

Browder runs for House seat

Browder

Glen Browder, a 39-year-old Williams Community resident who teaches political science at Jacksonville State University, has announced that he will run for the Alabama Legislature from House District 57.

That district includes Jacksonville, Piedmont, Weaver, and most of rural Calhoun County under the reapportionment plan submitted by the Legislature for the U.S. Justice Department. The current

representative, Gerald Willis of Nances Creek community, is not seeking reelection.

In announcing his intention to run, Browder said that he will take a personal tour and poll of the district before officially qualifying for the position.

"I have some strong convictions about what our area and state need. I think that, basically, we have got to restore some common sense and moral leadership to government. However, I want to talk with the people about these ideas before making any definite plans."

During this month, he says that he will be visiting in 15 homes throughout the district. "These families have been kind enough to invite me and their friends and neighbors into their living rooms so that I can say how I feel about things and they can tell me what's on their minds."

Browder says that he will report back to the public after his tour. "In one month, I will officially qualify for this position and I will share, in a public meeting, the results of my living-room poll."

Browder, who has a wife (Becky) and a seven year-old daughter (Jenny Rebecca), has taught at JSU for the past 11 years. He presently represents District 57 on the State Democratic Executive Committee; and he has been active in local, state, and national political affairs.

Felgar presents scholarship

Dr. Robert Felgar, III, chairman of the William J. Calvert, Jr. Scholarship Committee, makes the first presentation to Bert

Spence as Dr. and Mrs. Calvert enjoy the occasion in their home.

Calvert Scholarship awarded

An aspiring actor and management intern for the Alabama Shakespeare Festival has become the first recipient of the William J. Calvert Scholarship presented by the English department.

Elwyn Berton Spence, 19, son of Mr. and Mrs. Elwyn A. Spence of Anniston, an English major and drama minor, will receive full tuition for the 1982-83 academic year.

Spence, currently listing a 2.9 grade point

average, was among four English majors vying for the prestigious award named in honor of Calvert, a Harvard graduate and authority on the poet Lord Byron.

Calvert retired as dean of the College of Arts and Sciences in 1972 following a career at JSU that spanned 39 years. The Calvert Scholarship is the first to be named after an outstanding former JSU professor.

Dr. Robert P. Felgar, III, associate
(See SCHOLARSHIP, Page 7)

Art students make pottery

A Fifth Century, B.C. pottery-making method—using a kiln hollowed into a creek bank—was used successfully by Jacksonville State University art students recently to create dozens of ceramic bowls. The mini-master workshop in experimental and primitive firing techniques was taught by Lee Manners, bottom left, JSU associate professor of art, who said the idea for the course was inspired by a former student. The creek bank kiln is created by digging a three to four foot vertical hole at the top of the bank and intersecting it with a fire chamber dug into the bank at a right angle. Manners examines a recently-fired artwork as the students look on. From left to right are (top) Paula Vreath of Gadsden, Paul Hutchinson of Anniston, Marycatherine Link of Anniston, David Pond of Anniston, Doug Manners of Jacksonville, Shirley Wiltshire of Anniston, Milton Eptine of Birmingham, and (bottom) Keaton Manners of Jacksonville.

Wilson to attend conference

Dr. Jerry Wilson of Jacksonville, associate professor of philosophy at Jacksonville State University, is among a select group of 25 professors who will attend a special conference on philosophy and ethics at State University of New York at Binghamton July 12-August 6. He will join in on discussions dealing with current ethical and philosophical problems. Wilson will incorporate ideas and research findings discussed at the conference into an ethics course to be taught at JSU next year. Wilson, 43, is chairman of the

Wilson

JSU psychology department and author of *Death by Decision*, a book on mercy killings published in 1975. Participants were chosen on the basis of their ability to contribute ideas and on the likelihood that they will actively teach courses on ethics in the future.

JSU: An intregal part of Calhoun County

Jacksonville State University has a net economic impact of approximately \$20.5 million annually on the economy of Calhoun County.

This is the conclusion of university administrators and Dr. Donald Paxton, chairman of the JSU department of economics, following an informal look at ways the university affects the Calhoun County economy.

They estimate that approximately 70 percent of the university's \$19.6 million budget is spent within the Calhoun County area where it is multiplied as much as 1.5 times. Thus, the initial direct financial impact of JSU is approximately \$13.7 million and the final net economic impact is as much as \$20.5 million. This estimate does not include the impact of a 7,000-member student body. The students spend inestimable amounts for food, clothing, entertainment and other items.

Although no precise economic figures are available, the estimates are based upon universal economic assumptions and an informal look at the university as an export-oriented enterprise. In economic base studies, institutions which derive most of their income from outside their immediate environs are classified as export-oriented. JSU derives approximately 70 percent of its total revenue from outside sources (government allocations) and 30 percent from fees, tuition, and local receipts.

The net economic effect of the university outlay in Calhoun County is measured as a multiple of one dollar. The magnitude of this multiplier effect depends upon, generally, the degree to which additional income generated through the university tends to stay within the community. Determining the net economic impact of an institution as large as Jacksonville State University is subject to error. Estimating the net impact starts with a review of initial expenditures.

During the period from October 1, 1980 to September 30, 1981, JSU paid \$10,561,060 for

salaries and wages, \$1,148,698 for supplies, \$1,367,485 for equipment, \$1,067,095 for student wages and scholarships, and \$1,839,186 for grants and awards to students. Approximately \$7.1 million of the yearly aggregate expenditure represents non-labor outlays and about \$1.9 million of this is non-local. Remaining budget items must be classified into outlays destined for labor (faculty, administration, and support personnel) and non-labor items. The non-labor expenditures must be analyzed to determine the proportion of those expenditures finally destined for the local community.

While the initial direct financial impact of JSU is approximately \$13.7 million, Paxton said one may estimate the multiplier effect to be between 1.25 and 1.5 assuming there is a reasonable propensity by consumers, investors, and government to spend locally. Therefore, the final, net economic impact of JSU locally may be as high as \$20.5 million or as low as \$17.1 million. To state the case negatively, the net economic loss to the county would far exceed the university's local direct expenditures should JSU fail as a financially stable institution.

Paxton said the university "is a prime mover of the local economy with respect to employment, income, or whatever other measure one adopts. In this sense, the county is linked to and its economic well-being is dependent upon the level of economic activity generated by the university."

Jacksonville State University, in this respect, is not significantly different from an industry which sells the bulk of its output to parties outside Calhoun County. The incoming revenue for an industrial concern is not significantly different than tuition, federal grants, and state funds which constitute the greatest part of the university budget.

Many intangible long-range benefits accrue to the county as well as the more

concrete financial assets. Among these:

-The tapping of the expertise of the faculty, administration, and student body by business, government, and the community through consulting work, student internships, and memberships in secular and religious organizations.

-The attraction of new industry based upon the pool of resources and skills represented by the university.

-The attraction of people outside the local economy who participate in cultural events at the university.

-The effect of credit base expansion attributed to university deposits in local banks.

In terms of jobs, the university employs 550 faculty and staff personnel. However, many additional job openings occur as a spin-off of growth within the university. For example, the university will spend approximately \$3.5 million this year for renovations and additions to university facilities. The work is expected to create dozens of new jobs as contractors add additional laborers.

As mentioned earlier, the student body is another often overlooked economic asset. Money spent by some students represents a

transfer of funds from the university in the form of tuition scholarships and grants. However, the students spend large amounts annually for personal items and entertainment. Their positive economic influence also includes:

-Fund-raising. JSU sororities are among the top groups in the county to raise funds for the American Cancer Society and other student groups raise funds for Muscular Dystrophy, Heart Fund, and other causes.

-Entertainment. Concerts and other events attract large audiences from outside the local area. The JSU athletics program also attracts thousands of out-of-town visitors each year.

These statements also apply for faculty. The Small Business Development Center of the College of Commerce and Business Administration provides free advice and other assistance to local businessmen. Faculty and students provide health care for up to 300 families per month at the Family Health Care Center in the College of Nursing. These are only two of many examples.

In conclusion, the University exerts a pervasive impact upon the economy of Calhoun County and this total impact cannot be measured by economic data alone.

Faculty awards presented

Cash awards totaling \$10,000 have been presented to ten Jacksonville State University faculty members engaged in independent research.

Projects funded by the Faculty Research Committee include research on the French revolution and a study of behavior.

Dr. Ronald Caldwell, associate professor of history, will use his \$2,045 award to pay expenses he will incur while touring France collecting information for an extensive bibliography on the French revolution. Caldwell began work on the project several years ago.

Dr. William Palya, associate professor of psychology, will use his \$1,240 award to explore basic learning processes in sub-human species.

"It's interesting to note that we had 17 faculty members who applied for awards and that of the 17 we had funded 10," said Dr. James Reaves, vice president for academic affairs.

"We're very enthusiastic about the work of the Faculty Research Committee and about the requests from the faculty and we're expecting in years to come that this will be increased. We certainly are appreciative that Dr. Montgomery (JSU president) provided the funds and the support that was necessary."

Reaves said all data derived from the funded projects will be shared with the university faculty.

Other award recipients are:

-Dr. Franklee Whartenby, associate professor of economics, \$750 for a study of the relationship between economic and demographic factors in the south.

-Dr. Steve Bitgood, associate professor of psychology, \$1,180 for a project on math tutoring.

-Dr. Jimmy Lindsey, assistant professor of learning disabilities, \$1,000 to study "the computer and the exceptional child."

-Dr. Ken Landers, professor of biology, \$400 to study vascular flora.

-Dr. Ted Klimasewski, associate professor of geography, \$630 to study terrorism.

-Dr. Mary Martha Thomas, associate professor of history, \$300 to study "Women in Alabama; World War II."

-Dr. John Van Cleave, associate professor of mathematics, \$960 to develop a mathematical model of command and control operating systems.

-Dr. Jim Roberts, associate professor of music, \$995 for a project on "Alfred Einstein music collection."

JSU Faculty - Staff earn degrees

Two staff members and one professor at Jacksonville State University recently acquired the Doctor of Education Degree (Ed. D.) during spring commencement at the University of Alabama at Tuscaloosa. Dr. Jerry D. Smith of Collinsville, university registrar, far left, Dr. Alice Nabors Mayes

of Glencoe, counselor, Career Development and Counseling Center, and Dr. Johnny Smith of Collinsville, assistant professor of mathematics, long-time employees of JSU, completed requirements for the terminal degree over a period of several years.

Bookstore to move

The JSU bookstore is presently in the process of moving into the second floor of the Theron Montgomery Building while the recreation center, which previously occupied the space, has been shifted to Anders Hall. The bookstore move is expected to be completed in time for the fall semester rush.

Announcements

The next issue of *The Chanticleer* will be distributed on Thursday, July 29th. The deadline for material to be turned in to *The Chanticleer* for publication is Friday, July 23rd. Material can be sent through campus mail to *The Chanticleer* or hand carried to *The Chanticleer* office in room 102 TMB.

Shakespeare Festival

The Shakespeare Festival for 1982 promises to be an interesting, exciting one. For a preview of that season, the public is cordially invited to the festival theater, the An-niston High School Auditorium. At 4:30 p.m. on Sunday, July 11, the Festival guild is hosting an afternoon of entertainment and information about the plays. The directors, the designers will discuss their efforts in the plays and the actors will rehearse a scene from one of the plays, with some production. The refreshment time at 4:30 and the program should make for a lively afternoon and a stimulation for the festival plays.

Attention veterans!

If you have not completed a veteran registration card for Summer I, please do so immediately. No enrollment certification may be submitted to the Veterans Administration for any student who has failed to complete the veteran registration card. All veterans must complete a registration card each semester they are enrolled. Again, if you have not completed this card, please come by the VA Office in room 102 Bibb Graves Hall as soon as possible. The office is open from 8-12:00 and 1-4:30 Monday thru Friday. Your veteran benefits are at stake!

Requests required

Anyone wishing to put an announcement on the marquis on the outside of Theron Montgomery Building must send a typed request to the SGA Office on the 4th floor of the TMB one (1) week before the event. Anyone not sending a typed request will not have his announcement put up!!!

Stogner

Nielsen

Granger

Stogner to join financial aid

Mrs. Ellen Stogner, a native of Gadsden, has been named associate director of financial aid at Jacksonville State University. Mrs. Stogner's responsibilities include helping students apply for federal financial aid loans and grants and other forms of assistance. She received her bachelor's degree in business administration at Troy State University in 1977 and has been employed by Troy State University, University of Alabama, and First Bankers of Indian River County, Fla. She is the daughter of Mr. and Mrs. Jack McGowin of Decatur. Mrs. Stogner resides in Jacksonville.

Nielsen to chair session

Dr. Penny Nielsen, Associate Professor of Education, was invited to chair a session at the S.E. Regional International Reading Association in Orlando, FL. Dr. Nielsen is contributing editor for the *Alabama Reader* which published her article "Integrating Reading and the Arts". She has served as Vice President of Phi Delta Kappa and was a member of the nominating committee for Phi Delta Kappa.

Granger receives certificates

Dr. Parker Granger, chairman of the Jacksonville State University department of accounting, has received two certificates of appreciation from the Coosa Valley Chapter of the National Association of Accountants. Granger received the Distinguished Service Certificate in recognition of his service to the community as a professional, and a special certificate of appreciation for his contribution to management accounting by researching, developing, and writing a technical manuscript, "Payback Analysis: Practical Capital Budgeting." Granger is scheduled to preside over the group as president during the upcoming year.

Chat 'Em Inn changes hands

By R. STACY McCAIN

Students returning to JSU in the Fall will notice a change in the Chat'Em Inn snack bar, located on the second floor of the Theron Montgomery Building. The snack bar, which has been operated for the last five years by SAGA Foods, will now be run by Spartan Foods-owners of the Hardee's chain.

The change was made according to the recommendation of an ad hoc committee to Dr. Montgomery. Spartan Foods plans extensive changes in the physical structure of the snack bar, which will now feature a menu almost identical to Hardee's, but without a salad bar. Construction began on June 21 and will continue throughout the summer, with the new Chat 'Em opening in the fall.

SAGA will continue to operate Jack Hopper Dining Hall and plans to make \$100,000 worth of renovations to that facility. These renovations include improvements in the appearance and menu offerings of the dining hall.

Under the terms of the new, one-year contract between SAGA and J.S.U., the university has accepted a reduction in revenues from the cafeteria in order to prevent an increase in meal plan prices. Meal plan prices will remain the same in '82-'83 as they were in '81-'82.

While the Chat 'Em Inn is closed for the summer, an a la carte menu is available at SAGA's "Sunshine Room", located in the north end of Jack Hopper Dining Hall. This is open from 7:30 a.m. to 3:30 p.m. weekdays, with breakfast served from 7:30-11:00 a.m. and lunch 12:00-1:00 p.m.

Points Of View

Callahan found guilty

By TIM STRICKLAND

James Harvey Callahan is a name that became a household word in Calhoun County in February when Callahan became the prime suspect in the kidnap-murder case of Jacksonville State University co-ed Rebecca Suzanne Howell.

Becky, as she was known to friends, was a well-liked girl with a family, a fiance, a good job, and a bright future—a future she will never fulfill.

What about Callahan's future? It took only 2 hours for jurors to find him guilty of capital murder and recommend to Judge Sam Monk Callahan's death by electrocution. The decision was based on overwhelming factual evidence against Callahan. A majority of the local population applauded the decision, myself included.

Those of you that oppose the decision might argue that killing Callahan won't bring Becky back. True. But Becky isn't the one who is left to suffer. The sufferers are her family, her friends, her classmates—the people of whom Becky Howell's life was a part.

Actually, I think the decision to electrocute Callahan is a very humane one. If punishment were rendered to fit the crime, Callahan would have to have his hands taped together, be killed, and thrown in a creek.

It was said that Callahan sobbed as he was led from the courtroom following the announcement of the verdict. I imagine Becky Howell cried also—to no avail.

The President's men

By SUSIE IRWIN

Ten years ago, on June 17, 1972, an incident occurred inside the offices of the Democratic National Committee in the Watergate complex in Washington, D.C., which would eventually lead to the national scandal known as Watergate.

Rumblings in the administration were heard throughout the country. An ugly monster of inner corruption turned and faced the world, forced the President to resign and eventually led others to prison.

Where are those people now?

Richard M. Nixon

At 69, Richard Nixon presently lives in Saddle River, N.J., where he is treated with all the respect of an elder statesman. He draws \$85,000 per year in federal pensions and receives free offices, clerical help, and Secret Service protection.

John N. Mitchell

Now 68, Mitchell works in Washington, D.C., as a consultant to business firms.

H.R. Haldeman

Haldeman, 55, serves as vice-president of a real estate-development firm in Los Angeles.

John D. Ehrlichman

Today at 57, Ehrlichman has turned to writing. His first book about the White House days, *Witness to Power*, was followed by two novels, *The Company* and *The Whole Truth*.

John W. Dean, III

Dean wrote a successful account of his White House days called *Blind Ambition: The White House Years*. Now, at 43, Dean produces radio and television shows in Los Angeles.

Charles W. Colson

Colson uses earnings from his books, *Born Again* and *Life Sentence* to support a nonprofit organization known as 'Prison Fellowship', which he co-founded.

Jeb Stuart Magruder

Magruder, 48, now serves as associate pastor at the First Presbyterian Church in Burlingame, California.

G. Gordon Liddy

Liddy has found profit in lecturing and writing books. His autobiography, *Will*, was transformed into a successful television movie. At 51, Liddy controls a company which provides security services in industrial areas.

E. Howard Hunt

Hunt now writes spy fiction in Miami, Florida. He is 63.

Letter to the Editor

Dear Editor,

We are submitting the following comments concerning the jury of the Hinckley trial. There seems to be a lot of confusion concerning the extent of a jury's power. Our contention is that a jury not only rules on guilt or innocence in a court of law, but also has authority to determine the constitutionality of the law itself—even before a decision is made as to "guilt" or "innocence".

Two jurors on the Hinckley jury cried about the law not being right (Constitutional). Well, why didn't they render a decision on the Constitutionality of the "Insanity" law? Why didn't they refuse to follow the directions of the judge concerning the insanity plea?

Our American Constitution placed the ultimate decision in a court of law in the hands of the people—a Jury by Peers. The government, the judge, or even the Supreme Court is not the ultimate authority under the American Constitution. The government was meant to be a servant, not master, of the people. A jury of peers is the people, and, therefore, the ultimate judge of the law.

I agree that the insanity plea is unconstitutional as presently written. As a jury it would be appropriate to disregard an unconstitutional law, ruling, or even the instructions of a Judge pertaining thereto. What would be the result of this course of action? (1) A single juror could convince the other 11 jurors that the law is unconstitutional, and thus should be ignored in making a verdict. The Jury would simply decide if the defendant were "guilty" or "not guilty" of the alleged crime, and write in their verdict statement that the "Insanity" law is unconstitutional. (2) A single juror could bring about a "hung jury". The government would be instructed to hold a new trial with a new jury, which would be instructed on the reasons the first jury was hung. The new trial would obviously center around the Constitutionality of the "Insanity" law as presently written, with the jury returning the verdict.

It is jurors who give in to the "pressures of the system" that are responsible for bad laws continuing in effect. Let us become better educated of our rights as American citizens, and then stand up for those rights when called upon for jury duty.

For more information on the RIGHTS of you, the JUROR, write to:
Washington's Vision Newsletter
Rt. 2, Box 179-G
Eclectic, AL 36024

We'd like to read a response to this editorial from a member of the Bench.

Sincerely,
Gary E. Hanson

The Chanticleer

The Chanticleer, established as a student newspaper at Jacksonville State in 1934, is published each Thursday by students of the University. Signed columns represent the opinion of the writer while unsigned editorials represent the opinion of the Executive Editorial Committee. Editorials do not necessarily reflect the policy of the JSU administration.

Editor In Chief Tim Strickland
Associate Editor Susie Irwin
Associate Editor Lynn LePine
Sports Editor Alison Andrews

The Chanticleer offices are located on the bottom floor of the Student Commons Building, Room 102

All correspondence should be directed to The Chanticleer, Box 56, Jacksonville State University, Jacksonville, Alabama, 36265.

Cyclists 'get no respect'

By BILL BARRETT

Layin' back and crusin' along, enjoying the wind in my face and loving the power of the machine under me - I'm a cyclist.

Quite a few folks at this university ride motorcycles while many more find bicycles practical for their transportation needs. It is for this reason I feel compelled - no, obligated to write this article.

It is evident that many people in the Jacksonville area have never ridden a motorcycle. If they had, maybe they would have more respect for them. Take my experiences from last week, for example, when no less than a dozen cars pulled out in front of me. Two of the incidents nearly converted my motorcycle and me into hood ornaments.

I followed one of the close-call drivers and asked her if she had seen me coming (I always ride with my headlight on).

"Yes, I saw you," she honestly answered, "But I knew you couldn't be going very fast on a motorcycle."

I held my temper because I realized the woman was obviously ignorant when it came to two-wheelers. Some cyclists, however, are not very understanding when

they have just come within inches of being possibly paralyzed or killed. In fact, I know of several instances in which the inconsiderate auto driver has paid for his actions with kicked in doors, smashed windows, and even a bloody nose.

I realize that a motorcycle is not as easy to see as a car, especially if one is just glancing quickly left and right. I can forgive such mistakes; they're bound to happen. It's those persons who don't respect any vehicle with less than four wheels that rile me up.

Bicyclists around campus probably have more gripes than motorcyclist. They must often feel like Rodney Dangerfield because they "get no respect". If you asked many car drivers, "which is traveling faster a bicycle going 30 mph or a car going 30 mph?" Many of them would probably say "the car".

A good rule for automobile drivers to follow is to treat motorcycles and bicycles as if they are cars.

Another good rule, this one for the cyclist, is to be careful and drive defensively, because not all automobile drivers are going to follow the other rule.

JSU purchases SSD

Dr. William Gardner, JSU associate professor of psychology, explains the use of a Sound Spectrographic Display as psychology students Ed Lovvorn of Newell and Donna Grant of Anniston look on. The

\$11,000 SSD will be used at Alabama Institute for Deaf and Blind in Talladega this fall to help deaf children improve their speech.

Deaf teens 'instruct' JSU students

Students from the Alabama School for the Deaf at Talladega participated in classroom lectures in sensory impairment and language acquisition recently at Jacksonville State University. Psychology students received three credit hours for the mini-mester course. The ASD students demonstrated sign language and a staff member of Alabama Institute for Deaf and

Blind lectured on communications for the deaf. Dr. William Gardner, top left, JSU associate professor of psychology, and Paula Wade, top right, director of field services at AIDB, look on as JSU student Gary Seel of Birmingham signs a message to Shannon McCroskey, 12, a seventh grader at the Talladega school.

JSU machine to aid the deaf

By SUSIE IRWIN

A device recently purchased by JSU could allow deaf children at the Alabama Institute for the Deaf and Blind (AIDB) to "hear with their eyes," said JSU psycholinguist Dr. William Gardner.

Children with speech problems and even those born deaf can improve their speech with the aid of a new device called a Sound Spectrographic Display (SSD). The machine is the only one of its kind in Alabama and is one of fewer than 100 in existence.

This fall, JSU and AIDB will begin a special program which will enable students at the Institution to benefit from the SSD.

By transforming speech into visual patterns on a split-image video screen, the \$11,000 SSD can present all aspects of speech in real time (simultaneously with speaking) or recorded and frozen for closer examination.

"For perhaps the first time, a deaf person may be able to 'hear' a bird sing or a dog bark, or 'hear' a child cry, Dr. Gardner said.

But, most important, they will be able to 'hear' someone speak to them. They 'hear' the sounds with their eyes—they can see the dimensions and characteristics on the SSD screen as the sound is occurring."

Although to the untrained eye the screen of the SSD shows only a sketched "blur," Dr. Gardner maintains that with explanation the shades take on forms representing the different sounds in speech.

The height of the image on the video screen varies with the frequency of the sound as the darkness varies with the intensity of the sound.

Equipped with a split screen, the SSD enables an instructor and a student to compare images produced by their voices as they speak.

"It's definitely the most sophisticated device on the market today," said psychology instructor Dr. Gardner.

"Some of our students here at JSU are already making rapid progress toward reading the images off the screen," Dr. Gardner said. "Learning to recognize sounds then words on the SSD will be like learning a foreign language."

For hearing impaired students at the AIDB, the SSD will be used on a cooperative basis for service and evaluation. At JSU, the machine will be used for a variety of scientific projects dealing with speech acquisition.

The SSD will remain on campus for the remainder of the summer where students will explore the capabilities and limitations of the machine. Research information gathered will be useful this fall when the SSD is brought to AIDB for speech training with deaf children.

Among those students interested in working with the SSD are Lillie Starkey, Donna Grant, Maria White, Gary Seel and Ed Lovvorn.

Dr. Gardner worked closely with AIDB representatives before deciding on the SSD as a means for speech training.

"It is the best hope right now in the affordable range for speech training for the deaf," Dr. Gardner explained. "At present, it is the only commercially available device that provides a total visual image of spoken language."

Financial aid adds programs

Federal financial aid assistance continues to be plentiful at Jacksonville State University.

Financial Aid Director Larry Smith said recently that University loan programs "will be in excellent shape in 1982-83." He said two new programs have been added.

The University will administer about \$4 million in funds during the next academic year.

Smith said the university administration believes no one should be denied a college education because of financial barriers. He said a variety of assistance programs, including grants, loans, campus jobs, and scholarships are available to eligible students.

Students may borrow up to \$6,000 as undergraduates and an aggregate amount of \$12,000 as graduate students under provisions of the National Direct Student Loan Program. Maximum National Direct Student Loans are approximately \$500 per fall and spring semesters. Small amounts are available for the summer terms.

"We expect that any student who is eligible and applies for the National Direct Student Loan will receive one. The academic requirements are that entering freshmen have a score of at least 16 on their ACT test to receive the loan," Smith said.

"The loan is need-based, meaning that eligibility is based on parents' and students' ability to pay college costs. Generally speaking, students whose family income is less than \$25,000 qualify for the loan. It is a longterm, low-interest—5 percent—loan which is funded by the federal government with ten percent institutional matching monies." He said the Federal Nursing Loan

Program is also need-based and has the same academic requirements.

The University Work Study Program has been expanded for the upcoming academic year. The program is also need-based.

"We don't yet know how much funding there will be for Pell Grants (basic federal aid) next year but we expect they will be approximately the same as this year (about \$2 million)," he said.

The Pell Grant Program provides about \$2 billion in assistance nationally.

"The major change in the Pell Grant Program will be students who will be receiving Social Security and-or veterans educational benefits may not qualify even though they receive a student aid report stating they are eligible. This is the first time this has ever taken place."

Smith said the university is adding two new loan programs—the Parent's Loan for Undergraduate Students (PLUS) and the Auxiliary Loan Program for independent and graduate students.

"These loans are not based on need. The borrower can receive up to \$3,000 per year and repayment begins 60 days after disbursement at 14 percent interest. Any bank, savings and loan institution, or credit union is eligible to participate in this program which is administered by the Alabama Guaranteed Student Loan Program in conjunction with the Alabama Commission on Higher Education.

"Many lenders in the Northeast Alabama Area participate in the Alabama Guaranteed Student Loan Program and it is anticipated they will also participate in the PLUS and Auxiliary Loan Programs."

Improved method of instruction

Dr. Claudia McDade of Gadsden and Dr. Charles Olander of Jacksonville, precision teaching experts at Jacksonville State University, have developed an improved method of instruction that enables almost

anyone to learn difficult course material with a high degree of fluency. They shared their findings during the annual meeting of the Association for Behavior Analysis in Milwaukee.

JSU develops new teaching methods

Two Jacksonville State University faculty members will travel to Wisconsin this weekend to tell about their pioneering work in the field of precision teaching.

Dr. Claudia McDade of Gadsden, director of the JSU Center for Individualized Instruction (CII), and Dr. Charles Olander of Jacksonville, associate director, have developed a method of instruction which enables almost anyone to learn highly technical course material with fluency.

They will share their findings with members of the Association for Behavior Analysis (ABA) at their annual meeting in Milwaukee Saturday and Sunday.

McDade and Olander have used the precision teaching method successfully with up to 500 students per semester for the past two years.

"We never think of a student as being too dumb to learn anything," McDade said. "We have had students who didn't even start the program until as late as mid-term who finished with A's."

Precision teaching is not a new idea. Olander said part of the method incorporates the use of "flash cards." But the professors are the first to add computerized teaching and a "humanistic" approach.

The idea is each individual is unique and has one or two best methods he can use to study. We aid the student in finding the best way to study and to be tested."

Olander said students are tested when they feel they have mastered a given unit of material. They must pass exams with scores of 70 percent at a rate of four correct responses per minute or faster in order to progress to another level of material.

McDade and Olander feel it is a high frequency of correct responses that makes students fluent.

Comp Guard wins awards

Comp Guard (Indoor Guard) members Laurie Brannon, Robert Robertson, Tina Grant and David Gray proudly display trophies won in spring competition.

Dorms to be redecorated

More than 700 Jacksonville State University dormitory residents will move into luxurious, homelike accommodations this fall due to a \$1 million redecoration project.

Six women's and seven men's dormitories are scheduled to receive a number of improvements this summer in staffing and accommodations. The facilities will receive new carpet in hallways, living areas, and lounges. Four buildings will receive modern, non-institutional wood furniture.

Women's dormitories scheduled for improvements are Pannell Hall, Dauge Hall, New Dorm, Rowan Hall, Weatherly Hall, and Curtiss Hall.

Men's dormitories scheduled for improvements are Luttrell Hall, Glazner Hall, Logan Hall, Patterson Hall, Dixon Hall, Crow Hall, and Abercrombie Hall.

Weatherly, Dauge, Glazner, and Logan Halls will receive all-wood matching furniture. Each room will contain two platform beds with drawers, chests, study desks with bookshelves and mirror.

Weatherly Hall will be designated as a "closed residence hall" where male guests

will be prohibited 24 hours a day and quiet hours will be in effect.

Dr. Donald Schmitz, dean of student affairs, said the improvements will provide "a warm, wholesome, safe, quiet environment conducive to good study habits and relaxation." He said the project will not result in higher dormitory fees.

"The improvements will make the rooms aesthetically appealing and less institutionalized," he said.

Schmitz said 381 rooms housing a total of 758 students will be involved in the project.

Fourteen full-time dormitory directors will be hired this summer to manage the buildings. Schmitz said the directors will be hired on the basis of having earned a bachelor's degree and having experience working with a college population.

"We're anticipating that as record number of students will be living in University dorms this fall and all dorms will be in use to accommodate that expected capacity," he said.

Schmitz estimates that 2700 students will live on campus in the fall.

'You Can't Take It With You'

Denise Langston of Rockmart, Ga., left, and Laura West of Jacksonville, right, rehearse a scene from the Jacksonville State University production of YOU CAN'T

TAKE IT WITH YOU with Dr. Steve Whitton, associate professor of English. The play opens July 8 at the Ernest Stone Performing Arts Center on campus.

Scholarship

(Continued from page 1)

professor of English and chairman of the Calvert Scholarship Committee, said Spence was chosen for the award based on his academic record.

"While all applicants were impressive, Bert was chosen because of his really outstanding academic record and our feeling that he will reflect well on the University," Felgar said.

"The committee feels that as the first winner and recipient of the scholarship, Bert will more than justify our faith in him."

Felgar said the annual selection will continue to be based upon high standards.

"Dr. Calvert is easily one of the most outstanding scholars we have had," he said. "Regardless of the number of applications we will receive in the future, a recipient will not be named if we do not feel that an applicant is truly outstanding."

In addition to Felgar, the Calvert Scholarship Committee consists of associate professors of English, Dr. Raymond E. Blanton and Dr. Linda G. Searway.

Although Spence and Calvert are generations apart in age, the two have much in common.

Calvert established a wide reputation for his knowledge of literature and is known to have a keen interest in drama.

Spence, who will graduate at an earlier age than most college seniors due to his academic standing, plans to pursue a Ph.D. in English literature while developing as an actor. Spence also enjoys writing and, should he decide not to act professionally, intends to teach college English.

"I will continue to act as long as somebody is willing to give me a part," Spence said.

"But my love for literature is as strong as my love for acting. I grew up with books and, while it doesn't show as much when you're interested in that sort of thing, I would say my interests are divided between the two."

Spence, who played the role of Charlie, a 70-year-old man, in a recent JSU production of DEATH OF A SALESMAN, is able to receive an up-close look at the acting profession while serving as a management intern this summer for the Alabama Shakespeare Festival in Anniston.

"I want to see a little more of the theatre world before I decide whether to become an actor," he said.

"I know a lot of actors are out of work now. It would be a gamble for me to strike out into the theatre world right now. I'm hedging my bet by continuing my education. I feel I can always teach if I have a Ph.D."

As an intern, Spence is responsible for providing transportation and support services for the cast and crew.

Upon receiving the Calvert award, Spence said:

"I'm very grateful to Dr. Calvert and the Scholarship Committee for setting this up. The money will definitely be helpful to me in continuing my education and it's a great honor to be chosen to receive the first scholarship bearing Dr. Calvert's name."

Barber's Milk Co. awards \$2,000 at JSU

Two Jacksonville State University accounting majors have received \$1,000 scholarships from Barber Pure Milk Company of Birmingham. Jeffery S. Tarvin of Gadsden and Vicki D. Murray of Weaver, seniors at JSU, each received a \$1,000 scholarship after their applications were

screened for entrepreneurial enterprise, academic achievement, campus leadership and financial need. The award is presented each year to outstanding students enrolled in the JSU College of Commerce and Business Administration.

Students exceed state average on examination

Ninety-one percent of the Jacksonville State University College of Education students who took the Alabama Initial Teacher Certification examination this spring passed the Basic Professional Studies exam required for teacher certification. The state average for the test was 81 percent.

Eighty-one percent of the JSU students also passed sub-area tests in their teaching field. The state average for sub-area tests was 79 percent.

The teacher competency exams are part of a new certification procedure implemented by the State Department of Education in 1981. Education students must earn a score of at least 70 percent to pass the exams.

"We feel that the students did very well on the test and we're very proud of our students and our faculty," said Dr. Robert Hymer, dean of the College of Education, after releasing the results this week.

Forty-five JSU students took the tests given March 20 in Birmingham.

JSU energy program underway

Jacksonville State University has begun a \$500,000 energy conservation project after receiving a \$223,320 grant from the U.S. Department of Energy.

By early 1983 five campus buildings now heated with natural gas from their own heating units will be on a pipeline for steam heat from two new coal-burning heat units. And the swimming pool in Pete Mathews Coliseum will be heated via solar panels to be installed

on the coliseum's roof.

The solar panel project is tabbed at about \$22,000, says JSU director of grants and contracts, Albert Searway. For this project and for the steam heat project, JSU is matching the government grant for a total expenditure of about \$500,000, Searway says.

To secure the grant, JSU had to assure the energy department of a payback on project within 15 years. Searway says JSU will reap

savings of \$500,000 in about 14½ years.

Buildings that will receive lines for steam heat from the recently installed coal-burning units are Martin Hall, International House, Houston Cole Library, Lurleen Wallace College of Nursing and Brewer Hall. The gas units will be retained as backup pumps, but are being phased out to eliminate use of natural gas, a non-renewable resource.

Among those at the JSU Summer Music Academy recently were, seated, Kristi Leigh Oliver, Albertville; standing, from

left, Melinda Welch, Montgomery; Pam Pell, Albertville; Robert Pendtelton, Athens; Ouida Susie Francis, JSU.

JSU conducts Army research

Tired helicopter pilots perform about as well as those who have had rest, according to a team of Jacksonville State University psychologists.

The team made this preliminary finding during eight months of research in cooperation with the U.S. Army Research and Development Command of Maryland.

The \$37,000 project tested six Ft. Rucker, Alabama helicopter pilots who flew approximately 100 hours over a period of one week with only some four hours sleep per night.

Project data was collected during a 1979 experiment at Ft. Rucker which used a flight simulator. The JSU team was later awarded a contract to analyze data dealing with pilot response. The work is to be concluded by September 14, 1982.

The JSU team consists of Dr. Thomas Allen Smith, dean, College of Humanities and Social Sciences, principal investigator; Dr. Gary Yunker, assistant professor of psychology, co-director; and Dennis Folds, a graduate student. Folds, a former JSU co-op student at Ft. Rucker, performed much of the preliminary work himself.

Folds said project findings may help flight commanders determine how long a pilot should be permitted to fly without rest.

"We were posing two questions," Folds said. "Is there any difference in the way pilots look at the instruments as a function of a maneuver and does the way they look at instruments change as a function of what we would presume to be fatigue?"

Folds said test subjects wore a special camera that recorded eye movements as the pilots viewed gauges during flight.

"The preliminary answer seems to be yes, they do use instruments differently according to the maneuver being flown. And as far as their performance while experiencing

fatigue, it would seem that pilots use instruments in the same way across several days of fatigue.

"A big point here is there seems to be a lot of variation in the way they use instruments from time to time, but we haven't yet uncovered a change that could be attributed to days of fatigue."

Folds said the JSU findings replicate data derived from other Army flight studies. The tests showed the attitude indicator and the radio magnetic compass were the two instruments used by every pilot in every maneuver and that, of the two, the attitude indicator is the most important.

He said the Army began the research several years ago to help instructors prepare helicopter pilots for extended operations.

"If the Army has to fight for a period of a week to ten days, if there were another European ground war, for example, it's possible and somewhat likely that helicopter pilots would have to fly quite a large number of hours with restrictions on sleep and without being able to see the ground."

Folds said the amount of time a pilot may fly is currently determined arbitrarily by each flight commander.

He said the subjects were tested under bad-weather conditions during maneuvers including take-off, cruise flight, and instrument landing.

"The fact that helicopter pilots would be expected to fly in any sort of weather means that at least part of the time they would not be able to see anything on the ground," he said.

Folds, 23, of Carrollton, Ga., was assigned to the project during the Fall, 1981 semester of graduate school. Folds earned his BA and MS degree in psychology at JSU and is a candidate for the Ph.D. degree at Georgia Tech.

Students at 'Step - Up'

Joy Hopper, left, and Donna Hull, both of Decatur, enjoy cold watermelon during a break at freshman orientation at Jacksonville State University.

'Step-Up' for new students

By SUSIE IRWIN

Newcomers to JSU have been receiving warm welcomes from the administration and organizations on campus during the freshmen orientation, "Step-Up", or Student Entry Program for University Participation.

The purpose of "Step-Up" is to familiarize the new students with JSU's college life. Visiting dormitories, registering for classes and deciding majors are only a few of the many activities in which the students are engaged.

In an assembly held at the beginning of each "Step-Up" session, the students are addressed by President Montgomery along with many other officials in the ad-

ministration. Also present to give the students advice are Larry Smith of the financial aid department; Ben Kirkland from the business office; Eric Hill from SAGA; and Chief Nichols from the campus police department.

Bill Meehan, director of Academic Advisement, presides over the assembly and introduces SGA officers Marc Angle, president and Tony Lundy, vice-president to the incoming students.

In addition to the speakers, the students are given a slide-tour of the campus by Meehan, advised on how to fill-out registration forms, and how and where to register for classes.

Reviewing information

Dennis Folds of Carrollton, Ga., left, and Dr. Gary Yunker, assistant professor of psychology at Jacksonville State Univer-

sity, prepare to go over computer information about Army helicopter pilots for the U.S. Army.

Good luck to the Cadets attending ROTC advance Camp at Ft. Riley, Kansas!!

'Salesman' is a success

By SUSIE IRWIN

The Jacksonville State University Drama Department's production of 'Death of A Salesman', has propelled the student thespians into the realm of professionalism.

Arthur Miller's untimely yarn of one man's vision of the American Dream was re-enacted with all the power, depth and emotion that Miller intended.

All the necessary elements for success were present on the JSU stage. Under the skillful direction of Dr. Wayne Claeren, the players resurrected the characters from Miller's pages and portrayed with dignity the final days of Willie Loman. The scenery, clear and uncomplicated, well defined his dirty-dingy world.

The play tells the story of Willie Loman, a tired, down and out salesman who has spent too many years on the road to nowhere. Although set in Brooklyn in 1949, the tale still rings true as Willie discovers in his last days that his dream is an intangible dream.

His reality is haunted by shadows of would-have-beens. His family struggles to hold on to fainting hopes and dreams while Willie slips closer and closer to destruction.

Shelton Brown was Willie Loman incarnate. His mood, his manner and the very movement of his eyes forbode of impending doom.

Lori Tate crafted a moving portrait of Willie's devoted and long-suffering wife, Linda, who stood at his side and defended him even in the end.

Toby Crawford and Johnny Brewer turned in quality performances as Willie's two sons.

Giving a firm background to the major characters were Bert Spence, Scott Whorton, Michael Kelly, Emily Tierney, Alison Andrews, Stacy McCain and Eric Wishner.

JSU's Drama Department has grown and matured into a gem for all associated with the University to treasure and enjoy.

A scene from "Death of A Salesman" reflects the dramatic effect enjoyed by the full house each evening of the performance. Shelton Brown and Alison Andrews in the foreground and Donna Anthony mark a frivolous experience in Loman's life.

Susan Kinghorn, Randy Granette, Emily Tierney and Johnny Brewer play the restaurant scene to its tragic end in "Death of A Salesman."

Record review

By R. STACY McCAIN
SUCCESS HASN'T SPOILED ME YET
Rick Springfield
(RCA)

As a rule, I don't like albums by "teen idols." The reason is that, for the most part, teen idols don't have a great deal of talent: they don't write their own material, they don't play their own instruments, and most of them couldn't sing their way out of a paper sack. None of those criticisms, however, apply to Rick Springfield—he writes, plays, and I'd bet on his pipes against a sack any day of the week.

Radio must be in a quandary over Springfield's latest LP. Where does a TV soap opera actor get off writing hard rock ("Calling All Girls") that makes AOR pretenders like REO Speedwagon pale by comparison? No synthesizers or strings are used on the album, which places Rick one-up on Human League or Soft Cell. So why don't the 95 Rocks of the world jump on this LP?

Well, for one thing, the hooks are a little too obvious. Remember that scratchy little guitar riff from "Jessie's Girl"? Springfield uses it three times on the new album. And Jessie himself returns in "Tonight", a rather blatant attempt to imitate Bruce Springsteen's "Racing In The Street". (Hero works his fingers to the bone all day, lives to escape at night with his woman.)

Still, Rick turns in three or four sure-fire winners, most notably, "Don't Talk To Strangers" and "How Do You Talk To Girls". The latter of these is an insightful ode to teenage confusion, while the former is an angry attack at the femme fatale who has been caught cheating on our hero:

Who's this Don Juan
I've been hearing of? . . .
Did you fall first-sight
or did you need a shove?

All of which is more than you'd get from, say, a Shaun or a Leif.

Backbeat By Jon Hughes

My life began in fits and starts.

I was already old before I was born.

I was conceived in hot anger, in dark alley passion, in moist love bed, and in good clean fun.

My first years were enigma and nonentity. Even I, myself, barely knew I existed. And then out of distempered silence I uttered the unutterable.

"Hoop she dooo oop - be bop a lula - ramma lama ding dong."

In short, I found my tongue.

As I grew, I found that I had many dark and secret friends, though few daylight ones. But they who were not ashamed of me sustained me

and taught me. Still, my breath was not strong, and I proclaimed in simple and short oratory.

It happened one night that I discovered the confines of my life in this world, the medium of my existence in this world, my mortal body. Not only could I speak, but I could move. I shook till my bones rattled, and I was on a roll. And yet there were many twists to come.

Friends, new and curious, came to watch me and stayed. My mind grew with my world. And suddenly I was taking time for thought and not just feeling. I shouted, warbled and wept in longer and longer tongue. Soon my art could not be contained in words, and those who criticized and

carped simply ceased to speak or to be heard.

I wed and left offspring. There were those who bore my name and those illegitimate as maybe even I.

I matured. I embraced life. I sensed death.

I became old as years passed. My message became myriad and confusing. Some forgot. Still others remembered in time.

I live in memory now and in those few babes who sprang from my loins. I cry into the night still, but my voice is thin, my lungs thick with dust. What I cannot say with my lips, calmly and carefully, I no longer can relay with my fists. Behind me there is memory; before me there is . . .

. . .there is music unheard.

All-Sports Trophy - A first for JSU

Jacksonville State University has won the 1981-82 Gulf South Conference All-Sports trophy, indicating the best overall sports program among the seven member schools.

Jax State won conference titles in football and rifle and placed second in baseball and golf, fourth in basketball and track, and fifth in tennis. An indication of JSU's overall strength is her winning the trophy despite Troy State University's first place winning in cross country, golf, track and baseball. JSU does not participate in cross country competition. And even though JSU fielded the only wrestling program in the state last year with Gary Erwin capturing the national championship, we did not gain any points from that in the competition; nor did the second place national title won by our women's gymnastics team count toward the all-sports honor.

Athletic director Jerry Cole stated, "This is quite an honor and tells people Jacksonville State has a broad base of sports with equal emphasis on each. We've been anxious to win this the last 8-10 years. We've finished second I don't know how many times, but this is the first time we've won it. This is a credit to all the teams and all the coaches."

Dr. Montgomery and Jerry Cole, athletic director, proudly display All-Sports Trophy.

<u>School</u>	<u>Football</u>	<u>Basketball</u>	<u>Cross Country</u>	<u>Rifle</u>	<u>Golf</u>	<u>Tennis</u>	<u>Track</u>	<u>Baseball</u>	<u>Total Points</u>

UNA	5.5	3	0	6	3	5	0	3	25.5
LU	5.5	7	0	4	1	0	0	3	20.5

JSU signs standouts

Jacksonville State University, which has fielded one of the top passing teams in the NCAA Division II ranks the past two years, signed a runner Gamecock who should liven up the running attack this fall.

The runner of mention is Arthur Jenkins, a 6-1, 200-pound tailback from Johnston, S.C. Jenkins gained 1430 yards rushing last year, averaging 7.0 yards per carry. He scored 15 touchdowns.

In his best effort last fall, Jenkins scored four touchdowns and rushed for 250 yards. He played for coach Keith McAlister at Strom Thurmond High School, and had numerous scholarship offers.

JSU basketball coach Bill Jones ended his recruiting of the year with the signing of Georgia All-Stater Allen Tate.

Tate, a 6-8, 200-pound player from Cross Keys High School in Atlanta, was one of the top ten prospects in Georgia, according to Jones. "We didn't think we had a shot at him, but his desire to stay close to home plus the fact that there are several students here from Cross Keys worked our way."

Tate averaged 24.1 points and 14.9 rebounds per game.

Other basketball signees include Keith McKeller, a 6'-6" center from Birmingham's Fairfield and Wes King, a 6-1 guard from Brookwood High near Tuscaloosa.

McKeller helped Fairfield to the state 3A playoffs the last two seasons. He averaged 18 points and 13 rebounds a game last season, and was named to an all-city team in Birmingham and made second team all-state.

Jones said King is, "a real heady player, he's a flashy ball handler who is a good passer and who can get the ball to the open man. But he is also a player who can pull up and shoot the ball from 18 feet."

Baseball Coach Rudy Abbott is hoping that his new recruits will bolster the Gamecocks' pitching and defense.

Randy Bussey, a former Oxford High Player who just finished his career at Gadsden State, has a good chance to move in as the starting first baseman. He hit between .375 and .400 both years at Gadsden State.

Bill Lovrich, a second baseman from Jacksonville High School also hit the ball at about a .375 clip this past season. But his smooth fielding is what caught Abbott's eye. "He has great lateral quickness that you look for in a middle infielder, and he turns the double play very well for a young ballplayer."

Scott Whaley, who came from Atlanta via Gadsden State Junior College, is a pitcher. He throws the ball in the 90 mi-hour range, and Abbott ranked him as the top pitching prospect in the state. Whaley had been drafted by Detroit in the winter, but did not sign. A lot of schools-Tennessee, Georgia, Alabama, and Auburn-were interested in him, but he has friends here and decided to sign with us.

More recent signees of Abbott's include Scott Tidmore, a pitcher, from Arab; Jody Levens, an infielder from Mobile; and Mike Blair, a catcher who made the world series team with Middle Georgia Junior College.

Congratulations and best wishes to each of these young men.

Action at Pete Mathews during open

JSU hosts tennis open

The second annual JSU Open Tennis Tournament was held June 17-19 at the twelve-court complex adjoining the Pete Mathews Coliseum.

Tim Mac Taggart took the championship for the 18-34 year division. MacTaggart is 38, but chose not to compete in the 35-over division. Red Wilder, 35-over champion jokingly stated, "The only reason MacTaggart plays in the 18-34 group is because he's ducking me."

Aileen Finley won the women's championship, and Julie Potter earned the girls' title, while Scott Green earned the boys' title.

Winners in Saturday's consolation rounds were David Martin, 35-over; Wayne Hooks, 18-34; Lana Boozer, women's; Lee Priest, high school boys'; and Christina Victoria, high school girls'.

Gamecocks fall in tourney

The JSU Gamecocks finished their 1982 season with a 33-11 record, but dropped games to Delta State and Indiana Central in the regional tourney, thereby losing hope for another trip to the Division II World Series.

Coach Rudy Abbott commented, "You have to be satisfied with our season record. But we were very disappointed the way things went in the playoffs."

This is baseball?

(Photo by Mike Roberts)

Collins named All-American

Coco Collins from Walton High led Jacksonville State's track team in the nationals of A.I.A.W. Division II Championships, held at Austin Peay State University in Clarksville, Tennessee on May 20-22. Collins qualified in five events and made All-American by virtue of her

sixth place finish in the 100 meter hurdles, 14.9. Collins ran on both of J.S.U.'s relay teams that qualified for the championship meet. Other members of the team that competed were: Callie Thurman of Ft. Myers, Florida and Paulette McCleaney of Cedartown, Georgia, both in the mile

relay and 440 relay; and Sharon Millhouse of Summerville, South Carolina in the 440 relay and Yvette Spillman from North Cobb High in the mile relay. That mile relay set a school record for J.S.U. at the semifinals of the nationals by turning the four laps in 3:55.29.

Gulf South loses commissioner

Gulf South Conference Commissioner Jim McCullough has been hired as associate commissioner of the Southeastern Conference. The appointment goes into effect on September 1.

McCullough will move from his Gulf South office in suburban Birmingham to the SEC office downtown. He replaces C.W. Ingram, who resigned earlier to accept the athletic directorship at Florida State. McCullough

will be responsible for grants-in-aid, eligibility and rules interpretations.

In a prepared statement, McCullough announced, "I am leaving the best Division II conference in America to join the best Division I conference in America".

The Midsouth Gymnastics Camp is being held here on the JSU campus. Attending the camp are 250 instructors and students, age 9-19, from all parts of the country. Said Coach Robert Dillard, "Many of these kids

achieve national ranking and this speaks highly of our camp." Shown here are Patton Morrison of Selma, instructor Katsu Kanzaki, Memphis; Susan Burdette, Fayette, Ga.; and Lynn Lowery of Selma.

'Gem of the Hills'

Ellen Smith, 18, a sophomore, enjoys a traditional July 4th treat during a break from summer school. Ellen is a computer science major and the daughter of Charles Smith and Linda Moon of Douglasville, Ga.

'Gem of the Hills' was a regular feature of The Chanticleer several years ago. The feature is now being revived on a monthly basis.

ANNOUNCING: THE GREAT CHANTICLEER BANNER CONTEST

It's time to redecorate and we at The Chanticleer would like your help. You can win a king's ransom of \$25 for designing the most creative banner (that's the rectangular space at the top of the front page that reads "The Chanticleer") for the Jacksonville State University student newspaper.

want something new and different, provocative and exciting, stupendous and mind-boggling in its originality. Innovative drawing, lettering, and graphic design could make you \$25 dollars richer!

Entries may be turned in to The Chanticleer office, room 102, Theron Montgomery Building. If there are no staff members in the office, just slide your entry through the slot in the door.

Deadline for entries is July 31, 1982. And remember-----Twenty-five smackers can turn a dull weekend night into a real blow-out!
