JULY
The meeting of the Board of Trade was held in the city of Liverpool on the 21st day of May, 1870, at noon. The chairman, Sir Richard H. Brinsley, opened the meeting by announcing the business to be transacted.

Mr. D. P. Milburn, of the Exporters' Association, said that the importers had, as usual, been very busy during the past month, and that the demand for cotton goods had been extremely heavy. The prices had fluctuated considerably, and the general opinion was that they would continue to do so. The meeting was then adjourned.

Mr. Thomas Smith, of the Wool Exporters' Association, said that the demand for wool had been very considerable, and that the prices had risen to a high level. The situation was now more favorable, however, and he expected that the prices would soon fall. The meeting was then adjourned.

Mr. William Johnson, of the Iron and Steel Manufacturers' Association, said that the demand for iron and steel had been very considerable, and that the prices had risen to a high level. He expected that the demand would continue, and he expected that the prices would soon fall. The meeting was then adjourned.

The meeting was then adjourned.
JACKSONVILLE REPUBLICAN.
JACKSONVILLE, FL, THURSDAY, JULY 19, 1857.
NO. 96.

POSTER.

The recent outbreak of hostilities in the South American republics has excited considerable interest in this country. The cause of the war is generally attributed to the dispute between the two nations over the boundary of the territories claimed by each at the eastern end of the continent. The arbitration of the dispute was referred to the International Arbitration Tribunal, but the parties failed to agree on the method of selecting the arbitrators. The war broke out when the dispute was not settled, and it has since spread to other parts of the continent.

MEXICO.

We are indebted to Mr. Kid, of the Merchants' Exchange, for the following reports from Mexico:

JULY 18, 1857.

Dear Sir:

I have been unable to obtain accurate information from the papers here, as they are all controlled by the government and cannot be trusted. However, I can give you some general information about the situation.

On the 26th of April, Santa Anna arrived in Mexico with a large force of troops. He is in the capital, and it is reported that he has taken control of the government.

An officer of the army of Santa Anna, in writing to the Consul in Black, converses with the government and the people of Mexico, and says:

"We are now in control of the government, and we will not permit any interference from foreign powers. We will protect the interests of the people of Mexico, and we will not allow any foreign interference."

The people of Mexico are divided in their opinions. Some support the government, while others are opposed to it. The army has been called up, and the country is on the alert for a possible conflict with foreign powers.

ENTERTAINMENTS.

The annual fair is being held in the city of Santa Ana. The fair is a great success, and the people are enjoying themselves. There are many exhibits of agricultural produce, and there are also many shows of horses, cattle, and other live stock.

STATE OF ARIZONA.

The Territory of Arizona is being organized, and the people are looking forward to a bright future. The territory is rich in valuable minerals, and there is great hope of a prosperous future for the people who settle there.

Cotton & Forwarding House.

The cotton crop is doing well this year, and the prices are high. The merchants in the city are doing a good business, and there is much speculation in the cotton market.

The Jacksonville Republican.

In addition to the regular columns, the following items are included in this issue:

1. The latest news from the war in the South American republics.
2. The annual fair in Santa Ana.
3. The organization of the Territory of Arizona.
4. The cotton market.

The Republican will continue to bring you the latest news and information from the world of politics and commerce.

TO THE CITIZENS OF THE FIRST DISTRICT OF ALABAMA

A Letter to the Citizens of the First Congressional District of Alabama, from the Hon. J. J. Jones.

The Hon. J. J. Jones, Member of Congress, and a resident of the First Congressional District of Alabama, has recently been elected to the United States Congress. He is a man of high character and ability, and has been a faithful representative of his constituents. He has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

The Hon. J. J. Jones has been a strong advocate of the Union, and has been active in the prosecution of the war. He is a man of great energy and determination, and has been a consistent and faithful supporter of the Constitution and the laws of the United States.

INTERESTING PHILOSOPHICAL FACTS.

The change of properties which take place on the application of heat is extremely interesting from the nature of its rays. The reduction of volatiles in carbonic acid, of which the glass is the real substance, is absolutely necessary to all being of natural substances, which is an essential characteristic of all natural substances, whether they be metallic or organic. It is interesting to note that the metals, which are the most volatile of all substances, are the most resistant to heat. Thus, the heat of the sun is necessary to the growth of plants, and the heat of fire is necessary to the growth of animals. The change of properties which take place on the application of heat is one of the most interesting and important of all natural phenomena. It is interesting to note that the metals, which are the most volatile of all substances, are the most resistant to heat. Thus, the heat of the sun is necessary to the growth of plants, and the heat of fire is necessary to the growth of animals. TO THE CITIZENS OF THE FIRST CONGRESSIONAL DISTRICT.

In addition to the page number, the text appears to be a political address or letter, possibly written in a hierarchical or formal tone. The language suggests a call to action, emphasizing the importance of unity and perhaps the need for civic engagement.

In the context of its historical period, the text might be scrutinized for its stance on political issues, its appeal for votes, or its encouragement of public participation. The address is likely to have been influential in guiding the political discourse of the time, reflecting the sentiments and concerns of the audience or region addressed.
JACKSONVILLE REPUBLICAN.
OUR TASK.
ALABAMA, JULY 29, 1857.

NEW YORK, JUNE 17.
The ship Exposition arrived today, full of news and the expectant cargo of the season. Among the passengers was Mr. Lincoln, a prominent citizen of the city, who has been invited to dinner by the mayor and council of the city.

LATE AND IMPORTANT FROM SPAIN.
The news from Spain is not yet available, but it is expected that a cablegram will be received today.

APPRENTICE WANTED.
One or two apprentices in the printing business are wanted. Apply to the editor.

Generally open. For retail and wholesale trade.

**JOE D. DIXON, Printer**

July 1, 1837.
THE DAILY MAIL

The Boston post publishes the following intelligence of the capture of Major Davis, the officer in charge of the United States mail at Fort King, and the murder of Mr. Donnelly, the telegraph operator. The post further states that the body of Mr. Donnelly was found in the telegraph office, with the words "God save the King!" written on his back. The capture of Major Davis is a serious blow to the United States government, and the loss of Mr. Donnelly is a great loss to the telegraph service.

JACKSONVILLE REPUBLICAN

The President of the United States has decided to send an expedition to the scene of the capture of Major Davis. The expedition will consist of a strong force of soldiers and will be commanded by General Jackson. The President has also ordered the Governor of Florida to mobilize the state militia and to prepare for the defense of the state.

The political situation is very tense, and there is much fear of anarchy and disorder. The President has called for a meeting of the Cabinet to discuss the situation and to make plans for the defense of the United States.

GENERAL JACKSON is in council with his staff officers, discussing the plan of the campaign. He has decided to advance with a large force and to capture the town of Fort King. The President has authorized General Jackson to use all necessary means to accomplish his objective.

The United States Navy is preparing to send a fleet to reinforce the army in Florida. The fleet will consist of five warships and will be commanded by Admiral Smith. The President has ordered the fleet to proceed to the scene of the action as soon as possible.

The President has also called for a special session of Congress to discuss the situation and to make provision for the defense of the United States. Congress has been called to meet on the 1st of next month.

The President has also called for a special session of Congress to discuss the situation and to make provision for the defense of the United States. Congress has been called to meet on the 1st of next month.
TEXAS

We have safely in a large portion of the State, and in the extreme portions of the State, the administration of the laws, excepting in the cases of certain individuals who have been convicted of crimes against the State. The administration of the laws is, in general, satisfactory, and we are confidence that the evils and miseries which have been experienced in other parts of the State, will be gradually corrected by the vigor of the administration and the wisdom of the people. We are confident that the people of Texas will continue to be governed by the laws of the State, and that the Constitution of the State will be respected and maintained. We are confident that the people of Texas will continue to support the constitution and laws of the State, and that the people of Texas will continue to be governed by the Constitution and laws of the State. We are confident that the people of Texas will continue to support the Constitution and laws of the State, and that the people of Texas will continue to be governed by the Constitution and laws of the State.
