THE WAR IN ARKANSAS.

We have received more news from the front in Arkansas. The news is not very encouraging, but the people are spirits and are doing their best to sustain the cause. The enemy has been very active, but the Union forces are holding their own.

Columbus College.

Columbus College was burned by the rebels. The President of the College, a Union man, and all the faculty and students were forced to leave. The building was set on fire, and the enemy then occupied the campus.

There has been much loss of life in Arkansas, but the people are determined to hold on to the land they love. The Union forces are making a determined effort to take control of the state.

Besides the war, there is also news from the South. The Confederacy has declared war on the Union, and the conflict is expected to be long and bloody.

THE CIVILIZATION OF THE KAW.

There are many species of animal life in Arkansas which are not found in other parts of the country. The most interesting of these is the Klawk, a species of animal similar to the alligator but much larger. The Klawk is found in the swamps and marshes of the state, and is said to be very dangerous to those who venture into the unknown lands of the Kaw. It is known to be a ferocious animal, and is feared by all who approach its lairs. The Klawk is also a favorite food among the Indians of the region, who catch it with nets and spears. The meat is said to be very palatable, and is a staple article of diet among the Indians. The Klawk is a symbol of the rugged and untamed nature of the state, and is a reminder of the wild and untamed life that exists within its borders. The Klawk is a source of pride among the people of Arkansas, and is a symbol of the strength and courage that is characteristic of the state. The Klawk is a living representation of the untamed spirit that is a part of the Arkansas way of life. The Klawk is a reminder of the untamed nature of the state, and is a source of pride among the people of Arkansas.
