Phi Chi Mu Beta, science fraternity, is helping with the 6th Annual Northeastern Alabama Regional Junior Academy Science Fair. The members are helping to arrange display areas, act as assistants by setting up displays, assisting judges, acting as guides, and showing a movie on Friday in Leone Cole Auditorium. After the Science Fair, they will help with the cleaning up.

The fraternity is giving three awards, using members from the fraternity as judges. The awards are a Handbook of Chemistry and Physics, 45th edition, for each division. Chemistry judges are J.D. Warren, Robert F. Smith, and Avone Allen. The biology judges are Martha Greathouse, Janet Fisher, and Helen Murphy. The math and physics judges are Doyle Howard, Doug Matson, and Jane Grambling.

The awards will be presented by Frank Duckett, president, at the general assembly in Leone Cole Auditorium at 10:30 on Saturday, March 27, 1965.

--- Anita Erskine

Who Will Be Queen

One of these lovely ladies will be crowned "Queen of the Ball" during the halftime ceremonies of the ROTC Brigade Ball. Other activities at the halftime will include a resume of ROTC events this year and a leadout featuring the advanced course cadets and sponsors. The ball will be held from 8 to 12 p.m., March 30, in Leone Cole Auditorium. The Jimmy Dorsey Orches-
Mr. And Miss Friendly

Mr. and Miss JSC Named

Jacksonville State College students balloted on two important titles recently and results were made public last week.

Mary Ann McCurdy of Huntsville, and Tony Normand of Birmingham, both seniors, were selected Mr. and Miss Friendly, a coveted honor.

All four have been outstanding in extra-curricular activities and have received many honors during their college attendance. Mary Ann was "Miss Homecoming" for 1964 and is identified with a number of organizations. Tony is president of the Student Government Association, senior class favorite, and has been a leader in student affairs. Gail is secretary of the Student Government Association; Charles is secretary of Sigma Tau Delta, a leader in the local and state BSU, and both are active in Baptist student affairs.

JSC Enjoys Performance Given by Vivica Linfors

Vivica Linfors, the beautiful Swedish star of stage, screen and television, appeared before the student body at Leon Cole Auditorium on March 10. Miss Linfors dressed simply in a black and white shift, read selections from the works of Bert Brecht, told of Brecht's life, and sang Broadway songs such as "Omar." Her great enthusiasm and love for the theatre was apparent as she read so beautifully and effectively poems by Brecht. After her presentation of these works of Brecht, Miss Linfors answered questions for the audience about Brecht, the theatre, television, and all media of entertainment.

A graduate of Sweden's Royal Dramatic Theatre, Miss Linfors is a popular Ben Casey show, which was televised on March 1. Miss Linfors very effectively presented to the audience her interpretation of the works she read, and her love of the theatre was apparent as she gave a beautiful performance.

Welcome, Science Fair Students

There will be a COLLEGIAN staff meeting Monday night in Room 217. All staff members are urged to be present.

All students who worked during registration and those being paid on the COLLEGIAN may pick up their checks at the business office beginning March 24-26.
Compliance To Civil Rights Law

Is money taken from the Federal Government tainted? Does it exude some ghastly odor? Does adoption of it reduce the receiver into servitude or to some lower position in life?

Perhaps this is the attitude of some. These people would refuse needed money for educational work. They would refuse because the signing of a pledge to comply to desegregation is required. This pledge differs only slightly from pledges that have been signed by state officials in past years.

If a more practical reason is desired, the federal government could not offer the same positive and inspiring change as the state government. If one looks at the problems caused by segregation, it becomes clear that the federal government is working to solve them. The federal government is not the only one working to solve these problems, but it is certainly one of the most effective.

Public Opinion

Recently Rep. Glenn Anderson called upon the federal government to retaliate if the state of Alabama fails to adopt the federal non-compliance pledge. Anderson, a member of the House of Representatives, said that if the state does not adopt the non-compliance pledge, the federal government should refuse to grant any federal aid to the state.

In a large number of cases, the decision of what to pursue is not definitive. Some students are already sure of their chosen field, but what of the many who are undecided? And if no opinion is expressed, they will have much company in defeat.

Expanded Counseling Service

In between exams and dates, the world, is becoming more and more crowded. There will be shoutings, laughter, and other distractions in the valley of this world. Recognize your responsibilities and do not shirk them. Your future is in your own hands, government, and to be willing to share its responsibilities.

Expanded Counseling Service

Large scale. But if such a system could be set up, the amount of aid could be doubled, or tripled, or even more. Getting close to Jax State, many of the buildings on this campus were not here but were not for federal funds. Because of this, we hesitate to use them.

If the advocates of non-compliance were followed many from here who depend upon the federal government. Student Loans would be forced to drop out and go home. If they were not for the surplus food program available to the college, this could be considerably higher in cost. Do we eat our meals reluctantly because they are made cheaper through federal aid?

Public Opinion

In between exams and dates, this is one of the most important decisions of our lives. This semester we will hold the first meeting of the Student Government Association. Many will laugh and neither care for, nor think much of this. Yet in a few days to come those very students will mean something. Contingent leaders will have to make decisions in their personal work and in these positions. Does he or she have the skill and ability of those elected?

Vote and be a part of your student government. Recognize your responsibilities and do not shirk them. Your future is in your own hands!
Leadership of the free world, we must emphasize science. If this country is to maintain its position of knowledge; if we are to continue to explain unknown worlds of them, is the field of philosophy. The most important fields in the meantime.

And this is fine; if we are to continue to explain unknown worlds of knowledge, if we are to continue to study the sick, the dead, and disease. If this country is to maintain its leadership of the free world, we must pursue science.

But let us not forget other important fields in the meantime. One of these fields, which actually involves all of them, is the field of philosophy. Science tells us how; philosophy tells us why. Science tells us how to find certain things, philosophy tells us why we want to find them. Science tells us how we exist; philosophy tells us why we exist. Science describes life, philosophy interprets it.

In general, philosophy tries to expose the mind to different ideas. Both man and the world around him, with the hope that better understanding will result in enhancing his ability to pursue life in the most beneficial manner.

Certainly our modern society needs a better understanding between its members. Because of this lack of understanding, there is no common frame of reference to permit true communication.

All this should not be interpreted to mean that philosophy is fixed within certain bounds; that it consists of set attitudes. There have been many philosophers and many different philosophies. One of the foremost reasons that different kinds of philosophies is that the philosopher who produced them did so at different times and in different places. Consequently, they had different ideas concerning the pressures on them which produced different attitudes toward life. The philosopher tries to evaluate man's relationship to his environment; thus, his philosophy will depend, to a large extent on the attitudes which he has developed toward life around from thought.

Could it be that we have a need for more philosophers in our modern society? Is it conceivable that the present omni-present threat to world peace are the consequence of giantic advances in science, made without the support of interpreted philosophies for their direction and meaning? Or is the world situation supposed to be this way? Is the world really in excellent condition and we just need someone to explain that to us.

At any rate philosophy can answer questions for us which science cannot answer. There are still some things which cannot be derived from a formula or a test tube. As long as this is true, there will be a need for philosophy. And the glory of philosophy is that in addition to the values of philosophy--it is a very interesting subject to study.

by H. H.

Philosophy And Science

This is the age of science. Science is employed in education, in industry, and in government. Science holds the key to victory in the United States and Russia. Everywhere we turn we see the emphasis in fields of science.

Science tells us how; philosophy tells us why. Science tells us why we exist. Science describes man and the world around him. One of the most important of these is the relationship to his environment; the other is the role of his culture in his life.

Science holds the key to victory if these reasons seem drab to you, you are probably not expressing your true feelings. But let us not forget other important fields in the meantime. One of these fields, which actually involves all of them, is the field of philosophy. Science tells us how; philosophy tells us why. Science tells us how to find certain things, philosophy tells us why we want to find them. Science tells us how we exist; philosophy tells us why we exist. Science describes life, philosophy interprets it.

In general, philosophy tries to expose the mind to different ideas. Both man and the world around him, with the hope that better understanding will result in enhancing his ability to pursue life in the most beneficial manner.

Letter To The Editor

The editor of the Collegian has received a letter from Leonard Pratt of Bastrop, La., soliciting aid in finding a new singer for his singing group, preferably from the University of Alabama, to record a special new song to help advertise the state of Alabama and boost its tourist program.

Gov. George C. Wallace and Ed Ewing, state public director, are interested in the project, and prof-

Are we still ready to adopt such a system? If the recording is successful the same singer or group may be used to make an album about the state, with several other songs written by Mr. Pratt. Further details on the recording will be donated to Alabama charities, amateur baseball and CAP.

Collegian Staff

Editor - Donna Browning

Assoc. Editor - Harold Hodges

Feature Editor - Benny Character

Sports Editor - Joe Servis

Circulation Manager - Raymond Lilly

Staff Writers

Micky Craton, Barbara Downing, Cynthia Linehan, Dr. Elton C. Talley, Gloria McDonald, Anita Erskine, Jimmy Bush, Joyce Gilbert, Sandra Gaskin, John Gregg, Therom Hendrix, Pat Stevens, Benny Character and Joe Stahlkuppe.

Several recording companies have expressed an interest in recording the song which will be entitled "Alabama Land" or "Alabama's Song".

The song is entitled "Alabama Land" or "Alabama's Song."
**Senior Spotlight**

Stepping into our spotlight this week is pretty petite Linda Cheatwood, daughter of Mr. and Mrs. William G. Cheatwood, of Tampa, Fla. In May our senior will graduate with a BS degree in secondary education and a double minor in history and political science.

Linda's honors began at Winter Haven High School as a member of the National Honor Society. She graduated in the top 20 of her class.

Here at JSC she is a member of the Sigma Tau Delta and the Student NEA. Linda participated in SCAOG last semester; she played with the Southerners in her sophomore year, and for the past two years she has been in a marching band.

"My most enjoyable activity in college is being a ballerina. I think I worked with a great group of girls, and I have many wonderful experiences. I will especially remember our trip to Washington," says Linda.

Other favorites of our favorite senior are: the color lavender, eating spaghetti, water skiing, sewing, playing the piano, and reading the works of Lloyd C. Douglas. Her favorite expression, from which we can all take a lesson, is "Never, trouble trouble until trouble troubles you."

Concerning her attitude toward leaving JSC, Linda, a member of the Student Association and the Student Council, says: "I hate to leave Jacksonville. As long as I stay here, I am happy."

**Larry Ray**

Clay County High School in 1961, in high school he made good grades, Larry was very active in extra-curricular activities. For example, he played football two years, was vice-president of the athletic club, and president of the Larkin Club.

Larry came to Jax State in June of 1963 after he graduated from high school. In the four years that Larry has been here he has noticed most the many changes that have taken place on this campus. There has been a tremendous growth in both student enrollment and the campus itself.

"Since I first came here in 1963," he said, "there have been many additions such as the Student Union, the International House, a new auditorium, and two or three new dorms." When asked what other changes he has noted, Larry emphatically replied, "The registration lines are longer, but all in all, Jacksonville is still a mighty friendly school and we have enjoyed our stay here."

Here at JSC Larry has really been busy both with scholastic and extra-curricular activities. He is a member of the Gamma Mu and last year he was president of the Moscowian Club.

**Baptist Youth Week Is Held**

The week of March 7 through March 14 was a busy one for all Youth Week officers and BSU STUDENTS taking part in Baptist Youth Week were from left to right: Wayne Morris, associate pastor; Charles Gamble, pastor; Jo Anne Howard, BSU director; Bill Castile, associate pastor; Philip Hart, minister of music; (not shown) George Barnett, associate pastor.

**BSU News**

A conference for college students of the Southern Baptist Convention was held at Southwestern Theological Seminary in Fort Worth, Tex., on March 5-7. The theme of the conference was "As Ye Are Going - Love, Disciple, Overthrow, Observe." Among the conference attendees were Tony Odom and George Barnett, foreign mission volunteers who want to use their lives to minister to people who haven't heard the gospel and to people who need help. They have been especially interested in the people of East Africa. At the conference they learned about the religious, educational, and medical needs of these people. Also, they learned of the qualifications of a missionary.
**JSC Rifle Team Chalks Up Losses And Wins**

**MARRION—**The Jax State rifle team again made the long trip to Marion, Feb 24, with results similar to the previous weekend.

The Alabama intercollegiate rifle match was being held that weekend and Jax State was placing its championship title right on the line.

The individual match was held on Friday afternoon and shooters from Auburn topped the first three places. On Saturday the team match was held and Marion Institute came away with all honors. The high score for Marion was Henderson with 278.

Of the five schools entered in the match—University of Alabama, Auburn, Marion, Jacksonville and Florence—Jax State defeated only Florence.

**FORT MCCLELLAN—**One shooter—shooter rifle match was held at Fort McClellan on March 6.

Teams shooting in the match at Fort McClellan were Florence State College, Jacksonville State College and Tuskegee Institute.

Jax State thoroughly defeated both of the aforementioned teams by a score of 12-4 for Jax State to 10-4 for Florence State and 19-0 for Tuskegee Institute.

Top scorer for Jax State was Jerry Medders with a total of 264.

---

**Linda Cheatwood**

stated, "During my four years at Jacksonville State University, it has been a school where every student will always take pride in claiming. Some day I expect that it will be a great university." Linda is presently doing her final research teaching at Alexander State College where she teaches three sections of twelfth-graders daily. After graduation, she hopes to teach in a church, and senior English.

Also in Linda's plans is a marriage this summer to Harold Moody from Atlanta, Ga.

**BARNETT**

They feel that the conference has drawn them closer to their church and has helped

---

**Nicholas**

his high school Beta Club, school paper staff, and editor of his high school yearbook. He was chosen to attend Boys State and was a RA counselor in his local church. As college Jim's activities include the BSU, Pi Mu Chi Beta, and the Sigma Eta.

We at Jax State should truly be proud of this young man. His efforts have only one more purpose. They are to work through clubs, organizations, and other media of communication in the background to provide for and carry on the good name of Jacksonville State College. We should look to his example and have served as SGA representative. Larry is presently a member of Pi Gamma Mu and last year he was president of the Accounting Club.

Working and going to school at the same time has been another reflection of Larry's industry. During his sophomore year, Larry worked in the same time and since June 1961, he has worked part time at the Ansonia Credit Union as manager bookkeeper of the post restaurant fund.

Larry's work, however, doesn't end here for he is also a counselor at Lutrell. One of the boys who lives on his hall under his counselorship is Larry up as, "One of the greatest guys I have ever known.'

As for hobbies, Larry is an all-around sports fan. In fact, one might say that sports are Larry's hobbies. He loves all kinds of sports but especially football and golf.

With a major in accounting and a minor in economics, Larry plans to graduate this May. After graduation he hopes to work with an accounting firm around Anniston. Larry also hopes to attend a graduate school for two or three years and maybe get a master's degree in accounting.

---

Sports Staff Writers--Lou Botta And Mac Parsons

Tucker And Jones Most Valuable Players

Gary Tucker, Jacksonville’s six-foot two-inch tackle was named most valuable player for the 1964 football season. Gary, who wore jersey number seventy-five last season, is a big, strong, and quick ball player. Weighing 235, he can run the 50-yard dash in 6.1 seconds and has hit an even 6 before. Gary made all-state when he was in high school.

Tucker, whose home is in Gadsden, was presented the SGA Outstanding Player Plaque by SGA president Tony Normand, at the annual football and basketball banquet.

Bill Jones, Jacksonville’s 6-4 guard from Guntersville, was also presented a trophy for outstanding player for the 1964-1965 basketball season.

Bill played at Snead Junior College last season and made all-conference team. He was also second leading scorer in that conference. Bill played exceptionally well this season for the Gamecocks.

Jones, as well as Tucker, was chosen by fellow teammates.

Tennis Results

Andrews (AC) defeated Hamlin (JSC) 7-5, 6-1
Mann (JSC) defeated Peavy (AC) 7-5, 4-6, 6-2
Taylor (AC) defeated Wamba (JSC) 6-2, 6-1, 6-2
Ellard (JSC) defeated Kridakorn (AC) 2-6, 6-1, 6-2

GIRLS, GIRLS, GIRLS--This year the J Club presented to the students and faculty a “Womanless Wedding.” This project, by the J Club, was a fund raising project which proved to be very funny to the students and especially to the new members of the J Club.
Jax State Netters Win Opener

The Jax State tennis team got a sweet revenge by defeating the Alabama College Falcons, by a score of 5-4, in an ACC match played at Montevallo on March 15. Defeated twice by the Falcons last season, the Gamecocks fought from behind by taking No. 6 singles, No. 2 and No. 3 doubles for their first victory of the season. With the score 4-6 in the favor of the Falcons, the double team of Hershell Turner and John Mann captured their double match, and moments later the team of Steve Ellard and Terry Mathews won the match for Jax State with a win in the No. 3 doubles. Another bright sport was the victory by Johnny Castleberry in the No. 6 singles, as Johnny was playing in his first match, and his victory was important to the team.

Coach Ronnie Harris was pleased with the way his new men handled themselves, and was also pleased by the play of his veterans.

The Gamecocks’ first home match will be played this coming Saturday, March 27, and will be against Florence State.

Spec. Five, B.J. Bearden Reenlisted

Specialist Five Bobby J. Bearden of the U.S. Army Instructor Group (US, ROTC) at Jacksonville State College, reenlisted in the Regular Army for a period of six years on March 13. He was sworn in by Lt. Col. Jean R. Emery, assistant PMS.

In the spring of 1965, Specialist Bearden was from Gadsden, and has been at Jacksonville State College since October, 1963. Prior to his present assignment, he served at Port Benning, Ga. His military career, which began in May 1956, has taken him to assignments in Europe, Korea and throughout the United States.

Intramural News With Mac Parsons

The big news in Intramural Sports this time is the girls volleyball tournament. Ten teams have been entered in the skirt league. The team to watch in this league is the Romperettes, coached by Everett Ringer and Linda Amos. Because of limited space there will be only two softball leagues this year. One will play at 8:30 p.m. and the other at 4:30 p.m. Anyone wanting to form a team should ask for the most convenient time. Two weeks ago this writer was guest speaker at the Nannie’s Awards Dinner at Zuma’s Café. The Nannies won the softball championship last year. Guest were served 156 burgers. Wolley Parker was voted outstanding player. Coach Ricky Higgins said “Parker was as big as any other two men on the team.” He continued to say that Parker “was as big as any other two men on the team.” The Nannies have just returned from spring training which was held in Panama City, Fla.
