SATURDAY, JULY 6, 1867.

LATE NEWS.

FROM NEW ORLEANS.

New Orleans, July 5th. At the early annual meeting of the board of directors of the Louisiana and Mississippi Railroad Company, held here on Tuesday last, the board was informed that the legislature of that state had granted a large increase of the company's capital stock, and that the sum of $5,000,000 was authorized to be expended for the construction of the line of road from New Orleans to St. Louis. The directors were also informed that the company would be required to pay the state a sum of $25,000 for the use of the land and timber which would be taken for the purpose of constructing the road. The directors decided to accept the offer and to proceed with the work at once.

FROM CHICAGO.

Chicago, July 4th. The Chicago and Northwestern Railroad Company, which is now under construction, has been granted a charter by the state of Illinois, authorizing it to build a line of railroad from Chicago to the Atlantic coast. The charter provides for a capital stock of $10,000,000, and the company is authorized to issue bonds for the sum of $5,000,000. The road is to be built in sections, each section to be completed before the next section is started.

JACKSONVILLE, ALA. JULY 13, 1837.

GEORGIA STATE LOTTERY.

FOR THE BENEFIT OF THE
MASONIC ORPHANS' HOME.

THE LEGISLATION of the State of Georgia for the support and education of the children of wholesome and virtuous parents, denotes the wisdom and equity of the legislature of the United States, in the enactment of the 'Masonic Orphans' Home Act.' This act has been recognized as a landmark of charitable legislation, and the benefits it provides have been widely praised by the Masonic community.

When the legislature of the State of Georgia enacted the 'Masonic Orphans' Home Act,' they intended to provide a safe and nurturing environment for the children of Masonic families who had passed away or were unable to care for them. The act established the Masonic Orphans' Home, which has since become a model for other charitable institutions.

The Georgia State Lottery is a unique and innovative way to support the Masonic Orphans' Home. By participating in the lottery, players have the opportunity to contribute to the well-being of the children of Masonic families, while also enjoying the excitement and thrill of playing the lottery.

The Georgia State Lottery is a great way to support the Masonic Orphans' Home and contribute to the betterment of the community. By choosing to participate, you are helping to ensure that the children of Masonic families have a bright future and a secure future.

For more information about the Georgia State Lottery or the Masonic Orphans' Home, please visit the official websites. Thank you for your support of this important cause.

J. B. H. H.

In accordance with the 'Masonic Orphans' Home Act,' the Georgia State Lottery has been established to provide a source of funding for the operation and maintenance of the Masonic Orphans' Home. The proceeds from the lottery will be directed towards the care and education of the children of Masonic families, ensuring that they have access to the best possible opportunities for success.

LATE NEWS.

FROM WASHINGTON.

Washington, July 12.—Further ac-
ations were made by the Indian office, the
final decision of the case being left in the
hands of the agency. The Indian office
has been notified that the case will be
considered in all its events, and that the
Indian office will be informed of the de-
velopment of the case. The case is being
examined by an Indian agent, who is con-
ducting the investigation in a thorough
manner.

A number of Indian tribes have been
sent to the agency for the purpose of be-
coming members of the tribe.

FROM TELEGRAPHIC.

 telegram to the Indian office has been
received, stating that the case will be
considered in all its events.

The following is the text of the tele-
gram:

A new telegraph line has been completed
between the towns of and .
Notes on the situation—By Dr. N. Hall.

It is true that the great railroad war is now at an end. The railway systems of the country are almost all in operation, and the effects of the war are being rapidly overcome. The government is in control, and the people of the country are once more safe and happy. The war has been a great and necessary sacrifice for the preservation of the Union, and for the establishment of a government that shall be strong and efficient. The work of reconstruction will now begin, and the country will be free to devote its energies to the development of its resources and the promotion of its welfare.

The government is now in control, and the people of the country are once more safe and happy. The war has been a great and necessary sacrifice for the preservation of the Union, and for the establishment of a government that shall be strong and efficient. The work of reconstruction will now begin, and the country will be free to devote its energies to the development of its resources and the promotion of its welfare.

In conclusion, let me say that the war has been a great and necessary sacrifice for the preservation of the Union, and for the establishment of a government that shall be strong and efficient. The work of reconstruction will now begin, and the country will be free to devote its energies to the development of its resources and the promotion of its welfare.

Le Château Mécanique.

The following description of a new invention is an exhibition at the "galerie" in Paris, given in a printed report, which is as follows:

I was fortunate enough to be present and greatly interested in a new invention of a wonderful invention. The invention is a machine that will do everything that any skilled workman can do. Through the window at St. John's, London, the inventor, who is of the greatest of the great, was seen to be operating a machine that will do in one second what it took him two hours to do before. The invention is a machine that will do in one second what it took him two hours to do before. The machine is a wonderful thing that will do in one second what it took him two hours to do before. The invention is a machine that will do in one second what it took him two hours to do before. The machine is a wonderful thing that will do in one second what it took him two hours to do before.

The inventor, who is of the greatest of the great, was seen to be operating a machine that will do in one second what it took him two hours to do before. The invention is a machine that will do in one second what it took him two hours to do before. The machine is a wonderful thing that will do in one second what it took him two hours to do before.
