bear the pollen. The red cedar is dicotyledon—that is, the staminate and the ovulate cones are borne on separate trees. The ovulate cones are still so tiny that they can hardly be seen with the unaided eye.

The Haplacita, mentioned in last issue, are now in full bloom in the woods. They have been illustrated, lately, by the toothworns and the rue anemones.

Spring beauties are appearing in fields and lawns. This plant can be identified by its two slender flashy leaves, and its small white flowers or pink petals striped in deeper pink.

CONFUCIUS SAY:

Men get rich who buy Brown's price, sell for Brown's price.

If I am twice as bad, I know no such; however, men like Tesla are not able to think more than once.

Consider only one time and one wonder why old-time Calhoun is a slave; also, Hand, Ever-Active Calhoun, consider two times and one no longer wonder.

Contemporary sage say that man who took not his own horn is not likely to have such. Cool, temporary right, maybe, but Calhoun took horn so much sound like perpetual bombardment of Neat flying squall.

Some time play tricolor and mean trick—give some name, Jack Dempsey, to great and much respected fighter, and to a Calhoun. Pate unfair to great fighter.

"Dee" Brunner has blonde girls on, mind, and blondes make heart-throbs.

Wood Notes

Clarla G. Walshep

Housman, the English poet said:

"Are, man, the staff to drink For fellows whom it hurts to think."

We recommend ale as a temporary remedy for what ails the poor Calhouns, but we seriously doubt if the remedy exists which would bring about any degree of permanent restoration to normality of a person who has deviated so far from the trends of clear-thinking and self-respect that he is not ashamed of his status as a member of an organization that has little quantity, and only such quality as remains to be proved.

Science teachers believe that man evolved from some lower form of animal life. We wonder how many thousands—yes, even millions—of years must elapse before the Calhouns of today have passed through the stages of evolution.

There are the Calhouns of yesterday, the Calhouns of the future, the Calhouns of today. We wonder how many teen years to complete a four-year course, the group will feel no loss through graduations.

Statistics of Apartment Dormitory

The 1940 census of the Apartment Dormitory revealed the following facts: Of the 60 residents of the dormitory, 27 are Morgans and only 16 are Calhouns. The average height of the dormitory is 115; therefore, the Morgans have 5,000 square inches for each square foot, while the Calhouns have 1,840. The average height of the dormitory being 5 feet 4 inches high, the Morgans have 234 square inches in height and the Calhouns 67 square feet 4 inches. The Morgans have the advantage of being able to buy more groceries, use more library books, do more work, and, in the long, long ago before the M. I. L. S. had been established, and when the Calhoun group was the only society existing.

We have just heard from a reliable source that glasses of water were first discovered by the Morgans. It is said that this may be due to the influence of Kathleen Smith, who insists on being a flower girl.

Q. "What Literary Society has won every athletic contest this season?"

A. "Ha, don't make us laugh. Have the Calhouns EVER won an athletic fray?"

There seems to be some doubt as to whether "Scatterbrained Brown, that wissy-washy lad from Field, can stay on either side of the fence long enough to give a speech on the debate question."

We Morgans wonder if "damned little" Boybarb ever found a friend who would be so kind as to help him square his triangle. It has been reported that he spent several restless nights prior to the dance.

Calhoun Society Has Increased To Nine

There is much joy in the inter-collegiate frame-works of the Calhoun Literary Society since the Spring Opening. The group numbered 11 here, last year. At first there was much speculation as to the cause of this unusual state of affairs, but close observation showed that the habit of "pour poured" group have ample reason to rejoice—a freshman has joined their clan.

Prior to the just-mentioned freshman's intellectual downfall, the Calhouns had been in the pit. Now fallen C. L. S. could boast of only eight paid members (colored Calhoun clanners are not included in this figure). The grand total is now nine white students (Asiatics included) who are members of the C. L. S. (Calhoun Literary Society or Calhoun Litteral School), and all Carriotton or, if you prefer, Calhouns are looking forward to another year in which they expect to gain at least two more members. Since it takes a Calhoun at least twelve or fourteen years to complete a four-year course, the group will feel no loss through graduations.

Temperance

That age-old, unanswered question; "Why do men drink whiskey?" is a question that gives some solace to our attention. There are several answers that could be offered in reply to the query, but I think that so practical a subject as temperance has been worked out which would solve the serious problem created by the human thirst for alcoholic liquor.

There are countless suggestions and ideas which, when put into practice, help to remedy the situation, but the only real solution that can be put into practice has never been tried.

Why do men drink whiskey, because of yesterday drunk, and taught the boys of that generation to follow in their wayward footsteps. Those boys of yesterday are the fathers of today and are preparing a future generation of human beings who should suddenly be transformed into teetotalers, so that neither adult nor youth that now lives would ever indulge in the unholy practice of alcoholic liquor, then the present generation would also be free of the habit.

If the existing morals would do this one thing, they would be building a better world, at present they are the cause of much pain and trouble and least of all, they are the cause of the road of life.

In this practical suggestion Will this be another of any other probable solution, ever be universally put into practice? Will the human race ever be freed from this alcoholic alcohol and that retards the very progress of civilization?

Is this a practical suggestion? We say No! It isn't possible to instigate and carry out such a widespread movement as this. The main reason is plain to see, simply that a large group of people, as this would affect, could not and would not agree to this proposal. It could not even be carried out in any group, even if they wanted to carry out the idea, while, they do not want to do.

The human race is not so easy to lead as all this. The serious side of human endeavors does not include things that interfere with the so-called relaxations of life. To most people, the habitual dram drinker, the whole idea of temperance is as distasteful to them as having to say no to a drink.

What, no beer? We think that that one expression expresses the sentiment of many who are so kind as to help him square his triangle. It has been reported that he spent several restless nights prior to the dance.

People who argue about basketball games bound to admit it when asked. The question is how to stop it. So you see after all our views and principles we arrive at the same point that we started from. We have not as easy to lead as all this. The serious side of human endeavors does not include things that interfere with the so-called relaxations of life. To most people, the habitual dram drinker, the whole idea of temperance is as distasteful to them as having to say no to a drink.

A Treatise: "Land of the Noble Free"

What is freedom? Webster has defined it as "exemption from control; liberty; familiarity." If the world has such a short definition, why have we, the billions of people, fought and shed their lives for it? Why does it provide the basis of our country's government? Why did the sound of its echo start a beating in the heart of each American patriot, before it was a voice of the heart of every man of freedom, and because freedom has a deep meaning; freedom is a profound word which is not to be explained in part but by speculation. There are other opinions as to the meaning of freedom. The ignorant people—or perhaps those who have been too careless to try to find the right meaning—usually maintain that freedom is complete, untrammeled liberty. Persons, however, who have observed the results and effects of newly-gained freedom through the centuries know that true freedom in a country is not without restrictions. These restrictions consist wholly of the consideration given to fellowmen.

Freedom is a condition to which every person must become adjusted. We, as Americans, should be eternally thankful to our forefathers who taught us the true meaning of freedom, and the application of it, through the constitution of the United States.

The opinion that freedom and Democracy, which go hand in hand, are "on the way out" finds substantiation in Europe today. For instance, let us look at the most obvious example—Germany. In it there is no political, economic, or cultural freedom to the population as a whole. There is no equality of people; the poor Jews were persecuted unmercifully. But Hitler's friends received the best of everything. Thus Germany has made the youth of her youth know and understand how Germany's system of rules is a machine—billions of machines. In Hitler's mind, he wants to build the way through the walls of freedom built up by other countries. The democrats of Germany today will continue to exist even after Hitler's death, I say this because the people of Germany do not know how to use freedom, once they get it. They obtain their freedom from the World War, but how long will they maintain it? Only until a scheme, a short diplomat came along and offered to direct them? They were in the same ready for new people; they had grown weary from the increased burden of personal direction, and wanted someone else to direct their actions.

We Americans, whose heritage is freedom, should seek to understand our heritage and more fully than we do. If our people cease to be aware of the meaning and the blessings of freedom, it may indeed "find its way out." Although it is true that we young college students can't do much, yet, about establishing freedom in Germany, we can make practical application of the principles involved right here on our college campus.

---

An Ideal J. S. T. C. Student

Would be:
- A member of the Morgan Literary Society.
- A participant in most of the campus sports.
- An average student scholastically.
- A person who takes part in most extra-curricular activities.
- A person who is friendly to others.
- A person who will at any time stand up for "the J. S. T. C."

Would not:
- Red Kemp's or Karl McClendon's personality.
- Pop Gregory's or Marge Pryor's disposition.
- Cus Nation's or Alice Lunder's looks.

---

ATTENTION!

The Calshoun, like Mac West and the old grey mare, "ain't" what you used to be. At least you'll never look like an approaching mare.

---

Why is soap formed around the drop of fat creating a nucleus in the center of the fat drop? An atom of the fat changed into soap in an unbalanced situation was set up. It is possible that fat molecules around in the airbath thereby initiating the motion of cells. Continued change of fat into soap eventually caused the fat drop to pinch into two drops which was a perfect imitation of the division of many cells.

Dr. Critt's artificial cells attracted a lot of attention and were widely discussed. At the present time after the sensational aspects of his study it is evident that he has made a valuable contribution to our knowledge of life. He has shown, beyond any reasonable doubt that in many of the phenomena of living cells are actually nothing but the results of chemical and mechanical reactions. We see now that the motion and division of living cells may be reduced to surface tension forces and that a living cell, therefore, moves and divides for much the same reason that a drop of oil in water moves and divides—that is because it is chemically different from its surrounding medium.

The latest insight into life has been given us by Dr. Stanley of the Rockefeller Institute. Dr. Stanley is known for showing that there are certain substances called "viruses," which appear to be on the borderline between living and non-living things. These viruses are particles of protein, much smaller than any living things, yet they are capable of causing many important diseases of plants and animals. Yellow fever, bubonic plague, mosaic leaf of cotton, tobacco, and pecans are a few of the diseases known to be caused by viruses.

Viruses, as revealed by Dr. Stanley's studies, seem to have all of the characteristics of living things. They are destroyed by heat and poisons, they have a definite pattern and show irritability. If a single particle of virus is put in a tobacco plant in a few days many thousands of the particles may be extracted from the plant. Therefore viruses will not show this growth and reproduction if they are in some living plant or animal. Outside of plants and animals, viruses remain just inanimate, particles of protein.

Since these viruses are particles of protein within any resemblance to the cells of a living thing, and since they are incapable of growth and reproduction except when inside living things they are regarded as being on the border line between living and non-living things. This does not mean that there is a point where it is difficult to decide whether a thing be living or not, but the animate or the inanimate world.

It appears, therefore, that through the growth of several centuries we are beginning to have an insight into the mystery of life. Perhaps bound to get hurt.

Big boys like to fly kites same as like little boys.

All debaters that live together get lots of information, use by.

People who argue about basketball games bound to admit it when writing.

Confusion has been thrust from talking now. He stopped talking and let Calshoun talk-talk.

The red headed K. Smith is going to be a flower girl this.

Toots White is going to have a man if she has to make him out of a bed sheet.

Downs going to have to start paying board at Weatherly Hall.

Decker and Duckhead stay in the park a lot since new brunnete move to Weatherly Hall.

Murrow has completed thesis, "Ferdinand the Bull.

Kat Germany like preacher.

Ostert Bull had company again this week-end, but he must have "Gone With the Wind."

Sara B. Paris still selling government bonds.

Madeline Wilson like Miss Randolph Student Teacher.

Bruney come to tea dance often "wow, eh Ondelial!"

Bishop twins often say "There's something about a soldier."

Jones family still hanging around.

Marjorie Gutherie mad cause threshold didn't take student teaching with Miss Mitchell.

Weatherly Hall girls thank "Red" Kemp for entertaining visitors this week-end.

Red-headed Speigle sure can jitter-bug.

Ashe to ahese, dust to dust.

Morgans are gold, Calshouns are rust.

Q. "Who is the Calshoun's best student?"

A. "Jimmie Thompson."

Rumor has it that Jack Dempsey, that would-be social butterfly, is still trying to land himself a place among the upper "four-hundred," with time we may even have some of them land all at this. The rumor is that we should recognize that life is very complicated, and therefore we should not be in a considerable time and study to the matter of keeping alive.

You won't need a guide book if you get sweaters and skirts from Mangel's. They're all here. The match mates, the new dressmaker sweaters, the plaid skirts, the plain skirts. The new extra jackets. The RIGHT things for right wear. Sweaters, jackets, skirts at $1.98 and that means something, when you think how grand they are.
B. S. U. Elects New Officers

The B. S. U. Council met at the home of Mrs. Proctor Monday night, March 18, to elect new officers and discuss plans for the annual banquet.

Reverend Wallace Morton led an interesting devotional. He also presided over the council while Miss Ruth Drake, along with the pastor and faculty advisor, proceeded to elect the new officers.

Cecil Bierly was named president for the ensuing year, with Wheeler Hardy, Emma Cathleen Finchler, and Percy Wimser as first, second, and third vice-presidents.

Effie Hollingsworth is to be secretary of the council, and J. Leotis Lowborn treasurer. Music will be furnished by Lilla Mae Prater as pianist and Frances Ingram as chorister.

The new officers will begin their duties immediately under the B.S.U. Spring Retreat, which is to be held at Judson College, April 29-30.

The date of the banquet has been changed from the previously announced date of April 19. It will probably be April 12. The theme of the banquet is to be "On the Jericho Road," with a play by that name as a part of the program. The play is to be presented at the Spring Retreat.

Daughtell Hall News

We are glad to have Miss Barbara Hodge, of Gadsden, in the dorm. Miss Hodge is a former student of Blue Mountain College.

These students who left at the end of the winter quarter were Misses H. and L. Martin, Mrs. Lena Creed Oden, and Mrs. Ulysses Bowman. They are missed very much.

We are glad to have Mr. Powell in the dormitory now.

The following Daughtell Hall students were in contest in the recent Miss J. S. T. C. contest: Misses Margot McClendon, Kathryn Fleischer, Laura Dyer, and Betty Pitts. And our girls rate 1! Miss Marion Coffee visited in Andalusia during the holidays. She almost forgot to come back. Bernice Drake and Loretta Gregg help the "dorm" during the holidays. Could it be they were looking for the soldiers to come back to the window?

Extensive Campaign Against Social Disease

Opens At J. S. T. C.

The Physical Education Department of Jacksonville State College is staging a battle against venereal disease.

The Teacola

Poetry By Morgans

(A PEA TO FLEA)

Take me, mighty Fate, into your hands. Bind me, if you choose, with your great bands, And make me famous, glorious, happy, or sad. But I'll be contented when one request I've had. My desire is this, oh magnificent and powerful one, It is only one condition I want to shun: Hold me, shape me, fix me, make me, buy or sell, But never make me a Caliban and all will be well.

—Can U. Tackett.

Government Class Presents Charter To Local C. of C.

The proposed charter for the City of Jacksonville was presented to the Chamber of Commerce by the Government Class on last Monday night. The students had prepared the charter and the proposed by the direction of Dr. C. C. Casey.

A typed copy of the charter was given to every member of the C. C. of C. present, then Dr. Casey briefly called attention to the most important parts of the charter and gave a resume of each section. Helen Barnes Wilson very ably supported the charter on the administrative efficiency of the city manager plan for Jacksonville. Catherine Ashmore compared the cost of the present system of city government with the cost under the proposed plan.

At the close of the talks an open forum was held and the students and the public answered the questions that the Chamber of Commerce members desired to ask, pertaining to the charter.

The Chamber of Commerce thanked the class for their interest in the City affairs and assured them that the charter would be given due consideration.

We don't understand why."Katie" McClendon's High School friends insist on calling her "Pot." Could you throw any light on the subject, Miss "Kitty"?

PRINCESS THEATRE

WEDNESDAY, MARCH 20

"BAD LITTLE ANGEL"

With VIRGINIA WEIDLER and GENE REYNOLDS

THURSDAY and FRIDAY, MARCH 21-22

"NINOTCHKA"

With GRETÁ GARBO and MELVYN DOUGLAS

"COWBOYS FROM TEXAS"

ALSO—

"NANCY DREW'S HIDDEN STAIRCASE"

With BONITA GRANVILLE and F. THOMAS

Serial: "DICk TRACY'S G-MEN"

MONDAY and TUESDAY, MARCH 25-26

"DISPUTED PASSAGE"

With AKIM TAMIROFF, DOROTHY LAMOUR, JOHN HOWARD

THURSDAY, MARCH 28

"THE MARCH OF THE METRONOM"
Extensive Campaign Against Social Disease
Opens At J. S. T. C.

The Physical Education Department of Jacksonville State Teachers College, under the instruction of Mrs. W. J. Calvert, arranged for Dr. Rayfield, one of the school doctors, with the assistance of the school nurse, Avis Mitchell, to give the Wasserman blood tests to this special class.

The Physical Hygiene class also wrote the State Health Department of several southern states and found some very interesting facts. Some of them are as follows:

In the United States 100,000 new cases of syphilis are acquired every year.

Twenty-six states through legal action have attempted to stamp out syphilis through premarital laws.

Georgia has a pre-marital law requiring both female and male to have a physician's certificate of freedom from syphilis before a marriage license will be issued. The state also has prenatal clinics and sixty-two counties have organized venereal disease clinics. The Pennsylvania law is that only the man must have the physician's examination and certificate of freedom from syphilis. Fifty-six counties are operating ninety-two free or part-pay clinics in the State. Thirty-eight of these in seventeen counties were organized in 1938. Free drugs for the treatment of syphilis were distributed throughout the state.

In North Carolina laws have been passed requiring both male and female to have an examination before issuance of a marriage license, blood tests of marriage examiners' and examination of domestic servants; also an act for the prevention of venereal diseases that reads as follows:

"That syphilis, gonorrhoea, and chancroid, hereinafter designated as venereal diseases hereinafter declared to be contagious, infectious, communicable, and dangerous to the public health, shall be unlawful for any person infected with these diseases or any of them to expose another person to infection." In Kentucky both the man and the woman must have a doctor's examination and certificate before marriage. The state is also looking forward to a venereal law.

The State of Texas does have any premarital laws. The only in effect are marriage laws that must have an examination by a physician, without any special test as to Wasserman or other tests.

The present laws in Louisiana governing premarital examinations are inadequate and weak. Under the present law only the male is required to have an examination for communicable disease and this does not compare to a Wasserman or other serologic test.

Mississippi has no marriage laws, premarital laws, or laws in relation to venereal disease. Therefore, it has the highest syphilis rate of all the states in the Union. The following graph illustrates relative proportions of syphilis in the population.

Mississippi
New York
Georgia
Maryland
Virginia
North Carolina
Delaware
District of Columbia
Tennessee
Alabama

Arrangements are now being made for a test to be given every student before he enters J. S. T. C. next year. These tests are to be included in the freshman physical entrance examination.

Lord of the Admiralty, one of the most interesting facts about Churchill brought out in the talk was that he is one of the leading journalist in England today, and that much of his income is derived from his books and articles written on European politics and policies. Mussolini, his position in Italy, his work, his hopes for his people, and his humble origin were brought very effectively before the club by Tom White. Italy's dictator was given the title of the most enlightened leader in Europe today, and indeed the discussion of Mussolini's plans for Italy would make him appear so.

Weatherly Hall News

Almost all the Weatherly Hall girls spent A. E. A. holidays at home.

Miss Nellie Standfield spent the holidays with Calvin Carter at Weequahic.

Success girls went to see "Gone With the Wind."

Miss Horton, N. Y. A. Supervisor, went to her home in Evergreen, Mrs. Davis visited in Atlanta during vacation.

We welcome Miss Melba Patton and Jacky Beach and Louise Patterson as new residents at Weatherly Hall. Miss Frances Williams spent her vacation with her aunt at Iron Clad. Miss Lucille Catylye spent the week-end with Miss Velma Farlow. Miss Mildred Adams have been to announce that she saw "Gone With the Wind" two months ago. Kathleen Smith didn't.

Did You Know That

The Morgans are tops! There is a sudden rush for second floorers to move to first floor in Dauphine Hall? Could the answer be man?

Jack Dempsey is a killer diller! You can see Willie Landers for information about the ad Crown Drug Co. had in the Jacksonville News that commented on cripples and fakes.

Some girls in Dauphine Hall are so stupid they simply have to have a light on 'til twelve—studying?

Mom Gregg, Sally K. Wester, and Sara Dickey are passing part of their great store of knowledge on to the training school pupils.

The Calhouns are building up for an awful let-down? Kat McClendon is falling in love all over again?

"Robert Taylor" Tant is hunting a flower girl?

The Calhouns don't stand a "wee" chance on winning the basketball series?

Clarence "Preacher" Hammond is very cute and sweet? (At least Mildred R. thinks so.)

Bula Reno certainly has Orville Downer under his thumb?

We're for you, Morgans?

THE DAYS OF JESSE JAMES

A Poem Dedicated To Calhouns

C—is for cowards who cookle and crow.
A—is for alasketer. They do need it, we know.
L—is for lunatics, of these they can boast.
H—is for hypocrizes of which they have a host.
O—is for onilons. They bring tears to your eyes.
U—is for the uproar that is going to rise.
N—is for nothing.
S—is for scrapes. How's this for a dirty dig?
—A Loyal Morgan.

The father of a Calhoun boy was passing through town last one Sat. and stopped by his son's boarding house to see him. Father (to the landlady): "Does Mr. Dempsey live here?"
Landlady: (with a sigh) "Yes, bring him in."

Mighty Morgans Crush Crummy Calhouns
In Two Consecutive Basketball Contests
M.L.S. Is Superior To Degraded Clan

Losers Are Outplayed In Every Department; Plenty Of Action Shown By Both Teams

The annual Morgan-Calhoun basketball series seems destined to leave the Morgans still on top. At least, the two opening games have proven that the Peacocks of Tray- forward, and Traylor, their efficient center, left the game almost at the same time. They were replaced by several points. They had gained the lead when the Morgans kept scoring.

Happening At The A. E. A.

Two hundred or more alumni, faculty members, and students gathered in the Continental Room of the Tutwiler Hotel Friday morning, Aug. 15. Among those present were county superintendents, principals of local schools, and teachers. Dr. Daugette presided, and he expressed appreciation for the gathering of alumni and students at the meeting. He stated that they had two hundred fifty students, and fifty students, with representatives from forty states. Mr. McClendon is taking up promotion work in connection with his promotional services.

Dr. H. C. Pannell and Mr. Hous- ton Cole, of the Education Depart- ment at the University of Alabama, and alumni of J. S. T. C. were among those present at the annual breakfast.

Dr. J. W. Abercrombie, former superintendents, principals and faculty and students of J. S. T. C. and Jacksonville High School, who is working on his doctorate at New York Medical College, and Mr. McClendon, are associated with the Gulfport College work, at Gulfport, Miss., a fashionable school for boys.

The yearbook of the Birmingham News, in a column, "Teacher Notes," included among those present were Dr. Daugette of the Jacksonville Convention, who presided, and said, "These conventions always intrigue me, not only do they allow us to see the city for a change and to enjoy the entertainments and busi- ness sessions at the convention," and Mr. A. A. last year, is a Morgan. Dr. J. W. Abercrombie, former State Superintendent of Education, of the Education Department, and the Rev. J. J. Re- wards, former pastor of the杰克- sonville Baptist Church.

The dinner menu consisted of grapefruit, ham, eggs, bacon, jelly, hot biscuits, butter and coffee. Miss Lea Green, a student, accompanied by Mrs. Coffee. The program consisted mainly of the showing of moving pictures of various activities at the college, campus scenes and the recent de- velopments in new buildings. Dr. Daugette offered appropriate com- ment as the pictures progressed.

The concluding feature of the program was the singing of "Alma Mater" and "Auld Lang Syne.

An Easter Greeting To:

All Morgans for being the top society of the year.

Lump Pits for her winning smile on last night when she was chosen Miss J. S. T. C.

Red Kemp for his outstanding personality, for his athletic ability, and for being the president of the Morgans.

Verona Newton and Red Jones for being chosen for the Morgans.

Ruth SANDlE for her faithfulness to "Snookie" the Calhoun.

Louise Bryant for her care of "Feet."

Gary Reagan for her friendly disposition and her ability to play basketball and for being the president of the Morgans.

Owen Moore for preparing the Morgans a winning debate team.

The Calhouns for really need our sympathy.

Chris Glass for being chosen as speaker for the Morgans.

Campus Courses

Now that reports are in we would like to see the listings on campus courses.

The Athletic Morgans

Aside from the fact that the Morgans have the best athletes who are eligible for participation in sports between the two societies, they are represented best in reference to college sports.

Let us take a peek:

Sam Bailey, star forward on the basketball team, and who ruled all A. A. last year, is a Morgan.

Seldon Gregg, the regular forward, is a Morgan.

"Bed" Kemp, who played almost every position on the team, is a Morgan.

"Brownie" Bailey, envious of his cousin's position, is a Morgan.

Cecil Lindley, the cool-headed forward for the second stringers, is a Morgan.

"Chicken Stew" McMichens, the lad of many talents, is also a member of the M. L. S.

Here we see that the Calhouns have not contributed one member to the basketball squad.

A backward glance will show that at least 60 per cent of the football squad, and 75 per cent of the baseball team of 1939 were Morgans.

Mr.和 Mrs. R. W. DAUGETTE, Jr., President MABEL SAMUELS, Secretary ALUMNI DEPARTMENT

callers at Daugette Hall Saturday afternoon were Mr. and Mrs. W. F. Gonce (Kitty Smith), of Scottsboro, and Mr. and Mrs. Charles Lee Smith, Anniston. Mr. McClendon, who is the president of the Jacksonville High School, Mrs. Gonce graduated at J. S. T. C. ten years ago. She was very much pleased with the improvements which had been made and commented at length on the new buildings.

Jacksonville alumni came in for their share of attention at the recent meeting of the A. E. A. in Birm- ingham. In a column, "Teacher Notes," in the Birmingham News, were the following comments:

Mr. McClendon is taking up publication work in connection with his promotional services.

Mr. Reuben Smith, principal of the Jacksonville High School, who is working on his doctorate at New York Medical College, and Mr. McClendon, are associated with the Gulfport College work, at Gulfport, Miss., a fashionable school for boys. He stated that they had two hundred fifty students, and fifty students, with representatives from forty states. Mr. McClendon is taking up publication work in connection with his promotional services.

Tying for the honor of high-score were Bennett (13) and it was tied again, this time in Kilby Hall.

The Morgans had lost the Red and Blue combination in the final quarter, but in Kilby Hall, they had acquired Mitchell, one of the star freshman players. "Red" Davis, and Royster. About all the Calhouns had lost was Coach Charles Simpson.

Both teams were fast, and showed the spectators plenty of action. Scores were kept more nearly even than in the first game. The Calhouns were securing heavily, but the Morgans gained a six point lead by the end of the first half.

The second period gave a thrill to the spectators. The Calhouns came back and played a much better ball game than they had previously played. Outscoring the Morgans, they had tied the score by the end of the allotted time. Fortunately, a field goal scored by Meharg just after the game ended, was too late to count.

The extra period was one of those which make the coaches turn gray. Bates scored a field goal for the Morgans, and was followed by Heard's doing the same for the Calhouns. Play continued with both teams making stabs at the basket until Mitchell followed a wild shot with a beautiful field goal from the side. The whistle blew shortly afterwards and the Morgans had won, 49-38.

Meharg, scoring 13 points again was high point man. Bates fell one short of his thirteen. Mitchell was high scorer. Heard played a good game at forward for the Morgans. Although Dibbs had only a few minutes to run he was good for a good game from his own position. Dibbs, (4) center, Meharg (5) and Wilson (6) center, were Calhoun subs. "Red" Davis (4) and Baker (6) and "Red" Jones.

Line-up: Calhouns: Meharg (13) and Wilson (2), center; Dibbs (4) and Bennett (6) and Royster.

In the second game, the Calhouns were again in the lead, 35-34, at the end of the second period. The Calhouns had the ball at the start of the third quarter.

The Calhouns were in the lead, 15-12, at the end of the first quarter. The crowd was hotly engrossed in the game, and the Calhouns took the lead back. The Calhouns were in the lead, 19-17, at the end of the second quarter.

The Calhouns were in the lead, 24-22, at the end of the third quarter. The crowd was hotly engrossed in the game, and the Calhouns took the lead back. The Calhouns were in the lead, 28-26, at the end of the fourth quarter.

The Calhouns were in the lead, 35-34, at the end of the first half. The crowd was hotly engrossed in the game, and the Calhouns took the lead back. The Calhouns were in the lead, 40-38, at the end of the second half.
