BUSINESS, EDUCATION AND COMMUNISM

Editor's Note:-The article below was written by the Rev. Robert McNeill as a comment on the address made last week by Dr. Houtson Cole at the University. He had previously "tried it out" on the Exchange Club here.

According to a recent survey made by Dr. Houston Cole, business men suspect educators of giving encouragement to economic systems other than our present one, ranging from planned economy to Communism. And it is no secret that educators resent their free speech and thought being labeled pinkish by the mercantile class. Neither understands the other. One is a horn-rimmed abstractionist and the other a boorish Babbitt. And naturally each blames the other for the present pathological condition of our body politic.

We believe our nation is sick because of a small festering sore called American Communism. Why should an American of all people be attracted to this insiduous doctrine? He must be crazy! Lock him up or deport him. Whose fault is it that the Red idea is spreading? The fault is neither with business nor education nor any other category of people. How can you separate business from education when business men have received their training from our educational institutions and our schools reflect the general philosophy of business? When Will Rogers was asked what was the matter with the world he said, "I guess it's people." That is about as specific as we can get when imputing blame for our modern predicament.

Communism didn't spring full grown from

such intolerable conditions that Communism appears to be the most reasonable antidote. Any people whose inclinations are no higher than the economic will be governed by the impersonal laws of profit and loss, from the absence of moral restraint, even- ers that conducted the services, an evil, even though some of us tually will require a rigid system of economic supervision. Any person who chooses security over liberty will have neither because liberty is surrendered to the regimentation of acquisitive habits, and the rent nationalities of people atdesire for security is insatiable.

Does American business have a conscience? Then it must speak to more deadly sins than short-changing a customer. The conscience of business must replace the fault; he should have been the service motive, exchange paternalism toward labor for brotherliness: it must restrain its own monopolistic tendencies, deal mercifully with competitors, value the spirit of a man above his productivity.

Does American education have a soul? Then never let us hear again the commencement addresses that correlate diplomas with financial success. Education must educate not train, think not react, lead not reflect, make men not adapt them. The highest form of instruction is in the realm of choice of values. The very absence of this type of instruction is in itself a choice of lower, materialistic values. The professor, be he a mathematician or historian, teaches religion or irreligion in every lecture. There is no neutrality. The failure to offer sensible religious instruction is to make a religion out of scientific method.

Communism breeds in desperation. Business without conscience begets poverty. Education withoct a soul bears hopelessness. The twin brothers of despair! WESLEY FOUNDATION NEWS

The Wesley Foundation of Jacksonville State College started the summer quarter off June 8, 1950. Most of the officers of the previous quarter were gone. Bonnie Cobb was the highest standing officer; so she took charge of the meeting. She made the new students welcome, then there was plenty of punch and cookies for all. Great fellowship was shown by the complete group. Sunday night, June 11, they had the fellowship supper, and there was a good sized group. It is always fun to take part in the supper; it is a pleasure to help prepare the meals, and a real treat to eat. A nominating committee was appointed Rev. Allen Montgomery to nominate candidates for all offices of the Foundation. On June 15 the regular Thursday night meeting was held A group gathered early and prepared ice cream. There were a few difficulties to overcome in getting freezers and the ingredents, but the different committees did their part and the ice cream was made. The program consisted of a description of Lake Junaluska by Lawrence Parker. Lawrence described the country surrounding the camp, the speakthe recreation for the groups, and the wonderful things there were to do after the inspiring sermons and lectures were over. The new officers are: president, Bonnie Cobb, vicepresident, Ceburn Hulgan, of Crossville; secretary, Frances Green, Jacksonville; treasurer Nick Wright, Sylacauga; reporter. Roy Nelson, Crossville.

Now the officers have taken their places and the Wesley Foundation is looking forward to having some good programs this summer. There will be a pro-gram every Thorsday night and every Sunday night. There will

cational institutions and our schools reflect the general philosophy of business? When Will Rogers was asked what was the matter with the world he said, "I guess it's people." That is about as specific as we can get when imputing blame for our modern predicament.

Communism didn't spring full grown from the head of Stalin. It is indigenous to any materialistic society, born in desperation, nurtures upon the tissce capitalism leaves unclean, is sustained by belly-god, dies upon the return of a prodigal conscience. Our people who from the body of American society are materialistic, thoroughly so, and the subtler forms of materialism are the more dangerous. By believing world problems are economic rather than spiritual and by desiring security above liberty we either open our own minds to Marxism or we create

Communism breeds in desperation. Business without conscience begets poverty. Education withoct a soul bears hopelessness. The twin brothers of despair! Democracy is exploited by political opportunists and nating Sunday nights Every stueconomic tyrants when there are no spirit- dent on the campus is invited to ual controls. And those who suffer from this negation of democracy and despair of ever realizing the full measure of their own personalities are prospects for the likeliest campus. It is by the students and innovation.

If you would remove the threat of Communism from American soil, don't hunt the Red-bearded fanatics-you won't find them. Seek out those pockets of desperation, which but for the grace of God would be your own plight, and apply to them the lifegiving spidit of God-given democracy.

Dear Mrs. Daugette:

at the commencement season this there was Noah Webster's Blue Jacksonville State Teachers College.

I watched with much interest the large and impressive class degrees from the hand of President Cole. I was once a student as the Jacksonville State Normal School offering a two-year course ficate was given. I entered the school in 1901, and left in 1903. I looked back across the chasm again the class of 1903-three members.

I consider the campus of today with its many magnificient buildings and saw again up on the old standing by it the Iron Queen Hotel. Those two buildings were all the school had at that time. The Courthouse upstairs served as the chapel and what had been rooms for the various offices for classrooms.

The Iron Queen Hotel was a first floor was used for the office and dining room. The second floor, the girls' dormitory and the third, the boys' dormitory.

SOCIAL CUSTOMS CLASS HAS PARTY

A large number of the teachers in the workshop will leave Friday on "The Southerner" for Washingington, D. C., where they will spend five days observing the national government. This is a part of the course being offered on civic education. A study is being made on the local, state and national levels of citizenship.

The trip will be supervised by Ernest Stone and Baskin Wright.

The Social Customs Class, Mrs. Mary L. Lowery director, had a party Wednesday night in the lounge of Graves Hall in observance of the Fourth of July Season. The patriotic motif was used in decorations and refreshments.

Donald Holt, dressed as Uncle Sam, greeted the guests as they arrived. Appropriate games were played. Refreshments were served from a table centered with flowers tinted in colors of red, white decorate the lounge.

Are Human

By William R. Nelson

MEMBERS of this and all other newspaper staffs are victims of that quirk of human nature so well expressed by the axiom which asserts that: "An expert is a m n away from home." Newspaper people are very much at home here, so they are seldom looked upon as experts. But they are experts, and specialists, in a wide variety of occupations and profes-

sions, all of them vitally important to this community. A home town newspaper, such as this one, is published only through the teamwork of people

of many skills. It is doubtful if any other business or institution in the community surpasses the newspaper in its complexity, in the varied nature of the expert know-how its

operation requires. Modern drug Teamwork stores, which require a comcf bination of 24. Skills

m e rchandising and professional aptitudes, come closest to the newspaper in the variety of demands made upon staffs. But in addition to merchandising and professional abilities comparable to those of the drug store, the newspaper's people must also have mechanical understand-

ing and skill of a high order. Newspaper mechanical staff people must know both how to operate a variety of machines, and how to maintain and repair them.

Editorial staff members are specialists who perform their daily duties within the restricting confines of a code of ethics fully as a liking for people, knowledge of words, a feeling for art, insatiable curiosity, willingness to work all hours under pressure, and be familiar with mechanical practices and limitations of the printing plant. While sharing

event, the editorial worker must also cover it, taking notes, names, dates and data, so that while others relax afterward, the story of the event can be written. The editor and reporter, like doctors, are "on duty" every hour of every day.

Members of the advertising and business office staffs, too, are specialists, each in his or her own way. And they, too, are important to the community. Telling the local service and merchandising story is vital to the smooth functioning of professional and commercial sides of community life.

MARCH OF DIMES FUND HELPED LOCAL BOY

The illness of Jimmy Young,

a victim of polio, has focused will render whatever future serice is necessary. So far, \$430.85 has been spent in his behalf from the March of Dimes.

In the last March of Dimes drive, Jacksonville contributed a little more than has already been spent on Jimmy. It is pointed out, however that no local community is limited to the amount it donates. The March of Dimes supplies whatever the patient's needs demand.

Last week a donation of \$159.18 was reported which was collected at the college by Prof. Mitchell Modrall. This money was given to the family to help defray extra expenses brought on by Jimmy's illness. Mr. and Mrs. Young have not been able to work regularly and there have been other extra expenses.
