MONEY IS SCARCE

It hardly gets to by the usual impression that the market in shares or stocks is in a very low condition, as the sound basis of our financial system is the general prudence in buying and selling. The only business that is doing well at present is the selling of news, as a very large percentage of the people are buying newspaper stories to see what is going on in the world.

J. ROEBLING

And in this connection it is interesting to read the statements of some of the leading capitalists in the country that they are in no hurry to sell their holdings. The following resolution was adopted by the New York Stock Exchange:

"RESOLVED, that the members of the Exchange shall not be permitted to sell any stock except upon the written order of the member who sold it.

J. ROEBLING"

The Washington Times

THURSDAY, December 8th.

The stock market continues to be dull, with very little activity. The prices of the leading stocks have been firm, but there has been no real gain. The market is still in a state of depression, with a few sharp declines and a few sharp gains. The main feature of the market is the lack of activity, with very few transactions taking place.

NATIONAL RESOLUTION

"RESOLVED, that this body will not permit any member to sell any stock except upon the written order of the member who sold it."
