Gov. Wallace to address students here Sept. 25

Enrollment boost puts school officials dormitory-hunting

Dean Lawrence R. Miles has announced an all-time high in JSC enrollment with the acceptance of over 2600 students for the fall semester. The large number of resident students necessitated the re-opening of Abercrombie Hall, which recently had been closed for renovation. The enrollment increase also put college officials to wondering how the institution would house the even larger increase expected next year. But solutions to this problem were not long coming.

A new dormitory for girls is to be built, with construction to begin immediately. An identical twin to Rowan Hall, the new dormitory will be located on the circular drive between Rowan Hall and Snow Memorial Stadium.

Additional housing for the men will come with the conversion of Abercrombie from use as a girls' dormitory into a hall for men. Old Forney Hall on the former campus is to be renovated at a cost of $75,000 and used as a residence hall for men.

The enrollment figures substantiate thus far the prediction that Jacksonville State enrollment should increase at the rapid rate of 10 per cent each year for the next ten years.

Student elections set for Thursday;
Qualification deadline tomorrow

Tuesday noon, Sept. 17, has been set as the qualifying deadline for those students interested in running for a class office. The election will be held Thursday, Sept. 25, at 10 a.m. The governor will address the student body in a general assembly to be held in the Leone Cole Auditorium.

Requirements after election, according to SGA officials, are hard work, and attendance at meetings. If an SGA representative misses more than two meetings, his office will be declared vacant.

Faculty list growing;
Ten more additions

In the last issue of the Collegian, we announced the addition of sixteen new teachers to the JSC faculty. Since that time there have been ten more additions to the college teaching staff.

Dr. William D. Staples, Jr., Anniston, has filled the vacancy caused by Reuben Boozer's leaving to work on his doctorate, and he will teach biology. Dr. Staples, a graduate of the U. S. Naval Academy, holds the degree of Doctor of Veterinary Medicine from Auburn University. For the past five years he has been a veterinary supervisor with the U. S. Department of Agriculture. He served with the U. S. Navy during World War II and holds the rank of commander in the U. S. Naval Reserve.

Former SGA president John W. Wright, who now works for the company of his father, Mr. Baskin Wright, director and no less one of the most controversial figures in the country. His stand on segregation and his relentless efforts to check the growing dominance of the federal government are...
Faculty list growing; Ten more additions

In the last issue of the Collegen, we announced the addition of sixteen new teachers to the JSC faculty. Since that time there have been ten more additions to the college teaching staff.

Dr. William D. Staples, Jr., Anniston, has filled the vacancy caused by Reuben Bower’s leaving to work at the college and he will teach English. Dr. Staples, a graduate of the U.S. Naval Academy, holds the degree of Doctor of Veterinary Medicine from Auburn University. For the past five years he has been a veterinary supervisor with the U.S. Department of Agriculture. He served with the U.S. Navy during World War II and holds the rank of commander in the U.S. Naval Reserve.

Dr. Evelyn McMillian, who has been professor of English at Athens College for several years, is teaching English. She has a BA degree from Birmingham-Southern; MA and Ph.D. degrees in English from the University of Alabama. She has also had a year’s study at Oxford University and at several universities in England and France. Mrs. Richard C. McMillian, is teaching English. She has a BA degree from the College of Wooster, Wooster, Ohio, and a master’s degree in zoology from the University of Michigan. She and Mr. McMillian have been married for six years.

Mrs. Wilbur F. Holland, Jacksonville, is teaching two sections of chemistry. She has a BS degree in home economics from the University of Georgia and has been employed as a home management supervisor by the federal government. She and her husband, Col. Holland, moved to Jacksonville last December upon his retirement from the army.

Mrs. Thomas Coleman, Jr., Anniston, will teach freshman-level trigonometry and geometry part-time. She has an AB degree in mathematics from Randolph-Macon Woman’s College and a BA degree in mathematics from the University of Alabama. She has been associated with the Paul W. Hooper firm in Gadsden as design, maintenance and consultant engineer; and has had private practice as real estate and land planning consultant.

Barnett HOLLAND

Student elections set for Thursday; Qualification deadline tomorrow

Tuesday noon, Sept. 17, has been set as the qualification day for those students interested in running for a class office. The election will be held Thursday, Sept. 19, and if a runoff is necessary it is scheduled for Tuesday, Sept. 23.

Offices to be filled are as follows: president, vice president, secretary, treasurer, two SGA representatives, a social chairman, and reporter for each of the four classes and the college. A dormitory representative from each resident hall. The class presidents and social chairmen are members of the Student Government Association as well as the elected SGA representatives. A vote will be taken at the first SGA meeting to determine whether these two offices will continue to constitute a seat on the SGA.

The necessary qualification forms can be found in the SUB by the SGA box.

Qualifications for the offices are as follows:

1. one quality point for every hour attempted.
2. expectation of remaining in attendance one full year.
3. good standing with the school and SGA.
4. maintenance of the 1.0 average, for grades will be checked in January and new elections will be held for those who do not maintain the overall average.

Requirements after election, according to SGA officials, are hard work, and attendance at meetings. If an SGA representative misses more than two meetings without a valid excuse, he will be dismissed.

SGA meetings are twice a month, with call meetings when necessary. The first SGA meeting last year’s artists includedWhitmore and Lowe, nationally-known piano team, the Birmingham Symphony Orchestra, and three other delightful entertainers.

The year’s outstanding musicians have already been booked: Edmond Karlow, bass-baritone, and his chorale of 14 male voices, Frank Hoffert, Gadsden, is teaching pre-engineering. He graduated from Marion Military Institute; attended Emory University; received a degree in civil engineering in 1949 from Auburn University, and a degree in mechanical engineering in 1950. He served as a part-time instructor at Auburn University; has been associated with the Paul W. Hooper firm in Gadsden as design, maintenance and consultant engineer; and has had private practice as real estate and land planning consultant.

Mollie Washburn will be director of the home management house and will direct the school nursery. She has a BS degree in home economics from Alabama College, and a master’s degree in general home economics from the University of Alabama with additional summer study at Auburn University. She has taught home economics at Colbert and Winston county high schools.

Robert W. Foshee, Gadsden, is teaching in the business department. He has been associated with Dr. Minnie Miles in the business department at the University of Alabama. He holds a BS degree in industrial relations and a MS degree in industrial management from the University of Alabama. His master’s thesis was written on the subject, “Some Developments in Human Engineering.”

William L. Blair, formerly of Anniston, is a new instructor in the physical education department. A 1961 graduate of Ole Miss University in physical education, he has been on the staff of the Anniston YMCA.

ABOUT TO CHALLENGE the bewitching powers of an open ladder on Friday 13 is Sharline Tarpley, an education major from Rome, Ga. Sharline, a freshman, says she is not the least bit superstitious.

Gem of the Hills

Get your tickets to the concert

The Jacksonville Community Concert Association will offer a series of concerts during 1963-64 that will be open to faculty and students of the college. The association was organized last year and has a successful season of five concerts which were enthusiastically received by the membership of some 700.

Last year’s artists included Whitmore and Lowe, nationally-known piano team, the Birmingham Symphony Orchestra, and three other delightful entertainers.

The year’s outstanding musicians have already been booked: Edmond Karlow, bass-baritone, and his chorale of 14 male voices, Frank Hoffert, Gadsden, is teaching pre-engineering. Governor Wallace called greatest living American

Students taking the English Competence Examination during the week of registration were given a choice of seven single line word theme. One of the topics available was "The Greatest Living American." We were unaware of the various personalities that were examined by students taking this test, but we are told that Governor George Wallace was among them.

Although we hesitate to call Governor Wallace the greatest living American—we can think of one individual we would so class—we recognize certain elements of greatness in our governor's stature. Even though Governor Wallace has been criticized for his course of action by hordes of national observers, the criticism does not detract from the fact that the governor has upheld the courage of political figures of our time or of recent times. Superior deeds piled one upon another have not lessened the determination and enthusiasm with which the governor has pursued his sincere conviction.

Many people throughout our state have been discouraged in the fight for standards. That, whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter . . . it . . . organizing its powers in such a form, as shall seem most likely to effect their Safety and Happiness."

In Thomas Jefferson's day it took a revolution to make governmental alterations. Today it can be done by altering the Constitution. In Mr. Wallace's day it took a revolution to make a program, which provides well-rounded social entertainment for the student. Today it can be done by altering the Constitution. In Mr. Wallace's day it took a revolution to provide social functions in high schools. Today it can be done by changing the Constitution.

Lawrence: a logical interpreter

In the September 16th issue of the U. S. News & World Report, its editor, David Lawrence, in an article reprinted from the San Antonio Express of September 20, 1957 makes observations on the Supreme Court decision of 1954—the source of today's racial unrest.

Lawrence begins by pointing out the opinion of the Supreme Court in its desegregation decision, "Today, education is perhaps the most important function of state and local governments." He then suggests that "the Court's opinion specifically excluded any mention of the Federal Government as a participant in the American system of education. For nowhere in the Constitution is education placed within the jurisdiction of the Federal Government."

"The Supreme Court based its ruling entirely on its interpretation of the Fourteenth Amendment,' which says that no State shall deny to any person within its jurisdiction the equal protection of the laws."

"But which governmental body is to say what the phrase, 'the equal protection of the laws,' really means and whether separate schools will suffer because of it or not?"

Mr. Lawrence then suggests that "the Court's opinion specifically excluded any mention of the Federal Government as a participant in the American system of education. For nowhere in the Constitution is education placed within the jurisdiction of the Federal Government."

The Court declared that the Fourteenth Amendment was to be interpreted in such a way as to make it effective in the states. Thus, it is the responsibility of the states to ensure equal protection of the laws. Mr. Lawrence argues that this is not sufficient, and that the Federal Government should also take action to ensure equal protection of the laws.

"Congress, however, has never passed a single law forbidding segregation or requiring integration in the schools." Mr. Lawrence goes on to explain that the Supreme Court declared the separate but equal doctrine void because there was an intractable factor which could not be overcome—"the momentum of segregated schools would produce feelings of inferiority."

The Supreme Court said, "To separate them [the Negro children] from others of similar age and qualifications solely because of their race generates a feeling of inferiority as to their status in the community that may affect their hearts and minds in a way unlikely ever to be undone."

Mr. Lawrence: "This, of course, disregarded all precedents of law and all interpretations of the Constitution on the rights which had been recorded in the history of the United States since the Republic was founded."

"Never before had the nine Justices of the Supreme Court set themselves up as the psychologists or sociologists to determine the mental reaction of students to their environment."

Pressing the point of inferiority further, Mr. Lawrence asks: "While the Supreme Court do about the psychological effect on the individual Negro in an 'integrate' school system?"
Display that decal
Jacksonville State automobile decals were distributed during registration with the hope that every student who has a car will display the sticker in a prominent place. The decals are attractive and can improve the appearance of any car. We urge you to display your decal and spread the word that Jacksonville State is on the move.

Those who have not yet received the decal can obtain one from any SGA officer at no expense. The purchase of these stickers was made by administrative officials.

Mimosa's quality depends on students says editor
In a report to the Collegian, Mimosa Editor Dale Dison announced that 774 yearbooks were sold during registration. He also announced that Platemakers, Inc., an Alabama Engravers, has been given the contract for the book's publication.

Appealing to the student body for its help in making Mimosa '64 a good book, Dale had this to say:

"We would like to feel that all are welcome, we the yearbook staff, must turn to you, the student. As you know, the '64 yearbook is going to include the entire student body within its covers. To do this we had to increase the number of pages and, in turn, this increased the price of the book.

"We have already increased the number of color pages in the book and by gaining the support of the student body we hope to even double the amount of color. As a student at Jacksonville State, you are one of the deciding factors in how good your yearbook will be.

"I sincerely hope that you will support the Mimosa in making this the largest, most colorful yearbook in the history of our institution. We repeat that you, the student, will be the deciding factor by the amount of support you lend through yearbook subscriptions.

"If you have bought a yearbook, talk a friend into doing the same. If you have not yet bought yours, please attempt to do so before Nov. 15.

Cast an educated vote
There has never been a time in the history of our nation, our state, or our college when we lacked capable men. But, as historically it shows us, we have not always found these men in public offices. That is why we have poor presidents, poor governors, and poor SGA.

Regardless of how you may feel about two of these departments our SGA certainly shows promise. It is doubtful that ever in the history of the college there has been a more capable group of SGA officers than we have now. And unlike some politicians who only want to move something or go somewhere, they are moving and where they are going.

But Waldrop, Normand, Steakley, and Clocker are not the entire student government. There is a legislative body which will be chosen in a few days, and even if you can't vote for president or governor you can vote in the election and the legislative capable SGA requires many more than just four good members.

It is your duty to vote on election day, but a more important duty is knowing the qualifications and abilities of each candidate. Failing in this, it is your duty to not vote. Likewise, if you believe that you are the best person for the job, it is your duty to offer yourself for it.

Someone said that the surest way for bad men to take over is for good men to do nothing; apparently good men have done nothing for too long. Elections will soon be held for class officers and for SGA representatives, and your duties are clear. If you fail yourself then you can blame only yourself for poor government.

Think of future as time passes
You hear much talk about how swift- time passes, but we are told that time does not pass at all-things remain and human beings pass. Thus, it becomes clear that an educated man has had many students passing through it—in one way or another.

Some of these students have become national and state leaders in their professions. You have the same opportunities. Others have become nothing more than they were when they entered, in which case there is no fault of the college. The college is here for you to make a good college, and you can get from it as much as you want—but it is up to you to get it.

And when you start thinking how long four years are, just remember: Fifty years at an unenjoyable job is a very long time in which to wish that you had spent four years. Think several times before you believe a drop out statistic.

Debate now offered
In the issue of March 11, we ask editorially for the expansion of the course in the area of speech, and sought student interest in support of such expansion.

We are delighted to learn that the course in Argumentation and Debate, being offered for the first time this semester, is filled to capacity.
Mrs. Coffee begins 25th year as JSC News Director

Editor's Note: Mrs. R. K. Coffee, director of the college news bureau, is one of Jacksonville State's most valuable assets. Few news items of any significance on campus slip by her attention, and consequently, few days slip by that a daily newspaper does not carry a JSC news story furnished them by Mrs. Coffee. Besides her duties in the news bureau, she is also adviser for the COLLEGIAN, and in that capacity she is similarly invaluable.

With the beginning of this semester, Mrs. Coffee began her 25th year reporting Jacksonville State Teachers' College and Jacksonville State College news. The following is a reminiscence of those twenty-four years which we have solicited from her. The reminiscence provides a historical view of a very important segment of the institution as well as a reflection of some of the rewarding experiences of a very wonderful lady.

"Twenty-four years is a long time in the life of an institution or a person. During this time we have seen unbelievable progress made on this campus; we have seen our graduates take positions of prominence and responsibility; and we have had the enriching experience of associating with faculty and students from year to year."

"College publicity was relatively new when we began sending news releases about Jacksonville to the newspapers. We were given a typewriter, paper, envelopes and postage, and that was it! We had no photographer and it was a rare occurrence for us to have a picture used with our articles. In fact, there were few pictures in the newspapers at that time. Although it was a part-time job, we lived on the campus and really worked with it all the time."

"At the suggestion of Dr. C. W. Daugette, who was president then, we took over the publicity job, we began a scrapbook and we have kept one ever since. We now have 12 large books packed, full of clippings about the goings-on here. The first books had almost no pictures and it took a long time to fill one book. Now we fill a book in a year and pictures are an important part of almost every article we send out."

Haywood given coffee cup award;
JSC state's only college so honored

James Haywood, director of food service here, recently joined the ranks of coffee makers who have been awarded the Golden Cup—a symbol of the Coffee Brewing Institute, Inc., an organization composed of green coffee growers.

Only 2,000 of the cups have been issued in the U. S., and Jacksonville State is the first institution of higher learning in the state to be so honored.

The coffee brewing institute is a non-profit organization that is designed to improve coffee as a beverage and to do research and education work.

To qualify for the Golden Cup, coffee-makers must meet high standards in equipment, methods of brewing, etc. Samples must be sent to the institute for testing. Only the top 100 samples are invited to the convention where the cups are presented.

Haywood, director of food service here, has been invited to the convention and will be presented the Golden Cup as the only college in the state to receive this honor.

NEA TO MEET

The Student NEA (National Education Association) will meet Tuesday, Sept. 17, at 6:30 p.m. in the student auditorium of the SUB. A film entitled "Focus on Change" will be shown. All future teachers and prospective members are invited to attend.

POLITICAL RALLY

There will be a political rally for freshmen candidates in front of the cafeteria Wednesday night, Sept. 18, at 6 p.m.

Campus to host Rock Club meet
Convenience of home found in
The Facilities of Carrie Rowan Hall

By JUDY SHANABURGER

Lounging in the air-conditioned atmosphere of the newest addition to the Jax State campus are over 200 girls who were fortunate enough to get their names on the waiting list early. Carrie Rowan Hall, named for a former housekeeper, offers its residents more space and conveniences than any other campus residence.

Visitors to “Rowan” find that in each room a wall possesses a built-in closet, dressing table, mirror with fluorescent lighting, plus several drawers and cupboards for each girl. Each room also has such novelties as an individual intercom and a temperature regulator.

A journey to the basement reveals a large T.V. room, complete with “comfy” leather chairs, two study rooms, and two laundry rooms which will soon be equipped with automatic washers and dryers. A recreation lounge is also located in the basement.

To find out what Rowan girls think of their new home, one need only visit their lobby. Such comments as these are most often heard:

“I have more space in my dorm room than I did at home.”
“Sometimes I feel as if I’m on vacation in a beautiful hotel.”

Completion of an identical dormitory now being started will mean that twice as many girls can enjoy the wonderful features, just described.
Meet the Gamecocks

EUGENE GRIEP

A graduate of Marshall County High School of Guntersville, Eugene brings with him a rich background of high school star-dom and true football ability. Coached by Joe Chorba, a true star, is a rare exception, he is definitely one of the few coaches ever to jump from the campus to a head coaching job at a four year college and make good. But that's the story of the White Plains, New York native, Don Salls.

He is married to the former Mrs. Margaret Rugar of White Plains.

The Salls have four children, Oonna, 19, Patricia, 14, Cheryl, 10, and Dec. 8.

THE Football's lively history

Early in the 19th century, football games grew out of rivalries between Princeton and Rutgers. On Nov. 6, 1869, the contest took place at New Brunswick, N. J., and Rutgers won goals to 4. The game was played with 25 men on a side. A few days later Princeton was at home field, 8 goals to 0, but rivalry between the two colleges became so bitter that school authorities forbade a third and deciding game.

By 1876 the right to run with the ball was generally recognized.

Here are other milestones from football’s lively history as noted by Compton's Pictured Encyclopedia:

In 1875, the University of Michigan challenged Cornell, and arrangements were made to play at Cleveland. 30 men on a side. The proposed game never took place because Amherst

Editors Corner

My name is Charles Couch. I am a senior and an math major. Being a firm believer in organized athletics, I was greatly honored to have the privilege of serving you, the students of Jacksonville State College.

I suppose it is surely a time-honored custom for anyone who gets a job serving people to pledge himself to constantly strive to aid and inform the citizenry. Very much like a politician, I would like to make one pledge to you.

Since the Collegian is the school newspaper, I plan to let sports news from the college itself have every priority. It is my plan especially to publicize the fine intramural sports program which we have at Jacksonville (both for men and for women) and to give some inside looks at various varsity activities.

CHARLES COUCH
COLLEGIAN SPORTS EDITOR

Attention Intramural Sports Managers

BY CHARLES COUCH

Since being chosen sports editor of the Collegian, I have given much serious thought to devoting a section of each issue of the sports page solely to intramural sports.

This can and should be arranged, with pictures and accounts of various teams with their managers, team members and records.

Please allow me to take this opportunity to invite, and encourage anyone who has already organized or intends to organize an intramural ball team to get in touch with me and work out the particulars of publicizing his team.

In addition to having the teams, individuals who prove to be definitely outstanding will be interviewed and will be featured with picture in each issue.

I might add that this is by no means restricted to male teams. We have some fine girl teams on campus which deserve equal recognition.

CHARLES COUCH

THE man behind the Gamecocks

DR. DONALD J. SALLS

Head Coach

FROM: Jacksonville State Football Handbook 1963

Coach Salls, beginning his 17th season at the JSC helm, was born June 24, 1919, at Trenton, N. J. At the age of 16 the Salls family moved to White Plains, N. Y, where the young Don was to star on the gridiron for the local eleven. As a senior quarterback, Salls, a three-season letterman with the WPHS varsity, was named to the All-County team.

News of the White Plains signal caller's fame spread throughout the East and soon reached the ears of Coach Harold "Red" Drew who was then a scout for Coach Frank Thomas' Alabama Crimson Tide. From the moment the young gentleman from up "Nawth" first shook hands with the gentleman from the great sovereign state of Alabama, it was 'Bama bound for Don Salls.

The trip up north paid high dividends for the Crimson Tide as Salls lived up to his high school reputation to the nth degree. During his four year stay at the Capstone, Salls played quarterback, halfback, and fullback under the immortal Frank Thomas. He played in the Cotton Bowl in '42 and was very outstanding in his fullback role in '43 when he personally guided Alabama over Boston College 27-21 in the Orange Bowl on New Years Day.

When Salls received his B. S. in physical education, his other curricular activities read like Who's Who in American Colleges. He was a member of the "A" Club, Sigma Delta Psi, Phi Delta Kappa and Phi Sigma Kappa.

Coach Salls entered the Army in 1943 with a reserve commission as 2nd Lieutenant. He was in combat in France as a platoon leader with the 79th Infantry Division where he was wounded and returned home in 1944 after being in three major campaigns.

After leaving service in '45 with the rank of captain, Salls received his M. A. degree at the University in 1946. After turning down several offers to play pro football, he became head coach at Jacksonville in '46.

But in a field where sudden advancement is usually a rarity, Jacksonville State Head Coach Donald J. Salls, Ed. D. in education since 1953, is a rare exception. He is definitely one of the few coaches ever to jump from the campus to a head coaching job at a four year college and make good. But that's the story of the White Plains, New York native, Don Salls.

The Salls have four children, Donna, 19, Patricia, 14, Cheryl, 10, and Dec. 8.

No game demands more teamwork strength, courage and alertness or provides a more thrilling spectacle than football—king of autumn sports in the United States.

It's a safe bet that few games have as lively a history. Football is an ancient sport. A game called harpaston was played by the Spartans as early as 500 B. C. In this game a ball was kicked, passed, or carried across the opponents' goal line, according to researches for Compton's Pictured Encyclopedia.

Strikingly similar to a modern football was the folia, used in Roman games. It was made of leather and inflated with air, but evidently propelled by foot, not by hand and arm.

A game called calceo, a modified form of harpaston, enjoined medieval tournaments in Italy.

A brawl-like kind of football was played in England as early as the tenth century and by the twelfth it had become a national problem. The game was making London a bedlam. In addition, it was diverting young men from archery, the sport that fitted them to defend England. Hence football was banned by municipal laws and royal edicts beginning in 1865 when Edward III decided to prohibit the game for military reasons.

Football was not fully reinstated until the seventeenth century when Charles II allowed many diversions formerly prohibited. A survey published in 1602 recorded that goals were set those on four miles apart

Meet the Gamecocks

EUGENE GRIEP

A graduate of Marshall County High School of Guntersville, Eugene brings with him a rich tradition as the quarterback, Eugene, in this same tradition as the memorable Don Fuell, learned well his football. An indication of this is found in the fact that he quarterbacked the MCHS Wildcats to the state football championship.

After high school where he won letters in three sports, Griep entered the University of Alabama. Shortly thereafter, he transferred to Jacksonville State where he became a very valuable asset to the Gamecocks. This season, his last, Griep is regarded by many as the No. 1 backfield in Coach Don Salls' single-wing attack. It goes without saying that Eugene has all the necessary qualifications to fill this slot. Standing 5'11" and weighing 185 pounds, he has the necessary weight to be a strong, effective runner, but still possesses the speed necessary to be a good break-away man. Also, an indication of his speed is found in the fact that he ran 50 yards in 5.8 seconds.

Last season saw Eugene become the 5th man in rushing in the ACC while playing in only 4 games. In the Florence game alone he amassed 85 yards on the ground and that's "pretty fair country running" in any man's football language. Injuries have plagued Eugene Griep all of his collegiate career. It was this very thing that kept him sidelined over half of last season. The only question mark that hangs over Griep this season, we well know, is the running and passing ability of the ballplayer we have just described, but we must still reckon with the possibility of some old injury recurring.

The Colleghn sports staff wishes good luck to a great guy and a fine competitor.

</table>

A game called calcio, a modified form of harpastum, enlivens medieval tournaments in Italy.

A brawl-like kind of football was played in England as early as the tenth century and by the twelfth it had become so popular that it was played without a ball! The game was making London a bedlam. In addition, it was diverting youths from archery, the sport which fitter them for England. Hence football was banned by municipal laws and royal edicts beginning in 1365 when Edward III decided to prohibit the game for military reasons, an unusual position for a monarch to take.

Football was not fully reinstated until the eighteenth century when Charter's II allowed many diversions formerly prohibited to play a survey published in 1602 recorded that goals were set three or four miles apart and two or three parishes united to play others in a novel manner that sprawled over the country-side.

The sport began to take definite form at boys' schools. Some even drew up rules that allowed the ball to be kicked, but not carried, toward the goal.

One November afternoon in 1823, something strange happened at Rugby Academy boys' school. The score was tied in a football battle between two class teams. Dusk was settling. Suddenly a player named Ellis - with a fine draw for the rules of football as played in his time took the ball in his hands and ran with it across the yard line. The score was not allowed. The event made history, however, and began Rugby football from which the American game is directly descended.

In 1880, Walter Camp, the "father of American football," persuaded the rule makers to reduce the number of players on a team from 15 to 11 and place the ball in a goal area with scrimmage, whereby the ball was put into play either by kicking it or snapping it back. The position of quarterback was also created.

In 1882 Camp introduced a rule calling for surrender of the ball to the opponents if the ball had not been advanced past 5 yards in three plays. This was the origin of the 10-yard-four-downs rule.

In 1901, Fielding H. "Hurry-up" Yost, football coach at the University of Michigan, produced a famous team built around a freshman, Willie Heston, which scored nearly a point for each minute of play. It amassed 550 points in 11 games and kept its opponents scoreless.

In 1906 the rule makers revised the "game by hands" rule, allowing all mass plays and introducing the forward pass which led to a more open style of play.

More spectacular than either Stagg or Yost was Glenn S. "Pop" Warner who took over the football team at the Carlisle Indian School in 1899 and subsequently introduced the unbalanced line with single and double wing backs to create what was called the "Warming up" play.

Professional football started at Latrobe, Pa., in 1895, the National Football League was formed in 1921 and in 1966 the American Football League.
