Mermaids Go Into Action In Water Tonight

**Graduate Program in Midst Of Second Successful Year**

The newest addition to Jacksonville's education program is the establishment of a graduate program. This program was begun last summer with a great deal of enthusiasm on the part of both the administration and the public. Last summer, the enrollment was approximately 118 after all the drop-outs for various reasons. This summer about the same number, in fact 115, are enrolled. Dr. Buchanan, head of the graduate division, pointed out that for the present they are trying to stabilize the program and keep the enrollment around one hundred until better and more equipment in the way of facilities and staff can be acquired. Also, other reasons for the relatively low enrollment are the high standards of admission, and the high standard of work the student is expected to maintain.

Evidence of the satisfactory program being carried on at Jacksonville is the fact that seventy of the 115 new students enrolled began their graduate work last summer. This is a very high rate of retention for such a new program. Of 70, fifty will be in position to qualify for their degrees after another summer's work providing they can write their two independent research papers. Many of these papers are already in progress.

**Freckles**

An extremely attractive, as well as frequent, young lady of the campus (who is well-endowed) is also erudite on the subject of freckles and their significance. According to her learned interpretation, freckles are indicative of little leprosy and it suffices to point that their scoliotic marks are quite often in the lower brackets, and as I see it, quite obviously, their intentional.

Of 70, fifty will be in position to qualify for their degrees after another summer's work providing they can write their two independent research papers. Many of these papers are already in progress.

Dr. Seif made a research on those who failed to return this summer and found such reasons as: seven transferred to other colleges; six taught school in Georgia and their school closed too late for them to enter; four or five listed illness; and others were for miscellaneous reasons. Of those failing to return, only four expressed dissatisfaction with the program as a reason. Of the present enrolled, approximately forty are taking courses in elementary education; approximately twenty-five are studying in secondary education; and the remaining fifty are in courses of administration and supervision. There are only estimates of the number in each field.

Dr. Seif revealed that the vast majority of these graduates (Continued on page 2)

**Music Recitals To Be Held This Week**

Two music programs are planned to take place this week. They are two recitals which will be held in Leonie Cole Auditorium.

On July 15, at 8 o'clock p.m. in Leonie Cole, Mr. Albert Singerman will be presented in a recital, and on July 17 at the same time, four senior music students will perform in their last student recital. These four are Vera Durham, Ralph Westmoreland, Norman Paddock, and Jimmy Rayburn.

You are cordially invited to attend these recitals.

**NOTICE!**

The final issue of the Collegian for the summer season will be published for July 21, next Monday. Anyone who has any last-minute news or complaints or anything which should go in, please bring it to Room 204, the outer office of Dean Willman's office, by Wednesday morning. After this next issue, there will be a change in editors for the paper.

By Dan Kilgore

Tonight at eight o'clock the Joan and Ernest Winchester will present their annual water show. Our little college pool will be surrounded by beautiful scenery; spotlights will glimmer upon the water's edge; beautiful figures and designs. You will be thrilled as the Mermaids perform their nine acts in perfect “synchrony” with appropriate music.

Horse, the director of the show, has been working for weeks with his volunteer group of girls. These girls, all of whom are excellent swimmers, have been working in groups to perfect the timing of the very intricate movements. Horse, in his mild, easy-going way, has worked with the girls to some degrees and has molded them into one of the best groups of aquatil performers in this part of the state.

Two girls will appear with the girls to add some comic flavor to the show. Mr. Mann, and Ernest Winchester will be on hand to do some stunt diving and comic water acts.

A modern dance pool side will also be featured. Various recitals and performances will follow by Frankie Wallace and Patsy Curry, LaFayette, Patsy Thomhill, Prague; Sue Little, Centre, Crystina Mize, Gadsden; and Mary Barnett, Centre. Standing, left to right, are: Ann Cushman, Jacksonville; Betty Cunningham, Centre; Margaret Pope, Jacksonville, Charlotte Montgomery, Oxford; Barbara Darden, Sylacauga; and Loulu Finken, Odenville.

**Learned From The Chimes**

Gooey and Malicious rumor — An informer (whose identity must remain secret) recently passed on an exceedingly hot tip concerning the financial enterprise of one “Bugsie Ken- namiteinstein” and one “Clyde Swimmer.” It seems that these ambitious young men have taken over control of the notorious 4564 house on the Anniston Highway known as the Goodhue. Any patronization by them is recommended. An adventurous set will be modestly appre- ciated. They need the money. — This is not a paid advertisement, although some physical reimbursement is greedily expected.

Bubbling Gum — This trade is one of the most unprofitable ever prac- ticed on this glutenous community during the past six weeks. A new sect, or cult, has recently been formed by the dyes literate of our composite society, its purpose being the complete devestration of the Crock's stocks of bubble gum. A side issue involved in the destruction of chemical curdgers by the superficious snapping and popping of their gum. Evidently they deem this an act of this masticatory accomplish- ment of little significance and it suffices to point that their orthodontic marks are quite often in the lower brackets, and as I see it, quite obviously, their intentional.

Freckles — An extremely attractive, as well as frequent, young lady of the campus (who is well-endowed) is also erudite on the subject of freckles and their significance. According to her learned interpretation, freckles are indicative of little leprosy. You're right, Deloris.

Gooey Two-Shoots, of Chero- kee extraction, recently pro- mulgated a tried & true meth- od of eliminating race con- flict in New York. However, the number of atom bombs his policy failed for are not readily available. Too bad, Gooey.

An award goes this issue to Mr. Edwards and Dean Mont- gomery for their splendid hand- ling of the foreign student program. Their tact, perseverance, and unselfish devotion of time and effort, and the many otherwise difficult problems, making the stay of the students from Brazil as pleasant as pos- sible. It is ingratiating to note that they took every means to ensure us whose ideas concerning their work go beyond the eight- (Continued on page 5)
Letter To The Editor

June 30, 1958

Jacksonville State Collegian

Kay Kirkland, Editor

Dear Mr. Hand:

Perhaps there is some truth to what you are saying. Maybe all of us, under-graduates and graduates alike, are getting a bit lax in our habits of friendliness. But, I will have to defend the writer of the younger set when they are spoken to. This, by no means are concerns of the whole group, however. There are some who are just as delightful, and sometimes more, than the plentiful under-graduates.

There is another side to this thing, however. Some people do not seem to realize that the Chimes is built almost entirely of one person and that their opinions are not necessarily published as fact. Accordingly, you or anyone else, has the right to your opinion published when you wish, whether it agrees with this writer's opinions or anyone else's on the staff.

Thank you for expressing your opinion. This paper would be much improved if others would respond as you have.

Sincerely,

Kay Kirkland
Editor

Brazil—Beloved Country

Brazil, lovely country of Eden
With its banner of yellow and green
With its mountains and forests and rivers,
The fairest that ever were seen.

Our people with noble ideas
Blessed by the hand of God;
The Southern Cross high in the heavens,
Beneath us the flowering sod.

In Brazil lies the hope of the future,
Producer of coffee and gold,
Of cotton and rice, without measure.
The owner of riches untold.

(Written in Dr. Thompson's class by a group of students from Brazil as a class project in composition, June 27, 1958.)

GRADUATE SCHOOL
(Continued from page 1)
students are teachers who have had experience in teaching, with less than a dozen being recent college graduates. This seems to signify that those who have faced the world have reached a higher rung for higher learning and more thorough education. Also, the high retention rate last summer seems to indicate that the Jacksonville program is very satisfactory, and perhaps in the very near future the facilities will be such that almost anyone seriously desiring to do graduate study will be able to receive his Master's Degree from Jacksonville State College.

Azeredo Speaks
To S. S. Club

"U. S. representative in the embassies and consulates are so busy they never really get to know the people. They associate only with those high up in the government and social life of the countries they are located." This said Dr. Azeredo, director of the Brazilian group of students here at Jacksonville State College, last week.

He went on to say that for this reason they have very little about how the people is Brazil live and about their traditions and customs. They also fail to make friends with other countries. He feels this can be pointed out, the Nixon experience being a good example. The good relations between North and South America is a lost cause.

"All, they do not know and understand you. Must of what we know we learn them are not true pictures," he said.

Dr. Azeredo said that he had been talking to the F.S.A. groups in the United States students. Sometimes he had been met with the fact that so few people are familiar with the Latin America.

In his educational program, Dr. Azeredo said he is trying to build a bridge between two great countries of Brazil and the U.S. This is the best way to know to bring the young people, the leaders of tomorrow, together, so they will know and understand each other, he declared.

"We must build something strong that will support peace," he said. "We must not forget North and South America and become one continent—one place of peace—one place where all our children can grow up safely.

"We believe there is no better way to prepare democracy and peace than to bring people together and let them learn to know each other," he concluded.

After he had finished speaking, he answered questions from the audience for about 40 minutes. American faculty members and students expressed awareness of having the opportunity to know the Brazilians, and asked questions about their laws, their government, and their customs.

A number of the Brazilians asked Dr. Azeredo questions about the U. S., which he discussed and then answered them in their own language.

Azeredo states that there are schools in Brazil and good highways are few, he said. Brazilian citizens cannot buy cars and take them back into the country, and transportation is one of their greatest problems. The beginning to build or assemble cars in Brazil, however, and several new highways are under construction.

The establishment of a new capital in the hinterland is expected to help develop more of the country and will also create greater demand for more highways, he explained.

A smiling, friendly Joe with a hearty hello to everyone in the audience the warm and devoted friendship Joe Garner displays in everyday life. Joe is a hardworking sophomore from Hartsville, Alabama. He enrolled at Jacksonville in the fall of '58 and is seeking a major in physical education with a minor in history.

A friendly, smiling Joe with a hearty hello for everyone decorates the warm and devoted friendship Joe Garner displays in everyday life. Joe is a hardworking sophomore from Hartsville, Alabama. He enrolled at Jacksonville in the fall of '58 and is seeking a major in physical education with a minor in history.

Joe graduated from Danville High School in May of 1956. In high school he was active in

JOE A. GARNER

F.T.A. serving as president, county secretary, and winning the title of "Eighth District Mr. F.T.A." He was secretary of F.T.A., member of the student government, and served as several campus officers. Joe played basketball for three years and was home captain one year. He was active in most school activities and was an all-around good student.

Since he came to Jacksonville, Joe has been in F.T.A. and will serve as vice-president of that organization next year. He has taken an active part in the intramural program at the college, and was elected to serve as cheerleader for the coming year. Joe was appointed to serve as treasurer of the Student Government Association this summer and has proved his worth with this organization.

Joe has kept accurate financial records and is always around and willing to lend a helping hand to anyone. He proved this point by working untiringly on the Class Officer's Ball, and he even got up at 5:30 a.m. to chop trees for decorations! That is quite a remarkable task for anyone with the status of SGA officer.

Joe says, "If the best known when he will graduate." However, he does know what he wants to do, whatever it is. He hopes to become a coach in some high school. Knowing Joe, he wants that position enough to put his entire effort toward academic achievement. Joe is characterized by his unlimited ambition to succeed in whatever he attempts, and has sufficient capabilities to carry out his desires. You will find him modest, dependable, and cheerful "friend in need."
This Is What The Brazilians Think About Our Country

By Mary Ann Waldrep

Freshman Hall has a unique attraction. As you wander over there some evening, you can sit in the lobby and chat with "our Brazilian friends." Usually there is a background of exotic South American music, and, if anyone feels like it, there will be dancing to match. By talking with the first one then another, you will discover that your interest in them is met with a mutual interest about yourself.

You may be surprised at how fast they are learning English. For the most part, they are very interested in their studies and are doing well. Many of them are very curious and want to know everything about our culture. They are interested in learning about American music, and, if anyone is interested in their culture, they will talk about it. They are very interested in the history and culture of Brazil and wish to learn more about it. They are very appreciative of the hospitality they receive here, and many of them express their gratitude to the hospital in Anniston. A novelty here are the tall and picturesque movie stars, the country club in Anniston, and the homes, Dur-
SPORTS SHORTS

NOW PLAYING PROFESSIONAL

One of last spring’s more adept baseball players was a fellow named Jerry Dupree. He played as shortstop on Coach Frank Laverne’s team, the first baseball team ever in the history of North Florida to win a Southern Conference baseball game. And, a pair of pliers have been turned up missing. The Tigers are in second place with a 3-1 record. The Bulldogs got off to a poor start but have been victorious in their four games. They now support a 4-2 record. The Tomcats and the Spiders each have won one game while losing four.

SLASHERS LEAD

The Slashers still are out in front as the International Softball League enters its final round of play. The Tigers are in second place with a 3-1 record. The Bulldogs lost to the Tomcats, 9-8, and to the Spiders, 9-7, with a 5-2 second place mark. The average percentage is .330. There are only ten batters that have been at bat at least fifteen times. Corky Newman, shortstop for the Bulldogs, leads the league in batting, with a .500 average. Corky Newman collected three of six hits given up by Slasher hurler Jim Hodges. Roy Heath blasted a triple and Doug Larry and Joe Garner collected single for the winners. Mike Livingston, Jim Hodges and E. G. Taylor hit safely for the Slashers.

Bob Taylor’s Spiders blasted the Tomcats, 23-1, Cecil Edgar, center field, and only Marine Officer to Mrs. L. C. Grower, actually command a naval vessel in battle goes to Lt. John Prueett of the Bulldogs, 9-7, and to the Spiders, 9-7, with a 5-2 second place mark. The average percentage is .330. There are only ten batters that have been at bat at least fifteen times. Corky Newman, shortstop for the Bulldogs, leads the league in batting, with a .500 average. Corky Newman collected three of six hits given up by Slasher hurler Jim Hodges. Roy Heath blasted a triple and Doug Larry and Joe Garner collected single for the winners. Mike Livingston, Jim Hodges and E. G. Taylor hit safely for the Slashers.

Second Round Over

The second round of play opened on July 2 with the Bulldogs beating the league-leading Slashers 7-4. Jerry Washington allowed the Slashers only three hits while marking up his third victory of the season. Corky Newman collected three of six hits given up by Slasher hurler Jim Hodges. Roy Heath blasted a triple and Roy Heath blasted a triple and Doug Larry and Joe Garner collected single for the winners. Mike Livingston, Jim Hodges and E. G. Taylor hit safely for the Slashers.

Phil Miller Alpha News

By Barry Thomas

Robert “Happy” Tinley, president, and Harold Summerville, vice-president, of Epilton Nu chapter of Phi Mu Alpha, attended the national convention at Cincinnati, Ohio, last week. They attended several meetings and played in the convention band.

For the past five weeks we have had guest speakers at our meetings. On Monday, July 1, Dean Willman, his wife and daughter, Susan, gave a program on Alabama folk music. They sang many interesting and entertaining folk songs of Alabama.

Last week Dr. Calvert played some of his record collection at our meeting and gave us an appropriate analogy on each record. Dr. Calvert’s records included Brahms’s 1st Piano Concerto in D Minor, a Haydn String Quartet, and Mozart’s Piano Concerto No. 15 in A Major.

Library Of Science Class Is Popular At Jacksonville

For a number of years Jacksonville has been in need of library science classes. This semester marks the beginning of just such a program. Classes in library science are being offered to teachers from schools in northeast Alabama. Miss Nancy Wilson, librarian at Decatur High School, is conducting the course.

Several of the state’s high schools have lost their accreditation or are in danger of losing it for lack of trained librarians, and Jacksonville has responded to the request from school superintendents to train teachers for this purpose. The University of Alabama and Florence State College are the only other colleges in the state that offer similar training.

Enrolled in the course this summer are the following: Mrs. Nellie Allison, Blountsville; Miss Mildred Burns, White Plains; Mrs. Frances Campbell, New Market; Mrs. E. H. Cray, Miss Sue Little, Centre; Mrs. Beulah Cleveland, Rainsboro; Mrs. D. A. Cox, Odenville; Mrs. C. O. Edgar, Glennie; Mrs. H. F. Ford, Hokes Bluff; Mrs. Ernestine Green, Jacksonville.

Mrs. L. C. Groover, Boaz; Mrs. Verdie Holbrooks, Sylva- vania; Mrs. Paul Johnson, Piedmont; Mrs. Zoda Earl Little, Ashville; Mrs. Norman Parker, East Gadsden; Mrs. R. L. Giroux, Attalla; Crawford Pike, Dadeville; Miss Mary Clyde Thompson, Otsatcher; Mrs. LaRanda Sibley, Walnut Grove, Mrs. Ema Thomas, Fort Payne; Mrs. Hoyt Williams, Woodland.

Abercrombie To Have New Look

At the beginning of the summer session, Abercrombie Hall, the dormitory for junior and senior girls, was closed for long-needed repairs. At Decatur, Alabama, Miss Nancy Wilson, librarian at Decatur High School, is conducting the course.
