

New, Old Students Register For Work

FIFTH QUARTER STUDENTS HELD TEACHING POSITIONS THROUGHOUT ALABAMA DURING WINTER MONTHS

All through the years since Jacksonville, Alabama has been the home of the Jacksonville State Normal School and later the Jacksonville State Teachers College, men and women have been coming to school and leaving without ever seeing their former school mates or having any knowledge of their whereabouts or activities. In order to eliminate this forgetting and to create a closer knowledge and understanding among the students and former students of J. S. T. C., THE TEACOLA is publishing a list of the teachers who have returned to school for the summer. The names of the teachers and the places where they taught last year follow:

Charles Alexander, Chilton County. Beulah Allen, Ft. Payne City School.
Mrs. Lera S. Atkins, Opelika-first grade.
Eula Mae Austin, Randolph County. J. D. Baggett, Clay County.
Bessie June Bailey, Sipsey-second grade.
Alice Barganew, Walker County.
Glenn Bates, Milton Florida.
Ruth Battles, Union Grove.
Lucy Delilah Batts, Ripley, Lime-stone County.
Mary Belle Bean, Cooper.
Aline E. Bradford, Altoona.
Autice W. Briscoe, Somerville.
Mae Bretts, Central.
Harrison Brown, principal of elementary School.
Mary Seale Browning, Mechanicsville School, Anniston.
Ester Bryant, Hillwood.
Lester Bryant, Calhoun County.
Naioma Bryant, Nixon's Chapel.
Thelma Burgess, Saks Jr. High School.
Lois Burnett, Tallapoosa, County.
Robert Bryam, Livingston Jr. High.
Ray Caddell, principal, Fayetteville.
Mrs. Ferrell Cannon, Hubbertville, Fayette County.

Dr. John A. Davidson Conducts Revival

Dr. John A. Davidson is conducting a series of services at the First Baptist Church in Jacksonville this week. Each morning at 10:00 o'clock Dr. Davidson is speaking to the students, using the assembly room for the meeting. The evening service is being held at the Church, starting at 7:30.

Dr. Davidson is pastor of the First Baptist Church in Selma. Making a profound impression upon his congregation, he is accepted generally as a scholarly minister.

Dr. Ross Arnold, pastor of the Jacksonville Church, has been assisting Dr. Davidson in the services each morning at the college.

Local Guard Unit Inspected

Company H of the Alabama National Guard was inspected by Major E. H. Keltuer last Thursday May 8. The Major congratulated the company and Captain C. W. Dugette Jr. for the excellent showing made. Out of four Machine Gun Companies inspected by Major Keltuer, he said that Company H was by far the best he had seen.

Each man in the company received a personal inspection by the major who was especially complimentary upon the physical appearance of the men. He closed the inspection with a talk concerning the status of the national guard in the event of a national emergency and was very insistent that the members of the guard study organization and duties thoroughly in order to be better able to serve our great country in case necessity should demand it.

Dr. Felgar Lectures To History Club

The History Club met in Bibb Graves Hall last Wednesday night

CLASS PRESIDENT

Estes Hudson, from Hackleburg, Alabama, is one of the most popular students in school. Hudson has for the past three years been president of his class. He was captain of last year's football squad, and has been elected to serve in that same capacity this fall. He also stars in baseball and basketball.

Estes is sports editor of the junior edition of the Teacola, a member of the Morgan Literary Society, and prominent in other extra-curricula activities.

May Carnival Senior Dance To Be Given Promises To Be Gala Event

FESTIVAL TO FEATURE MAY QUEEN IN CORONATION CEREMONY WITH SONG, DANCE AND FLOWERS

Take notice, J. S. T. C. students! Something new is just around the corner—a May Day festival!

The Physical Education Department with Mrs. Calvert directing the staging and Mr. Shelton, the dancing, will cooperate with Mrs. Stapp and the Industrial Arts Department for the costumes and Mrs. Love and the Music Department for the music, in putting on the May Day Festival. Details for the

EDITOR

Lester Shipp was elected by his class as editor of the junior edition of the Teacola. Lester graduated from Crossville High School in 1934, and has held several positions in near-by towns between dates of attendance here. He is a "B" average student, a member of the Morgan Literary Society, and president of the Glee Club.

French Department Hosts To Visitors

Men's Glee Club Sings Over WAPI

The Men's Glee Club, directed by Mrs. P. V. Love, gave an interesting program of musical selections in Birmingham, Wednesday, May 8, over station WAPI. The Glee Club was accompanied by Jerry Reagan, pianist and Mrs. Lorraine Porch, soloist.

The boys who made the trip to Birmingham are: Aaron Hand, Earl Hollaway, James Kemp, Lester Shipp, Clarence Daniel, Claude Braswell, Leon Wigginton, Grady Elmore, Lloyd Gant, John W. Gant, Cecil Lindley, Cecil Bierley, Tom George, Levis Southern, Wiley Honea, Clarence McCord, James Thompson, Cecil Phillips, and Morrison.

MATERIALS HEAD

MRS. ETHEL POSEY
Mrs. Posey is head of the Materials Bureau at the Laboratory School. This is one of the most progressive departments of the school and Jacksonville is one of the few which have been fore-

GADSDEN HIGH SENIORS ARE ENTERTAINED BY DR. JONES' FRENCH CLASSES LAST WEEK

Dr. J. H. Jones, head of the French Department, and a group of his students, were hosts to the French class of the Gadsden High School last week. The guests were greeted by Dr. Dugette upon their arrival, who expressed pleasure that they should visit the college and giving them a cordial welcome to return.

The class was accompanied by the teacher, Miss Pearl Sawyer, Miss Mildred Shepherd, Mr. J. Gramling and Bob Miller.

The purpose of the visit was to see the French museum which Dr. and Mrs. Jones have begun and to witness the films which Dr. Jones made on his recent European trip. The pictures, in technicolor, show interesting and beautiful scenes in many of the countries of Europe, where Dr. Jones and his party spent three months last summer.

The students included in the party were: Anita Wootten, Eleanor Dollar, Martha Jean Gramling, Sarah Culberson, Anne Davenport, Catherine Hopton, Josephine Lister, Frances Lovins, Gertrude Neiger, Louise Nelson, Lydia Slade, Dorothy Reynolds, Mary Ella Saxon, Margaret Smith, Margaret Rogers, Dan Burns, Champ Blackwood, Dorothy Ann Trusler, Jeanne Parson, Jim Faucett, Lilburn Stephens, Thomas Mears, Don Harding, Louise Wofford and Lola Stancell.

Dr. Glazner Conducts Assembly Program

Dr. J. Frank Glazner, head of the Geography Department, was leader of the assembly program on May 6. He used a most timely subject, "The Influence of Geography on the Wars of Europe," as the basis for the quarter-hour entertainment.

Charles Johnson was the announcer and made appropriate

Bernard Hall, North Perry.

(See STUDENTS, Page 4)

NOTICE!

The senior edition of the **TEACOLA** will be published next week. We have reserved all of the items relating to commencement for that edition. A general program, however is printed here:

MONDAY, MAY 20

8:00 P. M.—May Day Festival.

TUESDAY, MAY 21

8:00 P. M.—Concert by Combined Glee Clubs.

WEDNESDAY, MAY 22

7:00 P. M.—Demonstration School Exercises.

THURSDAY, MAY 23

7:30 P. M.—Senior High School Pageant.

FRIDAY, MAY 24

7:30 P. M.—Senior Class Play—"Tommy"—Howard Lindsay and Bertrand Robinson.

SATURDAY, MAY 25

9:00 P. M.—Senior Class Dance (Admission by Card Only).

SUNDAY, MAY 26

11:00 A. M.—Baccalaureate Sermon—Rev. William Crowe, Pastor First Presbyterian Church, Talladega, Alabama.

8:00 P. M.—Joint Program Y. M. C. A. and Y. W. C. A.

MONDAY, MAY 27

9:30 A. M.—Meeting of Alumni.
11:00 A. M.—Commencement Address by Rev. C. C. J. Carpenter, Birmingham.

the members of the guard study organization and duties thoroughly in order to be better able to serve our great country in case necessity should demand it.

Dr. Felgar Lectures To History Club

The History Club met in Bibb Graves Hall last Wednesday night at 6:30. In the absence of the president and vice-president, Miss Isabelle Roper, secretary, presided over the meeting. The plans for a social were discussed during the business session.

Dr. Felgar continued his series of lectures on the present war in Europe. He used the Norwegian phase of the war for the basis of his talk for last Wednesday. He stressed the fact that planes played such an important part in the invasion of Norway. The planes were classified according to three types, bombing, fighting, and pursuit. Bombing planes carry the explosives so necessary to modern warfare and go along with the land troops. Fighting planes operate with the bombers and protect the bombers from the enemies' fighting planes. Pursuit planes have the longest range of the three war planes and usually operate behind the bombers.

Norway has a coast line of about 12,000 miles (that is, if the coast line were straightened out). This enormous coast line calls for a large fleet of warships.

The proximity of England and Norway is a very significant fact. It is a shorter distance between Norway and England than it is between Germany and England. Holland is practically the same distance from England as Norway.

A large number of Norwegians turned traitor and Germany had no difficulty getting into Norway through the most easily defended part of Norway. Now that Germany is in Norway, it is hard for England to pass through these key cities of Norway.

The outcome of the Norwegian invasion may mean an air raid on England. However, England may help Norway yet. As she realizes the importance of the strategic position of Germany at the present time.

As far as the status of Italy and Turkey in regard to the present war. Italy is looking out for her best interests, she is waiting to determine the winning side before she joins the fighting forces. Turkey is not well prepared for war, but she will keep faith with her allies. In September of 1939, Turkey made an alliance with England and France. This alliance was directed against Germany.

Mrs. Mabel Samuels, Bill Friedman, and Ruth Stockdale visited Ruth's mother at her home in Cambridge.

Something new is just around the corner—a May Day festival!

The Physical Education Department with Mrs. Calvert directing the staging and Mr. Shelton, the dancing, will cooperate with Mrs. Stapp and the Industrial Arts Department for the costumes and Mrs. Love and the Music Department for the music, in putting on the May Day Festival. Details for the May Queen and her attendants will appear in a later issue. The Physical Education Department will furnish both the theme and the staging for this carnival, but hopes that the English Department will furnish the theme for the next one, and the Physical Department the staging.

The May Day Festival will be the traditional mixture of song, dance, and flowers with the beautiful coronation ceremony.

Forney Hall Picnic

Last Friday night, May 9, the boys of Forney Hall gave a picnic at the gravel pit. The boys invited a number of girls from the dormitories and homes in town. It was indeed a happy crowd of young people who trudged, skipped and danced the mile or so to the gravel pit. Mr. Gary patrolled the area between the dormitories and the picnic ground to break up untoward romancing and loitering along the way. But, with the exception of Bismark Evans, Audley Bruner and Arthur Decker, the boys all arrived unscathed.

The menu consisted of: Baked success by everyone present. There were also many compliments upon the skillful manner with which the gracious host, Mr. Gary, received and entertained the guests.

A delightful lunch was served as the happy lads and lassies sat around a roaring bonfire.

The menu consisted of: baked ham, baked apples, tomato sandwiches, pickles, hot rolls, iced tea and ice cream.

The committees in charge of the picnic were—Social Committee: James "Red" Kemp, Wayne Jones, and Ernest Bell.

County Clubs Formed Government Class Visits Polls

County Club organizations are being organized at J. S. T. C. under the supervision of Mrs. W. J. Calvert and Mr. Roy Shelton of the Physical Education Department. Tuesday evening, May 14 from 7:00 to 8:00 a review of county activity groups will be presented in the gymnasium.

During the first six weeks of the summer term a one-act play tournament will be given. Students from each county will be asked to write and present a one-act play. This has promise of being one of the outstanding events of the summer quarter.

outstanding social event of the school session, will be given in the gymnasium of the new physical education building, May 25, from 7:00 to 9:00 p. m. Music will be by the Auburn Plainsmen.

The decorating committee, composed of Sadie Baswell, chairman, Ann Garst, Myrtle Parsons, Lillian Williams, Helen Barnes Wilson, Lionel Worthy, and Bismark Evans, is preparing an attractive setting for the occasion. The gymnasium will be dressed to represent a rustic garden, where the guests will dance among climbing vines and flowers under a myriad of gay lanterns and a huge mellow moon.

The invitations are ready for mailing, and everyone wishing to attend the dance is urged to secure his bid at the earliest possible moment. Admission is by invitation only, and all programs will be made so that out-of-town guests will not be inconvenienced by having to get their programs filled before their arrival. Since the dance will begin promptly at nine o'clock, everybody is encouraged to come a few minutes early in order to get his program arranged before the music starts.

The Senior Class was fortunate in securing the Auburn Plainsmen, the newest band at Auburn, to furnish the music.

Roy Shelton Added To College Staff

Dr. C. W. Daugette has announced the addition of Roy Shelton to the faculty of the Physical Education Department for the latter part of the spring quarter and the summer quarter.

Mr. Shelton, who is a Rural Staff Member of the National Recreation Association and who is working with all extension staffs, will direct a program of recreation on the campus, in addition to his regular class work. For his class work he uses his own manual, Rural Social Recreation. He holds the B. A. and M. A. degrees from Howard College and is working on his Ph. D. at Columbia University.

Government Class Visits Polls

Taking advantage of the Democratic primaries, members of Dr. Cayley's Government classes visited the polls in this and joining counties to observe the procedure of an election.

They reported that the judges and clerks conducted very efficiently the polls visited, and in most instances they adhered strictly to the laws governing elections.

The government classes are, perhaps, the most active body on the campus. They are going to Montgomery, May 13, to study state administration.

MRS. ETHEL POSEY

Mrs. Posey is head of the Materials Bureau at the Laboratory School. This is one of the most progressive departments of the school and Jacksonville is one of the few which have been foresighted enough to establish such a department. Mrs. Posey has given the bureau her entire time since last Fall and has accomplished a great deal.

Tea Is Given For The Senior Class

The Faculty Wives Club at the Jacksonville State Teachers College entertained at a tea Friday afternoon, honoring members of the graduating class at "The Magnolias," home of Dr. and Mrs. C. W. Daugette.

The home was thrown en suite and was decorated with iris and Spring garden flowers.

Mrs. C. C. Dillon greeted guests at the door, and Mrs. H. B. Mock introduced them to the receiving line, composed of Mrs. Rutledge Daugette, Mrs. J. G. Austin, Mrs. L. W. Allison, Mrs. C. E. Cayley, Mrs. J. M. Anders and three officers of the class, James Kemp, Douglass; Alice Hamric and John F. Waters, Jacksonville.

Mrs. R. P. Felgar, Mrs. Reuben Self and Mrs. Kenneth Garren directed guests to the dining room. Mrs. W. J. Calvert served the cream and Mrs. Horace Lee Stevenson poured coffee. The dining table was overlaid with a lace cover and centered with a silver urn of purple iris. The college colors of purple and white were carried out in the refreshments and decorations.

Members of the senior class are Martha Lowell Barnard, Arab; Sadie Zackie Baswell, Pell City; Estelle Burnham, Piedmont; Lanier Cowart, Montgomery; Edwerta Carpenter, Jacksonville; Terah Turner Casey, Locust Fork; Theodore R. Claborn, Boaz; Katherine Conyers, Gadsden; Lloydene Franklin, Samson; Ruth Green, Wedowee; Lillie Marshall Hinds, Albertville; Elizabeth H. Lamar, Oxford; Mary Lucy Livingston, Piedmont; Maude R. McClinton, Choccolocco; Dimple E. Marsh, Arab; Zula Nash, Arab; Ethel Grace Rosser, Blountsville; Grace Scruggs, Albertville; Daisy H. Spearman, Anniston; Edith Lynn Street, Gadsden; Norman Tant, Carrollton, Ga.; John Garland Tyler, Anniston; William Theron Vick, Fayette; Sarabel Walker, Wedowee; John F. Waters, Jacksonville; Thomas P. White, Birmingham; Annie Mae Willard, Gadsden; Helen Ruth Wilson, Piedmont; Veta Word, Gadsden.

Assembly Program

Dr. J. Frank Glazner, head of the Geography Department, was leader of the assembly program for Monday, May 6. He used a most timely subject, "The Influence of Geography on the Wars of Europe," as the basis for the quarter-hour entertainment.

Charles Johnson was the announcer and made appropriate comments about the musical numbers rendered by Mrs. R. K. Coffee and Mrs. Loraine Porch. Mrs. Coffee played the Finnish composition, "Finlandia", by Sibelius, and Mrs. Porch sang, "The Roses of Picardy" accompanied by Mrs. Coffee.

Dr. Glazner spoke briefly of the geographical influence on European wars. He stressed the fact that Germany had no natural barriers; therefore, she had to build a network of railroads in order to transport troops to her frontiers at a moment's notice. Dr. Glazner also stated that France's Maginot line was impregnable only because of its relation to the rolling hills of that section of the country.

W. R. A. Sponsors Barn Dance

The W. R. A. sponsored a Barn Dance Saturday night, May 4, in the new gym. The auditorium was decorated in a rustic manner with wild flowers, pines and honeysuckle. Coming from an improvised barn could be heard the old-fashioned swing music furnished by a four piece orchestra. The large circle of gayly dressed dancers followed the figures of the square dance called by Aaron Hand and Earl Hollaway. New steps were introduced by Miss Allan and Mr. Shelton. During the dance, cold drinks were served by waitresses dressed in black and white.

Miss Rosa Horton, N. Y. A. supervisor will spend the week-end at her home in Evergreen.

TRIBUTE

To the regular staff of the Teacola, and to everyone who contributed to this Junior edition of the school paper, this word of thanks and appreciation is given. Without the masterful aid of the editor, Ted York, and all the regular staff of writers this issue would have been much more difficult for the Juniors to publish.

On behalf of the Junior class and the special Teacola staff, I wish to express our deepest appreciation for this excellent assistance.

Lester Shipp
—Editor of Junior Edition.

EDITORIALS

What Now, Democracy?

As we in America watch with dismay the ease with which the dictatorships of Europe surpass the democracies in diplomacy and in war, it is high time that we turn our eyes inward, and ask ourselves searchingly the question, "What is the matter with democracy?" We have had editorials enough on the superiority of democracy, as an abstraction, over autocracy. In the actual world, the autocracies have won triumph after dazzling triumph, and the democracies of England and France, pathetically, remind us of old, rich men, tired and bewildered, unable or unwilling to take the initiative, and uncertain what is to happen next. The one quality that Nature respects is strength; the one sin that she never forgives is weakness. No amount of sentimentalizing existence can get us over that cardinal truth. What are those necessary qualities which the dictatorships possess, but in which the democracies, including our own, seem weak?

- First, discipline.
- Second, initiative.
- Third, faith.

First, discipline: We have been passing through an era of "self-expression". We have been concerned with individuals, their whims and eccentricities, their divine right to be different—or to be spoiled—at all costs. The child rules the home; the child, in advanced education, runs the school; our very civilization threatens to be run by a succession of child-generations, each of which abdicates control immediately on reaching an age when it has some idea of what all is about. Nor do we grant opportunity for the discipline of Facts. The shiftless farmer goes on relief; the incompetent worker, into WPA; the improvident aged receives old-age insurance. The government has been forced, by circumstances that overcame the strong as well as the weak, to take measures that can but encourage thriftlessness and laziness. The dictatorships have also expended money wholesale; but they have demanded effort and sacrifice in return for gifts.

Second, initiative: We credit the theory that obedience can be passive only, that to follow the leader is to lose imagination and will. Germany's brilliant campaigns in Poland and Norway testify to the imaginative capacity of her leaders; and the daring of her submarines and her mountain climbers, to the dynamic mood in which her people live. Germany's advantage is that such initiative is called forth, as in a well-disciplined football team, when it is needful to the benefit of the whole.

Third, faith: The German obeys and dares because, by whatever method, he has been led to believe, that his own people are the chosen of God.

Current Science

By DR. KENNETH GARREN

BIOLOGICAL CONTROL

Man's Struggle Against His Enemies.

Man, in his struggle to exploit his environment, frequently finds it necessary to either control or eradicate certain other living organisms. Thus man's battle with the insects and the fungi is constantly taking new turns.

Dr. Garren

In most cases man depends entirely upon the ingenuousness of his own creative ability in his attempts to destroy his insect and fungal enemies. Man discovers certain sprays to keep pests away from his cultivated plants, antiseptics to kill bacteria, and poisons to rid the soil of destructive fungi. Sprays, antiseptics, and poisons are, for the most part, rather expensive. Furthermore, being man-made, they are quite often somewhat ineffective. As a result it sometimes looks as if man will lose the battle with his biological enemies in spite of all his efforts.

The Basis of Biological Control

Some seventy years ago the great French scientist, Louis Pasteur, discovered that agencies other than man sometimes fight man's enemies. This discovery has been broadened until we now know that every living thing, no matter how destructive or how obscure, has some natural living enemies. The fleas on the dog's back have minute mites to irritate them. Fungi which decay roots of plants in turn are frequently decayed and destroyed by other fungi in the soil. Man's favorite pest, the insects, are preyed upon by a great host of other pests. Birds, reptiles, and amphibians all eat insects. Insects themselves prey upon each other. Many fungi invade the bodies of insects and cause widespread death of certain groups. Insects are also subject to a great many bacterial diseases.

Early Practice of Biological Control

It occurred to several progressive scientists a great many ages ago that the simplest and most effective way to control some pests would be to discover the natural enemies of these pests and then introduce them into the area where the pest is prevalent. Everyone is familiar with the introduction of birds into certain areas for the control of insects, or the long-range transportation of one insect to control another insect. Even the familiar practices

WOOD NOTES

Clara G. Weishaupt

Among the showiest of our wild flowers are the Evening Primroses. Just now large patches of the pink one can be seen in bloom in fields and along roadsides. Later the bright yellow ones, called Sundrops, will appear in fields and woods.

Not at all common but very interesting is the Walking Fern. It may be found growing on the surface of a rock where there is a little soil. Its leaves, which are heart-shaped at the base and one-half to one inch wide there, taper in a long slender ribbon as much as six inches long to a tip. This tip roots and a new fern plant grows up a few inches from the old one. In this way the plant spreads.

Perhaps no other American shrub is more beautiful than the Mountain Laurel just now coming into bloom. Although this plant is evergreen, the young shoots were frozen this spring and probably the flowers will be less beautiful than usual because of this injury. An interesting feature of the flower of this plant is that the end of each stamen fits into a little pocket in the petal when the flower first opens.

The flat-topped clusters of small white flowers are just appearing to the Maple-leaved Viburnum. As the name indicates, the leaves of this shrub are somewhat like those of the red maple both in shape and in arrangement on the stem. A relative of this plant with similar flower clusters but with unlobed shining leaves and rusty petioles is the Black Haw. It, too, is in bloom now.

One of our most beautiful trees is the Tulip Tree. The appearance of the large greenish-yellow flower held erect at the end of the twig suggests that of the tulip. The buds of the tree are interesting and characteristic. Two large spoon-shaped scales envelop the bud within which is a small leaf fully formed and another small bud. When the bud has opened the scales become stipules.

Life Is What You Make It.

Life today is what you made it by the seeds that you did sow; You may now want something different,

But your deeds have made it so. Try to make tomorrow happier By the things you do today. Then your conscience will not hurt

Ye Olde Gossippe!

We have always heard that the mystic and unknown are breeders of fear. It is with this in mind that we attempt to tell all we can in this column. Know the truth and if it doesn't get someone in trouble, then it shall make you free.

We state quite positively that the NORTON and READ affair is at a new, all-time low ebb. Some fellow from Gadsden has something to do with it. Good luck, THOMAS, because you'll certainly need it . . . Latest advocates for an open-at-night library are WANDA LEE B. and ARMON T . . . LEE HARRIS is not visiting the Apartment Dormitory now; reason, a dog that bites . . . BELTON MASSEY is still looking for his ideal girl . . . MINNIE ABBOTT is all smiles over a card from Birmingham.

Now that MAX DAVIS is no longer a resident of our fair city, SARA FRYAR has turned all of her attentions towards local talent, namely, "SEE-MORE" WEST . . . ED COLVIN has asked us to announce that he desires a sweetheart. ED has named May 21 as a dead-line for applications . . . LOUIS BATES gave us some right good "dirt" on MR. RIDGEWAY and another fellow, but we just can't remember it. It will probably be told in the next issue . . . LUMP alias "TWO-DATE" PITTS may not have as her motto "WINE, WOMEN, and SONG," but it certainly is "MEN and SONG"; that is, she sings her boy friends a merry tune . . . "FEET" DENDY came to see what we had been led to believe was his best girl, and on the second evening of his visit, LOUISE BRYANT gave him the "air". There must surely be "a dead cat in somebody's wood-pile" . . . "RED" JONES says that it will just be too bad if we print anything concerning him. "RED" went on to say that VERONA might believe what we print. The young lad from Jackson County must have a guilty conscience . . . LAUDERDALE and COX and GOGGINS and BODINE make a lovely quartette . . . CAT GERMANY and NORMAN TANT went fishing together. It may be that they have a common interest in fish, or it is possible that "ye olde bug" has bitten.

GRANDE FINALE: EFFIE HOLLINGSWORTH—enough to end anything.

For Men Only

Ah, tis Spring! and young man's fancy turns lightly to love—or is it lightly? Really, there should be some subtle—or otherwise—warnings to our young men on the J. S. T. C. campus. I'm the person to do just that thing. Now, my chickadees, lend your ear, and please don't interrupt. Shh!

We'll all admit that these J. S. T. C. co-eds aren't what some people would call "campus flirts", but they like to have fun—sometimes at your expense. Even Mrs. Pitts said, when asked about controlling her girls, "Oh, they're all just fine girls. I never have any trouble—except sometimes in spring, when their thoughts turn to love." But she doesn't take their love affairs seriously, so why should you? I'll probably find a brick, with a fire-cracker attached thrown in my window by some female de-mirer. Just consider that, boys, I'm risking my neck, just to save you from a lot of heartaches. If you, in spite of my gentle warning, find it impossible to resist the spring love-light—the moon's silvery light filtering through shadowy trees to make a little co-ed's head a shining halo and her eyes dark, limpid pools, and a light kiss—if you can't resist, declaration of love desire

A Junior's Theme Song

He can live without purpose
 Live without man
 Live without dreaming
 Live without land.
 He can live without pleasure
 Live without fame
 Live without hope,
 Live without gain.
 He can live without romance
 And live without knowledge
 But gosh—It's hard
 To do without J. S. T. College.

cial heart balm. Directions for application will accompany the balm.

aged receives old-age insurance. The government has been forced, by circumstances that overcame the strong as well as the weak, to take measures that can but encourage thriftlessness and laziness. The dictatorships have also expended money wholesale; but they have demanded effort and sacrifice in return for gifts.

Second, initiative: We credit the theory that obedience can be Germany's brilliant campaigns in Poland and Norway testify to the imaginative capacity of her leaders; and the daring of her submarines and her mountain climbers, to the dynamic mood in which her people live. Germany's advantage is that such initiative is called forth, as in a well-disciplined football team, when it is needful to the benefit of the whole.

Third, faith: The German obeys and dares because, by whatever method, he has been led to believe. Our multitudinous editorials on the superiority of democracy do not indicate so much faith, as the sub-current fear that another, foreign faith threatens our own. It may indeed be asked, Do we really believe in democracy? We are fond of the name, and fonder of democracy's pleasantness and ease. But are we willing to think ahead, to plan, to make present sacrifices, before, like England and France, we are too late forced into action? Rather than believe in it, do we not take our democracy for granted?

These, the dictatorships' strengths, are our weaknesses. Why have we, in a generation or two, relinquished those very virtues in which we thought ourselves to excel? What is the Mephistopheles that has led our nation astray?

Our fundamental weakness is that condition of which we are, nowadays, most vocally proud: We are the wealthiest nation in the world. We conquered, not long ago, a rich domain to use and squander, and use and squander it we have done to perfection. Our parents mined our riches from our earth; we sit back and enjoy. We display the characteristics of spoiled and wealthy children: We prefer spending to getting; we like to "express ourselves" regardless of the costs; we dislike and rebel against criticism; we choose the path of least resistance; we try to skirt and ignore the laws of cause and effect in human action and character. In a peaceful world, maybe, we could take advantage of our patrimony with safety, and remain spoiled to the end of our resources. In these troubled times, we must look to it that wealth so quickly accumulated may not as suddenly be snatched away.

Thank God!

In all of Europe, there is intense fear among the populace of certain nations that their country will next become engaged in what seems likely to develop into the most destructive and terrible war in the history of civilized man, or there exists a passive emotional acceptance of the fact that their country is already involved in conflict. Hate, grim determination, distrust, grief, and pain torture those unfortunate individuals whose destinies are ruled by the God of War. Small, would-be neutral nations are being devoured to appease the appetite of Mars; there is no complete safety for any nation or people. Young men, potential scientists, statesmen, lawyers, doctors, poets, are giving their lives for what cause? Bombs fall from the sky to murder unarmed and defenseless women and children. Why? Metals, raw materials, and supplies that might be used, if times were different, for the advancement of civilization and for the comfort of human beings, are being blown into myriads of irreparable bits. Why?

We have asked questions and we shall not even try to answer them. We are not attempting to say who is in greatest fault in the present World's War, nor are we advocating "peace at any price" for the United States. But as long as our present status is maintained, let us, as Americans, stop long enough to appreciate our position. Thank God that American youth can attend colleges and professional schools to prepare themselves for the more abundant life! Thank God that none of our citizens are falling before shells and bombs! Thank God that lights, which have become symbolic of liberty and freedom, burn as we desire at night!

Let's be thankful that we were born Americans, rather than Europeans.

An Example

Last Monday in assembly the Rev. Mr. Parkman gave a brief, yet very timely address on a subject which should have caused every student that was present to think very profoundly. He used as his theme, "The Influence of an Example", and to us it seems that such a subject would fit no audience better than one made up of teachers and teachers to be.

Now, in a short paragraph let us see just why the setting of a good example should be so particularly significant in the careers of school teachers. Briefly let us consider the role of the teacher in moulding the destinies of children. Under the present set-up of American society, it seems logical to assert that no person, outside the parent, has more influence upon the life of the developing child than the teacher. Every day there stands out in every classroom in America an example which is copied by children who enact often unconsciously. Fortunately these examples are usually good, but in case one teacher happens to fail in setting his good example as a standard, many innocent children are in danger of acquiring a wrecked disposition for life.

Therefore, it certainly should behoove us all to strive to make our lives living examples of the best, physically, mentally, and morally. For, after all, actions may speak louder than words.

scientists a great many ages ago that the simplest and most effective way to control some pests would be to discover the natural enemies of these pests and then in the area where the pest is prevalent. Everyone is familiar with the introduction of birds into certain areas for the control of insects, or the long-range transportation of one insect to control another insect. Even the familiar practices of inoculation and vaccination are types of biological control.

Recent Practice of Biological Control.

At the present time experiments are going forward which will lead to even more wide-spread use of biological control.

For example, we now know that dumping off fungi which are so destructive in seed beds and vegetable gardens may be destroyed by inoculating the garden soil with a culture of another fungus destructive to the damping off type. As soon as the method of inoculating the soil is perfected these cultures of anti-damping-off fungi will be placed on the market for general use.

Further, the discovery of a fungus disease deadly to the Japanese beetle has given renewed hope of controlling this very destructive importation from Japan. This fungus can be grown in the laboratory and then beetles caught and infected with the fungus. When turned loose these infected beetles will carry the disease to other beetles, and, in some cases this results in

Life Is What You Make It.

Life today is what you made it
By the seeds that you sow today:
You may now want something different,

But your deeds have made it so.
Try to make tomorrow happier
By the things you do today.

Then your conscience will not hurt you

When you hear somebody say:
That life is what you make it

What you sow, that must you reap.
So let's sow good things for harvest

Lest we grieve, and sob, and weep.
Speak the words that should be spoken.

Do the things that should be done.

Acts of kindness, deeds of mercy,
Will be good for everyone.

So let's all be close observers
Of the needs of neighbors, friends.

And be lenient with opponents;
So may life with joy blend.

—Catherine Wicks

complete destruction of the beetles in a given area. Since the Japanese beetle is one of the most destructive insects known, the discovery of this new disease of the beetle is of great importance.

It seems that as man studies nature he finds that nature can usually improve upon man's method of doing things. Certainly nature controls pests in many cases more effectively than man.

Friendliness

When a newcomer arrives in Jacksonville, he is impressed with the prevailing friendliness of the people with whom he comes in contact.

The spirit is so manifested that the student will in all probability write home complimentary accounts of the people's cordiality.

However, this does not always last. One very intelligent young man made this remark: "Oh, yes, everyone speaks to you, but I find that this is as far as the spirit goes with many. They don't try to enter into a friendly conversation or lend a helping hand to the ones who need it most. Some students have for no reason a feeling of superiority."

Don't you think that it would be well for each of us to consider this man's opinion and see if we have the real spirit or just "from the teeth out"?

Library Opens At Night

A great stimulus for more studying, we think, is the opening of the library at night. Instead of the usual groups one sees lolling around the dormitories just after supper, one now sees groups of students cheerfully wending their way to their new-found sanctuary, the library. By 7:15 each night, the spacious, well-lighted, comfortable reading room has begun filling with—of all things in the springtime—students who are bent upon extracting knowledge from the ample supply of books in the J. S. T. C. Library.

The student body as a whole is deeply grateful to Mrs. Wood and Dr. Daugette for making possible the added advantages of the library's being open at night. The students are thus given more time for play as well as for work, because those interested in athletics have time in the afternoons for playing tennis, baseball, swimming, etc., without the guilty feeling of their library work's not being done as a result. It is our opinion, also, that the fact that our library is open at night gives the student body a feeling that they are trusted and gives birth to a determination that that trust will not be betrayed.

The majority of the student body seems to be taking advantage of their added time. Since the library opened a week or two ago, it has been full almost every night, and, indeed, the number there seems to be increasing each night. As a result, our industry will almost certainly be rewarded with pleasantly surprised parents when the next reports go home.

cracker attached thrown in my window by some female de-mirer. Just consider that, boys, I'm risking my neck, just to save you from a job or heartaches. If you, in spite of my gentle warning, find it impossible to resist the spring joy-light—the moon's silvery light filtering through shadowy trees to make a little co-ed's head a shining halo and her eyes dark, limpid pools, and a light kiss—if you can't resist declaration of love, desire, adoration and what-not, just call at De-romancion's Store for our spe-

Forney Hall News

With Daylight Saving Time in effect and the warm spring nights here, our "Romoes and Juliets" should enjoy life better.

Downing Cowden has presented a problem for the farmers concerning Daylight Saving Time; that is, how is the farmer going to move the rooster's crow up an hour? Downing, we believe the capture of Hitler would be a feat much more easily accomplished.

Several of the dormitory boys visited homefolks over the week-end.

A couple of our "heart-breakers" from Forney seem to have their wires crossed at the department dormitory. Edith, why don't you untangle things for them and be done with it?

Mr. Funderburk and several Forney Hall boys spent the day at Cheaha Park Sunday where Mr. Funderburk served them a delightful picnic lunch.

Mr. Gary and the dormitory boys, along with their girl friends, enjoyed a bountiful feast at Forney Hall picnic held at the gravel pit Friday night. We hope that the other dormitories represented will remember the occasion well enough to give a picnic and invite us.

Daugette Hall News

We are glad to have Mrs. Stapp, who has been added to the college faculty, back in the dormitory.

We regret that Miss Norma Plunkett has left school. She will be greatly missed on the campus.

Last week-end—being Mother's Day, found many girls checking out for home. Among them were the following: Sallie Kate Wester, Myra Gilliland, Chris Glass, Barbara Hodges, Ruth Sandlin, and Ethel Floyd.

Who is the new little lady in Daugette Hall who entertains Edwin Davis while he works? What do you say Cecilia?

There's one thing about it, the girls in Daugette Hall will not be afraid as long as Dr. Clara is body-guard.

Mrs. Pitts says she has very good housekeepers at the dormitory even if the rooms are a wee bit smokey.

We wonder what Louise Bryant is going to do with the little Preacher this week-end since there is going to be pattering of "Feet".

We believe that Willie Landers' trip to Anniston Saturday was for something other than shopping. What is the big attraction, Willie?

Quote, "If we can't go to town, we can play tennis," Sallie Kate Wester and Kat Fleming.

Ray Coefield has an eye for business. He picks a senior for his wee-a-day girl (eh, Willie) and a blonde for his week-end girl.

The social for Daugette Hall will be a picnic at Oxford Lake Friday night. A gala time is anticipated. You had better play up to Daugette girls, boys, so you will get an "invite".

A big race is now on between George Dockins and Denson Allen—Luck to you both, boys.

Mrs. McDonald Entertains Student

One of the loveliest social events occurring recently on the campus was the barbecue dinner given by Mrs. Sarah Meadors McDonald for her student teachers. The dinner, served in the home economics department in Hames Hall, consisted of delicious barbecued chicken, slaw, celery, carrots, potato chips, pickles, hot buttered rolls and coffee.

After the meal the guests retired to the new dining room and talked and danced.

Those enjoying this gracious occasion were Mrs. McDonald, the hostess, Sadie Baswell, Sarah Lynn Ogletree, Helen Barnes Wilson, Norman Tant, Tom White, Aaron

Clark Gable and Vivien Leigh in "Gone with the Wind"

This great picture will be shown at the local theatre Monday and Tuesday, May 20 and 21, and the Teacola recommends it very highly. Your time and money will be well spent if you see "Gone with the Wind."

Apartment News

Misses Elsie Parrish, Janell Elrod, and Erna Gilliland accompanied Misses Allene and Myrene Oliver to their home in Joppa for the week-end.

Miss Hilda Dean Williams visited her parents last week at Williams. Miss Clara Otinger spent last week-end at her home in Boaz.

Miss Ruth Horton has had as her guest Miss Ruby Horton of Guntersville.

Miss Alice Rowland has her sister as her guest.

Mrs. Sedell Williams' husband was a recent visitor here.

We regret to see Mrs. Grady Elmore leave us for her home.

Thelma Norton was a recent visitor in Anniston.

Mary Ann Broughton visited in Wellington last week-end, with Geneva Carson as her guest.

Imogene Yates was a recent visitor on the campus.

Mrs. Paul Small had her father and mother as her guests last week-end.

Miss Gladys Lipham visited her aunt in Anniston last week.

Mrs. Small visited her sister at Lincoln recently.

The apartment girls enjoyed a pleasant picnic at Oxford Lake last Friday night.

Coach and Mrs. Dillon, Patty and Bob, also enjoyed the outing.

E. C. Fincher visited her home

Weatherly Hall News

—Did You Know—

That Weatherly Hall has more of the former students than any other dormitory on the campus.

That Selena Mae solved the situation for the library staff.

That Liz Adams is a walking Information Bureau.

That Glenda and Louise dislike company after the lights are out.

That the glint in Ostelle's eyes grow brighter as the days go by.

That Sara Bell is seeking a job with Uncle Sam, or is it one of his employees?

Bealon Smith, Beatrice Couch, and Ganell Crawford came to us from Florence.

That Betsey June Bailey continues to be our bell. (Don't spell with e)

That Onieda and Madeline have been cramming for the campus courses. Is it exam week, girls?

That Ann Garst is the most original girl in the dormitory. If you don't believe this statement, attend the Senior Dance, May 25.

That K. Smith carried a Shipp to the Showboat Dance.

That Germany creates as much noise as Hitler.

That Heavyweight Burk has many problems to solve these days.

That the freshmen have had one square meal—the night they ate with their knives.

That Effie has everything in Hand.

That Miss Horton prefers her music after breakfast and not before.

That the girls gave Mrs. Davis a hearty welcome when she returned Sunday.

That Mrs. Frost made an excellent matron in the absence of Mrs. Davis the past week.

That Freshman Goggans has fallen for Romeo Bassett.

That it has been decided that "Toots" White is worthy of the cause.

That wee Cathon Carter attracts the high school set.

That we sponsored a Showboat Dance.

That last but not least we don't like Daylight Saving Time.

We Ask—

What couple in the Apartment Dormitory is secretly married?

Who will win the triangle battle of Little, Freeman, Honea?

How long will Louise L. hold her new boy friend?

What tall Anniston blonde has "Shakespeare" around her finger?

What two girls find it heaven to sit in an A-model and gossip?

Why Dr. Calvert likes to see people blush?

Why is Brisco always called

Evelyn Espey is a very popular young lady now serving as secretary and treasurer of the junior class. Her home is in Jacksonville, Alabama. Evelyn is a member of the Morgan Literary Society, and very prominent in extra-curricular activities. She also has a great scholastic record to be greatly admired.

The Apartment Girls Wonder Why—

Thelma Norton doesn't mention Thomas any more?

Shirley McKinney is so crazy about Jerry?

Someone doesn't tell Connie Blackwood and Paul Brown that they would make a perfect pair?

Hilda Dean Williams and Tuerman Wilson called the whole thing off?

Myrene Oliver suddenly took a new interest in life?

Edith Cox keeps Denson and George guessing which is uppermost in her favor?

Alice Rowland returned the ring but kept the picture for her collection?

Mavis Pruet is waiting so long to march to the altar?

Jimmie Parris Williams lives only for week-ends?

Wilma Anderson is always so anxious to meet the postman?

More boys haven't fallen for Gerry Reagan's sweet personality?

Evelyn Vines isn't interested in Bassett?

Rob Pearson decided to come to summer school?

Eva Jane Carpenter wants to go to Auburn next year?

Varona Newton and "Red" could wait so long to end single-blessedness?

We can't stay out later because of Daylight Saving Time?

Excerpt from the diary of Lewis

Dr. J. F. Glazner, head of the geography department, has proven very valuable to the junior class as faculty adviser with his constructive criticism and loyal cooperation with the class. Dr. Glazner has made an intensive study of geographical and social conditions of this state and his book, "Geography of the Great Appalachian Valley of Alabama" has been adopted as a text book in the college. He is a great conservationist and has done much to encourage the conserving of our natural resources.

Apartment Picnic

Friday night, May 3, the girls of the apartment dormitory gave a picnic at Oxford Lake. The girls planned and prepared a delicious supper consisting of sandwiches, cakes, and cold drinks.

Mrs. Baswell, matron of the apartment, and Coach and Mrs. Dillon chaperoned the outing.

Everyone reported a good time even though the ride back in the open truck was rather cold.

E. C. Fincher visited her home in Anniston recently.

We miss Miss Calhoun who has gone home for the summer, but we gladly welcome all the newcomers.

We want to know what the rest of you are enjoying.

Sky Pictures

When twilight settles over weath-erly Hall
 And the cares of the day seem heavy and deep.
 Nature then gives us a lovely sky picture
 Patterned by the sombre chimney sweep.
 They came by the hundreds, even thousands
 Without compass, map or guide
 Weaving patterns that would puzzle the artist
 Or designer, practiced and tried.
 First the pattern is a circle quite simple
 Then geometric and unique
 A flutter, then a swoop for the chimney.
 Forgotten is the chimney sweep.

Laboratory School Children Write

(Editors Note: The following three articles were written by children in Mrs. Birdie Lee McClendon's fourth grade room. They are here by request.)

THE PILGRIMS FIRST HOME

Mrs. McClendon's fourth grade had a play. The name of it was The Pilgrims First Home. The fourth grade put the play on April 3, 1940 in Kilby Hall. The audience enjoyed it very much. The characters were Nancy Harper, Bobby Joe Robinson, James Martin, James Reid, Thomas Shelton, Helen Snider, R. B. Ray, George Wilkerson, Charles Hammet, Richard Strong, Betty Kimberly, and Edith Bragg.
 By Nancy Harper

THE GIRL FROM NEW YORK

Miss Constance Peck started to Jacksonville School April 5, 1940. She came from New York City, N. Y. She is nine years old. Mrs. McClendon's boys and girls like her very much. She is going to tell us about New York City. Constance Peck said she likes to come to Jacksonville School. She is smart in her lessons.
 By Martha F. Snider

NEW BOOK SHELVES

Mrs. McClendon's fourth grade has some new book shelves. They were made March 17, 1940. The carpenters made them. They painted the book shelves red and yellow. The carpenters put twenty-one shelves in them for books and there are not enough books to go in the book shelves, but we do have some books in the other shelves.
 By Hayward R. Wynne

Rob Pearson decided to come to summer school?
 Eva Jane Carpenter wants to go to Auburn next year?
 Varona Newton and "Red" could wait so long to end single-blessedness?
 We can't stay out later because of Daylight Saving Time?

Eagle-Owls Win Three, Tie One, Lose Three

During the past two weeks, the Jax baseball team has played a total of seven games; they have tied one, lost three, and won three.

The first encounter was with Bemiston, and the final count ended in a 9-9 deadlock. The next four games were played on a road trip against Livingston and Marion. Livingston won both frays, with the final count being 12-5, 5-3; Marion split with the local lads, 7-6, 7-1.

In two games played last Friday and Saturday against St. Bernard. The Eagle-Owls won both contests. The scores were: 10-6 and 8-7.

Complete box scores for all seven games are printed below:

Baseball Roster Includes Stars Of High Caliber

The J. S. T. C. baseball team is made up of players that are well qualified for their positions. Some of them have played with fast semi-pro teams throughout the state. Carl W. Stewart, our shortstop, is a veteran of several years of semi-pro ball. Estes Hudson is playing his third year with the Eagle-Owls. Thomas P. White is still the hustle of the team behind the plate. In Brooks, the rookie sensation, Bell, Adams, and, Lyles we have one of the best pitching staffs that has ever worn the "monkey suits" for Jacksonville. Many of the first year men will develop into fine ball players. A winner within itself.

BASEBALL ROSTER

Name of player	Position	Home

Inter-Class Softball Games Started

With the coming of warmer weather, local interest turns towards softball.

Prospects are good for each class; however the Juniors and Sophomores boast that they have the better of the bargain by turning in 1 and 2 victories respectively. The Freshman and Seniors seemingly lack that punch, organization, and class spirit that always wins the game.

Junior regulars and prospects: Bates and Hill, mgrs., Lauderdale, Brown, Lovett, Blackwood, Southern, Russom, Furrell, McGhee, Phillips, Dabbs, Gregg, Hudson, Stewart, Small, Lyles, and Baker. Hudson, Hill, Southern, and Lauderdale will be seniors this summer.

Senior regulars and prospects: Lockridge, Goggans, Bates, Caddell, Towery, Worthy, Machen, Kirby, York, Wigginton, Decker, Bassett, Hooten, Hand, Kemp, White, Bailey, and several others.

Sophomores: Jackson, Baker, Wallace, Ingram, Russom, Mitchell, Perry, Jones, Meade, Windsor, McMickens, and others.

Freshmen: McCurdy, Hyatt, Saddler, Williamon, Hoyle, Bagwell, Cox, Kelly, Smith, and Tyson.

Games played thus far give the Sophomores an edge in the statistics with two games won and none lost. Here are some box scores:

	R	H	E
Junior	21	22	3
Seniors	11	15	5
Sophomores			
Freshmen	9	11	6
Sophomores			
Seniors	16	12	5
Seniors			
	9	13	4

Sophomores	2	0	1000

The physical education department, together with the rest of the college, welcomes Miss Gladys Allen to the faculty of J. S. T. C. Miss Allen, whom we already know to be a very attractive and charming person, is a native of Morehead, Kentucky. She has a B. S. degree from Morehead State Teachers College, and lacks only six weeks of having her master's degree from Peabody, and has done professional gymnastic work in Cincinnati. She is very much interested in all sports, especially in swimming.

STUDENTS

(Continued from Page 1)
Lou Hawk, Ryan, Morgan County. Virgie Hicks, Altoona. Susan Moore, Altoona. Katie Sue Hill, Arab. Rex Hooten, Heflin Jr. High. Elba Hubbett, Blount County. Nellie Ingram, Allgood, Blount County. Ruby Johnson, Oneonta. Clarence Jones, D. A. R. Grant. Ila Mae Jones, Cordova. Wilma Killingsworth, Hubbertville High. Mary Bet King, D. A. R.

Mrs. Elizabeth Lamar, Oxford. Allene Landers, Highland Howe. Neva Lawrence, Hubbertville. Theo Lauderville, Marion County. Nora Lee, Alder Springs. Foster L. Lockridge, Snead Jr. High. Ellis Lovett, Double Springs. Aubrey Lowery, Blount Springs. Eunice Lowery, Blount County. Elizabeth Luker, Mellow Valley High. Mrs. Birdie Lyles, Murray County, Georgia.

Lewis McGee, Isabelle. Frances McMinn, Mechanicsville. Lillie King McMinn, Mechanicsville. John Massey, Franklin County. Besse Miller, Oxford. Cora Lou Moore, Fayette County. Mrs. Geraldine Moore, Mt. Berry, Georgia. Ena B. Matley, Clay County. Paul Murphy, Menlo, Georgia. Gay Neal, Newell. Inez Nelson, Woodville. Lois Norred, Randolph County. Helen Dudley Hamilton.

Do you remember back in grade school when "neck" was a noun?

A school paper is a great invention. The school gets all the fame, The printer gets all the money, The staff gets all the blame.

There is only one car without a backseat driver, and that is a hearse.

Ed Wynn said that the reason Sing Sing's football team is seeking a game with army is to prove that the pen is mightier than the sword.

Aviation Class Making Progress

The aeronautics class is making rapid progress since the advent of spring-like weather. Five boys have completed their flight training and have only to take the ground school exams before obtaining their private pilots licenses. The five who have completed the flight training are: Ernest Bell, Harry Rice, Paul Landt, Charles Gatling, and Paul Self.

The boys have been handicapped in the aviation class because of the inconvenience of the Anniston airport but the progress of the class compares favorably with the progress of other schools having better and more convenient facilities.

Many of the difficulties are being removed by Dr. Wood's assistance and unless some unforeseen hindrance arises there will be a landing field at the college for the students next year.

Hester Workman attended the A. T. A. banquet in Gadsden Friday night.

Look No Further—

We have what you need in school supplies— We also have nationally advertised toilet goods.

Wesley Foundation Conducts Services

The Wesley Foundation conducted the evening service at the Methodist Church on Sunday, May 5. The program was very fittingly centered around a unique missionary theme, using India as the particular country for discussion. Miss Madeline Wilson was the leader and introduced the speakers and their subjects as follows:

Catherine Ashmore, "Indian Religions"; Constance Mock, "Mahatma Gandhi"; Mrs. Eunice Power, "The India of the Future". Miss Melba Patton was the pianist for the occasion.

The purpose of the Wesley Foundation is to unite the college students and the local church more closely. One way of realizing this goal is the custom that has arisen for the Wesley Foundation to conduct one evening service at the church each month. The programs presented on these nights are always of great interest and importance.

The next program will be given on the first Sunday night in June and will be a candle-light service using the theme "Peace."

Y. M. C. A. ELECTS OFFICERS

Wallace Morton was reelected president of the Y. M. C. A. at a business meeting last week. Morton is 19 years of age and will be a junior next year. He is the son of Mr. and Mrs. M. L. Morton of Wellington, Calhoun County.

Paschal Haynes was elected vice-president. Haynes is a popular student coming from Randolph County. He is the son of Mrs. D. L. Haynes of Newell, Alabama. Haynes will be a junior next year.

Earl Hollaway from Jackson County was elected secretary and treasurer. He is a sophomore, and the son of Mr. and Mrs. John W. Hollaway.

Y. M. C. A. stunt night will be May 18th. All classes and organizations are asked to arrange a stunt.
