POLLS OPEN TOMORROW

Plans Revealed

Dr. Cole Hopes For School Picnic; Better Intramurals

By Bob Crosby

In a recent interview with Dr. Cole the Collegian acquired some information which may be of great interest to the student body.

Dr. Cole revealed that he hopes to furnish the school with at least two more softball diamonds to provide more students with space for recreation. The two new diamonds will be located behind Jenkins Hall and behind the high school.

Dr. Cole also explained that the intramural program is of great importance to the students.

He further revealed plans for a spring picnic to be held soon if details can be worked out. He feels that if the picnic is held on a Wednesday afternoon many students will be able to attend.

Dr. Cole also discussed the possibilities of a student reception at his home. He said that in the past years, he and Mrs. Cole have given receptions to graduating seniors and incoming freshmen. This writer, who has been honored with invitations to these receptions, has found that only a small percentage of the students attended.

Dr. Cole stated that at one time he knew every student on the campus by name, but of late he has lost out on many of the students because they fail to ever visit him. He does it always open to any student who would like to speak to him. He is a busy man, but he wishes the students to feel free to drop by his office at any time.

New Parking Lots Produce Modern Scene On Campus

Welcome back to Jacksonville! The only school in the state that doesn't have parking problems.

Since the AEA vacation began, the state workers have been busy preparing the parking lots for paving and last Thursday saw the black top surface go down.

Other new looks around the campus include the smooth surface of the intramural softball field, some repairs to the drive-aways of the veteran's apartments, and the new looks on the faces of the candidates running for office.

Tomorrow is the big day for the student body. You will choose the campus leaders of next year, the people that you will have to put your trust in to get a job done. Many issues have been brought to light in the race and some of the candidates are very sincere in their promises made to the students, others only want to be elected for the honor of the title.

It is for you to decide who will best serve you. What ever happens, be sure that you cast your vote for the man you think best qualified to do the job. Select the man you want and go vote for him. Remember, no one can do anything without your vote and confidence. Every student on the campus, commuters, campus residents, veteran apartment residents, you all have a right to vote. Exercise this right tomorrow!

Remember—vote for the man you think can do the best job, but above all, vote. Last year only a few over 600 people voted.

This year let's try to see the entire student body vote.

POLITICIANS—Just to make sure that he is with a winner, Bobby Kennamer, future SGA vice-president, is with all the candidates in the race for secretary and with two of the candidates who are running for the position of treasurer. Candidates are, seated, left to right, Maretta White, secretary; Bobby Kennamer; Opheila Conway, secretary; standing, Richard Becher, treasurer; Sherry Crosby, secretary; and Bert Godby, treasurer.

Travis Hawke, running for treasurer, was not available for the picture.
Social News
By Betty Foseel

After a week's vacation, we should all be rested and ready to start studying again.

I tried to find out the latest news, with the help of a few people, here it is:

Lynn Nelson and Jane Byrde, Betty Stephenh and Cabin Rive are seen double dating quite often.

I heard Mary Durham and Sonny Roberts just can't stay up long. Could this be love?

"Tootie" Jones and Clayton Arrington seem to be more in love than ever. Here's a couple to watch.

Carole Bane is a ring hanging around her neck. Can this mean she's taken?

Lynette Gilbreath has been seen with the same boy lately. Her roommate, Delores Haynes, seems to be a particular friend.

She wouldn't be hard to find a column with news about engagements and weddings.

Dale Nahers plans to take Peggy Brock for his bride sometime soon.

It seems Ed Arrington has secretly married and just recently told.

Bill Brown and Marguerite White will become husband and wife next month.

Ann Skidmore decided she would like to have a MRS degree as well as a college degree, so she and Bill Nahers were married over the holidays.

After a long courtship which started in high school, Marie Brown and "Doc" Luttrell decided they would like to spend the rest of their lives together.

Congratulations.

NOTICE:

If you have any social news for this column, please contact me at Daugette Hall, Room 211 or 207.

Professor: (irritated) — If there are any morons in the room, I demand you stand up.

A long pause, and a lone freshman rose.

"What, do you consider yourself a moron?"

Freshman—"Well not exactly but I do hate to see you standing all alone by yourself.

 jugar: "Have you got a nickel for a cup of coffee?"

Student: "No, but I'll manage somehow, thank you.

College Boy: "What did you do with your shirt?"

Roommate: "Sent it to the laundry.

College Boy: "Ye gods! The whole history of England was on the cuff!"

"For goodness sake, use both hands," shrilled the co-ed in the next cubicle.

"I can't," she said, her escort, "I have to steer with one."

A blousing gun battle had broken out. This meeting in a mountain community notorious for feudin' and fightin', had started the shooting, asked a girl with a broken arm.

"Fallen a motion that all of us be made," a grapeyshaped told him.

"What is the world's motion?" "Toward his gun."

Spotlight
R.O.T.C. Cadet, Ed. Major
Major Outstanding On Campus
By Lynn Dyer

A delighted, friendly personality has been the contributing factor to a successful life thus far for our Spotlight star of this edition. Miss Joan Hogan, now a graduating senior, was a product of Gadsden High School, with the class of 1934. While at Gadsden High she participated in worthwhile activities with the Hi-Y, the Choral Group, and the FTA. She could also be recognized as one of the attractive majors of the Gadsden band.

Coming to the Jacksonville campus in the fall of 1954, the power of this charming personality evidenced by her participation in many of the campus activities. During her freshman year, she became secretary of the freshman class and capped the enviable title of "Miss Homecoming."

The following years found Joan occupying a position on the "Minnow" staff and active with the Resident's Hall Group and student Union. During free moments from other student's burdens, Joan often be found at the tennis courts or the swimming pool in pursuit of her two favorite hobbies.

However, one of the ultimate experiences of this young elementary education major was to have been selected as the "Outstanding Senior of the Year," an honor bestowed upon a student chosen by Delta kappa Gammn, the professional women's society.

Immediate future plans include a June wedding to baritone, Milton Wiggins, a graduating senior at Auburn, and then a probable teaching position with the most terminal locales due to Milton's military obligations.

Jacksonville State will feel the loss of one of its most accomplished students when Joan graduates this semester but our loss will certainly be the teaching profession's gain as a member of the college career nears its finale.

ANNOUNCEMENTS
(Continued from page 1)

Being a newcomer to the Jacksonville Campus, your Spotlight reviewer has found it to be almost like a page of a Sherlock Holmes mystery trying to solve and recognize the outstanding personalities to be featured in this column. Armed with a pen and my trusty notebook I began my search for the busy Spotlight of this month. After a few quizzing as to what this outstanding person looked like, I heard the inevitable: "He's a very tall man!" and Mr. Bob Rogan, who now steps into the full glare of fame is indeed a "tall man" in every respect. Having spent his high school years at St. Patrick High School in Miami Beach, Fl., Bob came to JSC in September of 1953, and immediately lent his stature to many campus activities.

Outstanding for his personality and a natural abundance of leadership, Bob Rogan was a natural-born leader and his career in the political world has been a challenge for his energies. His policy to the free press, to criticize as it deems necessary has always been his motto.

Bobbie Barham, school nurse, has requested that girls not use sun lamps to the extreme.

Barbara Keith, school nurse, has requested that girls not use sun lamps to the extreme. She says there have been several cases of bad burns from these sun lamps and that the problem is becoming worse. Please, for your own comfort and good health, don't get an overly sunburned exposure if you must use sun lamps.

This writer has been accused of saying I have a natural abundance of leadership, Bob Rogan is a natural-born leader. And Mr. Bob Rogan, who now steps into the full glare of fame is indeed a "tall man" in every respect. Having spent his high school years at St. Patrick High School in Miami Beach, Fl., Bob came to JSC in September of 1953, and immediately lent his stature to many campus activities.

Science Convention Is Due To Meet Here April 25-27

Alabama's Academy of Science will convene at Jacksonville State on April 25-27. Dr. J. Allen Power, Birmingham Southern College, is president of this organization which has a total state membership of over 500.

The convention will be attended by leading men of science in the field of education and industry. Research papers on biology, chemistry, mathe- matics, physics, medicine, sociology, education, and social science will be presented and dis- cussed.

The Junior Academy of Science, composed of 43 Alabama high school science clubs will also meet during the week. The people attending both conventions will stay in the dormitories for the next three nights.

The convention will open Thursday morning April 25 with a welcome address in Lassen Coole auditorium by Dr. C. Cole. The senior academy ban- quet will be held in the high school auditorium. The Junior Academy members will be guests at a banquet in Ham- mond.

One feature of the convention will be exhibits by the junior members of the various schools in the state. A winner for the best ex- hibits will be named and will receive a Gorgas Foundation Scholarship. This exhibit will be open for the public on Fri- day from 2 to 5 p.m. and on Saturday from 8 to 10 p.m.

Science Convention Is Due To Meet Here April 25-27

by Judy Archer

If you were in the Jacksonville campus, you would have seen a good attendance Monday for the Science Oaks. During five years of elementary school he wasn't absent from school a day; and he graduated from Chilton County School in Clanton without an absence. This is why it's very important to be there every day, Clarence. And that's why we have the first class cut during his college career.

During his sophomore year he was selected as "Star of O. D. of the South" by the Academy of Science Convention. He is the first student ever to be selected as "Star of O. D. of the South".

Clarence was married August 19, 1955, to the former Melissa Sue Thrasher from Oxford. She is a junior here at Jack- sonville.

Second Guessing

By Bob Crosby
Collegian Sports Editor In Hospital

Dale Nabors, who generally writes this column, and does a much better job at it than I can hope to do, is in the Barnes Hospital in Montgomery. Dale has informed me by the mails that he will be out of action for about two weeks or so. Here is hoping you a speedy recovery Dale.

Better Intramural Program

From all indications, the Intramural program is improving. Of course, this will have to be proved by time. However the softball field is being scraped and two more fields are in the planning stage. Rumors also have it that a new light pole in right field will have been one that is to be set up in the near future. All in all, things are improved completely, has been offered a contract and Carl Harrison was badly wanted before the season arrived as a result of this Vita. Most likely these boys will make good as professionals.

Basketball Looks Better

Basketball didn't look too good here this year. To begin with, the tall men are almost a foot shorter than the college player. Of course with players like Harlan Hill of Florence High and Ray Williams in the big time and other small college players doing as well, they have the talent to take a second look sooner or later. To prove this point, look at the Talladega college players, who were sought after and signed this year. The pro's gave Billy Hicks a hard time trying to get his signature. Partially due to the mildness of Intramural competition, has been offered a contract and Carl Harrison was badly wanted before the season arrived as a result of this Vita. Most likely these boys will make good as professionals.

Intramural Softball Season

Will Open This Afternoon

By Hudson Davis

The intramural softball season, which opens this afternoon, will be played Friday if the weather will permit. The managers and representatives of the nine teams which comprise the league for this season, were notified by letter in March 20 and a nine team league was organized. The following nine team league is as follows:

1. Players will be eligible to play for one team only.
2. Games played before supper must be under way and not later than 4:10. No inning will start after 5:15. The last team playing before supper. A little later in the season games will be played on a Thursday evening. Today's games must get underway by 5:10.
3. Balls hit to right of the light pole in right field are good base hits.
4. The plate umpire's decision will be final.
5. A foul tip will be eligible against the batter.
6. No game can be protested.
7. All games postponed by rain or otherwise will be rescheduled and played at the end of the season.

The softball field between the gym and the football field is being worked on and should be in good order for today's game. Two additional fields will be fixed and these will be available in the near future. Dale hopes to see several more intramural teams organized before the season is too under way. Dale is anxious to get the report of the Intramural program well enough organized and equipped to allow any student on the campus who wishes to play the opportunity to do so.

An official record book will be kept and the top ten hitters, pitchers, and latest standings will be printed in each edition of the Collegian to keep track of the Intramural program.

The World is Full of People

Learn from the Mistakes of Others—You haven't time to make them all yourself.

Sounding Ready. To Take Orders

State! Don't skip this article. You may be glad you read it. Something very interesting will soon be available for everyone on the Campus at a very low price. The 1937 "Sounding" is in the making.

In case you don't already know, the "Sounding" is an annual publication of work done by members of Jacksonville State's Writers Club. The book includes poems, short stories, and essays and is compiled every spring.

Representatives of the club will be in front of the Grill today to show you what the book is like and let you pay for your copy now. The cost is only thirty-five cents.

Advisers for Writer's Club are Miss Douglas Olsen, and Dr. William Cabaret. Members include Clyde Martin, Mohammad Boulade, Betsy Robinson, Sarah Johnson, Bobbie Sharman, Jerry Hamilton, Lynn Dyer, and Kay Kirkland.

Any of the people named above will be glad to show you a copy of "Sounding" and to take your order.
