The Mammoth again.

The Mammoth is a failure, and the people of this city are agreed in that opinion. The reasons assigned for its failure are numerous and of every description. The nearest approach to the truth is that the people of the city were not prepared to support such a large and expensive establishment, and that the managers were too much in the habit of making promises instead of keeping them.

A Great Story and a Little Public.
A local story told by a local man
should be of interest to all.

The story of "The Great Story and a Little Public" is a local tale that was told in a small town. The story was about a group of friends who decided to start a new business together. They were all very excited about their new venture and thought they would be successful. However, they soon realized that they did not have the necessary skills or resources to make their business a success. As a result, they struggled to keep the business running and eventually had to close it down.

The story of "The Great Story and a Little Public" is a cautionary tale about the importance of having the right resources and skills to start a business. It is a reminder that even the best-laid plans can sometimes fail, and it is important to be prepared for such situations.
