THE MILITARY IN TURKEY.
The War in Turkey.
In former years the war in Turkey was a matter of national interest only, but now it has become a world-wide concern. The Turks, with their Mohammedan religion and their love of war, have always been a scourge to the Christian world, and their conquests have been a source of constant danger to the safety of Europe. The present war is no exception to this rule, and it is to be hoped that it may be quickly brought to a conclusion.

Informer.

The Turks have been defeated in many battles, but they have never been completely subdued. They have always been able to make good their losses by a combination of policies, and by the aid of their allies. The present war is no exception to this rule, and it is to be hoped that it may be quickly brought to a conclusion.
