Rome Ga. Sept. 18, 1856.—1y.

PORTABLE STEAM ENGINES.

THE subscriber respectfully calls the attention of Southern Planters and Mechanics to the

Portable Steam Engines, of which he has the Agency in New Orleans. They are so simple in their construction that any negro of ordinary capacity can be taught to run one in a day. For driving light machinery, running cotton gins, plantation saw mills, or corn mills, pumping water, steaming food, etc., they cannot be excelled. A striking feature of these engines is that they cost less than would mules or horses, to do the same amount of work.—A pair of horses will readily move them from place to place over any ordinary road. They require no brick work to set them up, but they are all ready to be put in operation, with the exception of a smoke-pipe or chimney. One is kept at work in the subscriber's warehouse every day between 9 and 3 o'clock, and all are invited to call and inspect it. The Planter, especially, should look with pleasure upon the introduction of these Engines, to take the place of horse power in ginning cotton and grinding corn, as the cost of running a 6, 8, or 10 horse Engine is much less per day than the expense of feeding the same number of horses.

PRICES.
2½ Horse Power, \$375
4 do do 500
6 do do 700
8 do do 900
10 do do 1,100
For further particulars, address
D. C. LOWBER, Agent,
New Orleans, Jan. 14, 1857.—1y

JOB WORK
NEATLY EXECUTED
AT
THIS OFFICE.

Soliciting a call from all visiting our city with the view to make Purchases in this line.

June 3 1857.—1y.

WILEY & KNOX,
Commission Merchants,
SELMA, ALA.

Will make liberal advances on COTTON, WHEAT, FLOUR, and other country productions. Goods ordered, carefully selected and promptly forwarded.

The friends and acquaintances of T. L. Martin will find him at this house.
Selma, June 17, 1857.—1y.

Land for Sale.

THE undersigned now offers for Sale his valuable tract of land lying in the Southern part of Benton County, 7 miles west of Oxford, containing 40 acres. The soil is good, over 100 acres cleared and under good fence; the place well improved, with dwelling and out houses, a cotton gin and press, &c. It is also well watered, embracing a portion of the head springs of Cold Water, one of the largest Springs in the State, besides several other fine springs of water. The land is within 3 miles of the Selma Railroad, convenient to fine Mills, also to Churches, Schools, &c. A good bargain will be given to the purchaser, in fact a premium of 40 acres to any one who will purchase the remainder at a fair price.

JOHN M. NEIGHBORS.

Selma, April 15, 1857.

B. T. POPE
Attorney at Law,
SELMA, ALA.

POETRY.

Kitty Clide.

Oh, who has not seen Kitty Clide?
She lives at the foot of the hill,
In a little nook.

By the bubbling brook
That carries her father's old mill.
Oh, who does not know Kitty Clide?
That sunny eyed, rosy cheeked lass,
With a sweet dimpled chin,
That looks as bright as sin,

With always a smile as you pass!
Sweet Kitty—dear Kitty
My own sweet Kitty Clide;
In a little nook.

By the clear bubbling brook,
Lives my own sweet Kitty Clide.

With a basket to put in her fish,
Every morning with a line and a hook,
This sweet little lass,
Through the tall heavy grass,
Strolls along by the clear running brook,
She throws her line into the stream;
And trips it along the brook side,
Oh, how I do wish,
That I was a fish,
To be caught by sweet Kitty Clide.
Sweet Kitty—dear Kitty, etc.

How I wish that I was a bee,
I'd gather honey from flowers,
But would steal a dear sip,
From Kitty's sweet lip,
And make my own hive in her bowers.

Or if I would be little bird,
I would nestle close in the air,
But would keep close by the side
Of sweet Kitty Clide,
And sleep in her soft silken hair.
Sweet Kitty—dear Kitty, etc.

The Runaway Match.

A great many years since, when bright eyed and fair-haired lasses were not so plenty in New England, as they now are, there dwelt in the town of Newbury, a young man, a little over twenty years of age, and a very good looking fellow, who was called by the name of Mannie.

Mannie was Danforth's only child, and report said truly that she would be his sole legatee. The old man was a study farmer, and was estimated to be worth a very handsome fortune.

The sparkling eyes and winning manners of Mannie Danforth had stirred up the finer feelings of the whole male portion of the village, and her suitors were numerous; but her father was peculiar, and none succeeded in making headway with him or her.

In the meantime, Mannie had a true and loyal in secret. Who would have supposed for one moment that such a fellow dare to look on beauty and comparative refinement. His name was Walker, or, as he was generally called Joe Walker, as he was a simple fellow, and had no pretensions to his place two or three years.

But a very excellent farmer and a right good manager was this Joe Walker. He was young—only twenty-three—and he actually fell in love with this beautiful, pleasant, joyous Mannie Danforth, his employer's daughter. But the stranger part of the occurrence was that Mannie returned his love earnestly, truly and frankly, and promised to wed him at a favorable time.

Things went on merrily for a time, but old Danforth discovered certain glances and attentions between them which excited his envy and suspicions. Very soon afterwards Joe learned the old man's mind directly, in regard to his future disposal of Mannie's hand, he quickly saw his case was a hopeless one unless he resorted to a stratagem.

By agreement an apparently settled dislike and coldness was observed by the lovers toward each other, for five or six months, and the father saw, as he believed, with satisfaction, that his precious fears had been premature. Then, by the aid of himself also between them, Joe, who had been home at evening, and night after night, for full three months longer did Joe disappear as soon as his work was finished, to return home only at late bedtime. This was unusual, and old Danforth determined to know the cause of it.

Joe frankly confessed that he was in love with a man's daughter, who resided less than three miles distant, but, after a faithful attachment between them for several months, the old man had utterly refused his application for the young girl's hand.

This satisfied him that he had made a mistake in regard to his own child, and he would help Joe to get married, and thus stop all further trouble or suspicion at home.

"Do you like her?"
"Yes, sir—yes."
"Then marry her."
"But I can't—her father objects."
"Poh! let him do what, what need you care? Run away with her."

"Yes! Off with you at once. If the girl will join all right. Marry her, bring her here; you shall have the cottage at the foot of the lane; I'll furnish it for you; your wages shall be increased, and the old man may like it or not."

"But no buts, Joe. Do so I bid you—go, go about it at once; and—"
"You will stand by me?"
"Yes to the last. I know, Joe you're a good fellow, and a good workman, and will make anybody a good son and a good husband."

"No cares? Go now quickly, but quietly."
"To-morrow night, then," said Joe.
"Yes."
"I'll hire Clover's horse?"
"No you shan't."
"No?"

"Yes, no. Take my horse—the best one, young Morgan, he'll take you in fine style in the new phaeton."
"The old gentleman will be astonished."
"Never mind, go on. We'll turn the laugh on him. I'll take care of you and your wife at any time."
"I'll do it," said Joe.

"You shall," said Danforth; and they parted in good spirits.

An hour after dark, on the following evening, Joe made his appearance, dressed in a nice new black suit, and really looked very comely. The old man bustled out to the barn with him, helping to harness young Morgan to his new phaeton.

A few rods distant from the house, he found Mannie, as by previous arrangement, and, repairing to the next village, the parson very quickly made them one in the holy wedlock. Joe took his bride and soon dashed back to the town of Newbury and halted at old Danforth's house who was really looking for him with open arms.

"It is done," cried the old gentleman.
"Yes," answered Joe.
"Bring her in," continued the old fellow in high glee; "never mind compliments here," and the honest farmer rushed away for light, returning almost immediately.

"And this is my wife!" he added, as he passed up to his beautiful bride—the bewitching and lovely Mannie Danforth.
"What!" roared the old fellow; "what did you say, Joe—you villain, you scamp, you audacious cheat, you—"
"It is true, as you are lawfully married," Joe advised me to this course, you assisted me; you planned the whole affair, you lent me a horse; you thought me last night worthy of any man's child; you encouraged me, you promised to stand by me; you of fered me the cottage, at the foot of the hill."

"I didn't. I deny it. You can't prove it; you're a—"
"Calmly now, sir," said Joe. And the entreaties of the happy couple, were at once united to quell the old man's ire, and to persuade him to acknowledge the union.

He gave in reluctantly, and the fair Mannie Danforth was overjoyed to be acknowledged as Mrs. Joe Walker.

found Mannie, as by previous arrangement, and, repairing to the next village, the parson very quickly made them one in the holy wedlock. Joe took his bride and soon dashed back to the town of Newbury and halted at old Danforth's house who was really looking for him with open arms.

"It is done," cried the old gentleman.
"Yes," answered Joe.
"Bring her in," continued the old fellow in high glee; "never mind compliments here," and the honest farmer rushed away for light, returning almost immediately.

"And this is my wife!" he added, as he passed up to his beautiful bride—the bewitching and lovely Mannie Danforth.
"What!" roared the old fellow; "what did you say, Joe—you villain, you scamp, you audacious cheat, you—"
"It is true, as you are lawfully married," Joe advised me to this course, you assisted me; you planned the whole affair, you lent me a horse; you thought me last night worthy of any man's child; you encouraged me, you promised to stand by me; you offered me the cottage, at the foot of the hill."

"I didn't. I deny it. You can't prove it; you're a—"
"Calmly now, sir," said Joe. And the entreaties of the happy couple, were at once united to quell the old man's ire, and to persuade him to acknowledge the union.

He gave in reluctantly, and the fair Mannie Danforth was overjoyed to be acknowledged as Mrs. Joe Walker.

The marriage proved a joyous one, and the original assertion of Danforth is truthful in every respect. The cunning lover was a good son and faithful husband, and lived many years his runaway match, which the old man never cared to hear much about the details of an elopement, for he saw how completely he had overstepped his mark.

FRUIT INSTEAD OF MEDICINE.—There is no doubt but that the use of good fruit is highly conducive to health, and indeed, almost indispensable to it. Much of the sickness in the Western country is occasioned by the want of it. It is the scarcity of good fruit that creates such a demand for physic in our Western country.

Our lovers and bilious disorders prevalent in the summer season, are more owing to the want of it than any other cause. And the want of fruit is generally cultivated, and used as an article of diet, shall we be rid of these disorders, which are supping the life fountains of thousands of our farmers annually. And if fruit were administered, instead of the physician's prescription, we have no doubt it would be far better for the patient.

Nature, in this, as in all other respects, has bountifully supplied us with varieties, which, if properly cared for will enable us to enjoy a succession throughout the year. But fruit is not only a necessary article of life, it is one of its great luxuries. What is so enticing to the palate than luscious fruit? And as an article of diet, nothing equals it. It is easily raised, costs but little, promotes health, and is loved by every one. Most people content themselves by cultivating but two or three varieties. This cannot be so. Fruit is more needed throughout the summer season than almost any other part of the year. And the varieties which ripen at this time are less cultivated. The farmer cannot take a step, and which will add more to his own joys, and those of his own family, than by having such a succession as will furnish him with fruit the entire year.—*Spirit of the Press.*

Smart Butler.
The following little story is going the rounds of the press without any credit: "Why is it my son," asked a mother of a ten year old boy, "why is it that when you let your bread and butter drop that it is always with the butter side down?"

"I don't know; it hadn't oughter, had it?" The strongest side oughtn't to be un dermost, had it not? and this is the strongest butter that I ever seed in my life."

"Lush up! it

PHILADELPHIA.
IMPORTANT ANNOUNCEMENT.
TO all persons afflicted with Sexual Diseases
such as SPERMATORRHOEA, SEMI-
NAL WEAKNESS, IMPOTENCE,
GONORRHOEA, GLEET, SYPHILIS,
the Vice of Onanism, or Self Abuse, &c.,
The HOWARD ASSOCIATION, in view
of the fact that the disease is caused
by sexual diseases, and is the most dan-
gerous of all diseases, and that it is the
most common of all diseases, and that it
is the most difficult to cure, and that it
is the most dangerous of all diseases, and
that it is the most common of all diseases,
and that it is the most difficult to cure,
and that it is the most dangerous of all
diseases, and that it is the most com-
mon of all diseases, and that it is the
most difficult to cure, and that it is the
most dangerous of all diseases, and that
it is the most common of all diseases,
and that it is the most difficult to cure,
and that it is the most dangerous of all
diseases, and that it is the most com-
mon of all diseases, and that it is the
most difficult to cure, and that it is the
most dangerous of all diseases, and that
it is the most common of all diseases,
and that it is the most difficult to cure,
and that it is the most dangerous of all
diseases, and that it is the most com-
mon of all diseases, and that it is the
most difficult to cure, and that it is the
most dangerous of all diseases, and that
it is the most common of all diseases,
and that it is the most difficult to cure,
and that it is the most dangerous of all
diseases, and that it is the most com-
mon of all diseases, and that it is the
most difficult to cure, and that it is the
most dangerous of all diseases, and that
it is the most common of all diseases,
and that it is the most difficult to cure,
and that it is the most dangerous of all
diseases, and that it is the most com-
mon of all diseases, and that it is the
most difficult to cure, and that it is the
most dangerous of all diseases, and that
it is the most common of all diseases,
and that it is the most difficult to cure,

PORTABLE STEAM ENGINES.
THE subscriber respectfully calls the attention of Southern Planters and Mechanics to the

Portable Steam Engines,
of which he has the Agency in New Orleans. They are so simple in their construction that any negro of ordinary capacity can be taught to run one in a day. For driving light machinery, running cotton gins, plantation saw mills, or corn mills, pumping water, steaming food, etc., they cannot be excelled. A striking feature of these engines is that they cost less than would mules or horses. A pair of horses will readily move them from place to place over any ordinary road. They require no brick work to set them up, but they are all ready to be put in operation, with the exception of a smoke-pipe or chimney. One is kept at work in the subscriber's warehouse every day between 9 and 3 o'clock, and all are invited to call and inspect it. The Planter, especially, should look with pleasure upon the introduction of these Engines, to take the place of horse power in ginning cotton and grinding corn, as the cost of running a 6, 8, or 10 horse Engine is much less per day than the expense of feeding the same number of horses.

PRICES.
2 1/2 Horse Power, : : : : \$275
4 do do : : : : 500
6 do do : : : : 700
8 do do : : : : 900
10 do do : : : : 1,100

Soliciting a call from all visiting our city with the view to make Purchases in this line.

June 3 1857.—ly.

WILEY & KNOX.
Commission Merchants,
SELMA, ALA.

Will make liberal advances on COTTON, WHEAT, FLOUR, and other up country productions. Goods ordered, carefully selected and promptly forwarded.

The friends and acquaintances of T. B. Martin will find him at this house.
Selma, June 17, 1857.—ly.

Land for Sale.

THE undersigned now offers for Sale his valuable tract of land lying in the Southern part of Benton County, 7 miles west of Oxford, containing 440 acres. The soil is good, over 100 acres cleared and under good fence; the place well improved, with dwelling and out houses, a cotton gin and press, &c. It is also well watered, containing a portion of the head spring of Cold Water, one of the largest and greatest natural curiosities in the South west, besides several other fine springs of water. The land is within 3 miles of the Selma Rail Road, convenient to fine Mills, also to Churches, Schools, &c. A good bridge will be given to the purchaser, in fact a premium of 40 acres to any one who will purchase the remainder at a fair price.

JOHN M. NEIGHBORE.

POETRY.
The Golden Rule.
BY SIDNEY DYER.

In the bustles of life, when the truth of the heart
Is truly a selfish control;
Where, where, is a refuge to shield and import
True light to a heaven-born soul?

O pause not to ask what the wisest would do,
Their wisdom ne'er found such a gem:
"All things that ye would men should do
unto ye."

Do ye even so unto them?

If thou and thy brother have aught to decide,
And fail at the last to agree,
Ne'er bring to another thy cause to be tried
As erring and selfish as he.

No—judge for thyself by this rule, ever
true:
Ere thou dost a brother condemn:
"All things that ye would men should do
unto ye."

Do ye even so unto them?

If a dark wave of trouble has swept o'er the soul,
And a cry has gone forth for relief,
Ne'er pause o'er or give, nor thy charity
deceit.

Let thou add a new pang to the grief,
Still follow the rule: be changeless and true
And ne'er will thy conscience condemn:
Things that ye would men should do unto ye.

Do ye even so unto them?

CORRIGENDUM OF SLEEP.—In Turkey, if a person falls asleep in the neighborhood of a poppy field, and the wind blows over towards him, he becomes naturally narcotized, and would die if the country people, who are well acquainted with the circumstances, did not bring him to the great well or stream, and empty his bladder, after pitcher of water on his face and body. Dr. Apennheim, during his residence in Turkey, owed his life to this simple and efficacious treatment. Dr. Graves, from whom this anecdote is quoted, also reports the case of a gentleman thirty years of age, who, from long continued excesses, was reduced to a complete living skeleton, unable to stand on his legs. It was partly owing to disease, but principally to the abuse of mercury and opium, until at last, unable to pursue his business, he sunk into a deep slumber, and was found dead.

Another person who was reading aloud to one of his devoted friends, was stretched on his death-bed, fell fast asleep, and with the book still in his hand, went on reading, until unconscious of what he was doing. A woman at Hamam slept seventeen or eighteen hours a day for fifteen years.

Another is recorded to have slept once for four days. Dr. Maenich mentions a woman who spent three-fourths of her life in sleep, and Dr. Filicenus quotes the case of a young lady who slept six weeks and recovered. The venerable St. Augustine, of Hippo, prudently divided his time into three parts, eight to be devoted to sleep, eight to recitations, and eight to converse with the world. Maenich is reported, particularly in the Eastern hemisphere, to become furiously violent during the full of the moon, more especially when the decorative rays of his polarized light is permitted to fall into their department; hence the name lunatics. There certainly is greater proneness to the disease during sleep than in the waking state, for the voiceless night in the Campagna de Roma inevitably becomes infected with its noxious air; while travellers who go through without stopping except the miasma. In these cold produces sleep, and those who perish in the snow sleep on till they sleep the sleep of death.

EXTENSIVE ENGLISH COUNTRY SEATS.—A fine thirty miles from London is the estate of the Earl of Spencer, which comprises ten thousand acres, divided into parks, meadows, pastures, woods and gardens. Its library contains fifty thousand volumes, and is said to be the finest library in the world.

The Duke of Richmond's home farm consists of twenty-three thousand acres, or over thirty-five square miles, and this in crowded England, which has in all the area of only fifty thousand square miles, or just thirty-two millions of acres, giving over five acres to each man.

The residence of the Duke is fitted up with original magnificence. Twenty-five race horses stand in his stables, each under the care of a special groom. The dishes and plate upon the table are of porcelain, silver and gold. His riding is supplied with almost every variety of rare and elegant birds, and large herds of cattle, sheep and deer are spread over the immense lavens.

The same authority from which we gather these facts says that the Duke of Devonshire's palace at Chatsworth exceeds in magnificence any other of the kingdom. He spends the whole of his enormous income in the grounds about the house are kept four hundred head of cattle and fourteen hundred deer. The kitchen garden contains twelve acres, and is filled with almost every species of fruit and vegetables. A vast conservatory connected with this establishment is designed to contain a sample of every tree that grows. There is also a glass conservatory, the hundred and eighty-seven feet in length, one hundred and twenty feet in breadth, sixty-seven in height, covered by twenty-six thousand square feet of glass, and warmed by seven miles of pipe, conveying hot water. One plant was obtained by special messenger, and is valued at ten thousand dollars. One of the fountains near the house plays two hundred and seventy-six feet high, said to be the highest jet in the world. Chatsworth contains three thousand five hundred acres, but the Duke owns ninety-six thousand acres in the county of Derbyshire. Within the entire is one vast scene of paintings, sculpture, mosaic work, carved wallings, and all elegancies and luxuries within the reach of almost boundless wealth & highly refined taste.

GLORY OR A GRAVE.—The eminent Dr. Beaumont, in an able report on his official mission to the Crimea, affirms that some

two hundred French soldiers expired daily between that region and Constantinople, and that the official bulletin conveyed no adequate idea of the sufferings and privations of the troops and the extent and horrors of the mortality. The number of deaths of French soldiers, recorded in the hospitals was about 63,000—31,000 in the Crimea, and 32,000 at Constantinople. Was another campaign possible?

BE GENTLE AT HOME.—There are few families, we imagine, anywhere, in which love is not abused as furnishing the license for impoliteness. A husband, father or brother, will speak harsh words to those he loves best, and those who love him best, simply because the security of love and family pride keeps him from getting his head broken. It is a shame that a man will speak more impolitely at times, to his wife or sister than he would to any other female, except a low and vicious one. It is thus that the honest affections of a man's nature prove to be a weaker protection to a woman in the family circle than the restraints of society, and that a woman usually is indebted to the kindness and politeness of a man, who belongs to her own household. Things ought not to be so. The man who, because it will not be resented, indulges his spleen and bad temper upon those of his heart's stone, is a small coward, and a very mean man. Kind words are circulating mediums between two gentle and noble souls, and no true gentleman and lady at home, or in society, will not be raised by error, far away from the language and disrespectful treatment too often indulged in between those bound together by God's own ties of blood, and the still more sacred bonds of conjugal love.—Life Illustrated.

A Daughter Killed by Her Father.

The Louisville (Ky.) Era says: "Last week a most atrocious, heinous and revolting murder was committed in the county of Fayette, by Matthew Kincaid, on the body of his daughter, who had just arrived at woman's estate. The said Matthew, Kincaid, familiarly known as Little Matthew, we point out to our readers as one of the accomplished of a notorious father, who died in the penitentiary, for burning Gauley Bridge in 1828 or 1829. This miserable murderer is now in jail for trial. His violent temper could not be restrained to a domestic duty, and while kneeling down for bread, struck her on the back of the neck with a large killing knife, instantly and doubtless discharging her soul."

VALUE OF THE SLAVES OF THE SOUTH.—The New Orleans Delta estimates the number of slaves at the South at over three and a half millions, and their aggregate value, at present prices, at fully sixteen hundred millions of dollars. The cotton plantations in the South, it estimates at about eighty thousand, and the aggregate value of their annual product, at the present price of cotton, is fully one hundred and twenty-five millions of dollars. There are over fifteen thousand tobacco plantations, and their annual product, at the present price of tobacco, is about fifty millions of dollars. There are two thousand and six hundred sugar plantations, the products of which average annually more than twelve millions. There are five hundred and fifty-one rice plantations, which yield an average revenue of four millions of dollars.

The Salt Lake Country.

Salt Lake is situated between the fortieth and forty-second degrees of North latitude, and is not less than fifty miles in length from North to South, varying in width from five to thirty miles. Its elevation above the Gulf of Mexico is two thousand four hundred feet, and it forms the bottom of a vast basin, surrounded by mountains five thousand to six thousand feet high. Part of the banks and bottom of the lake are composed of rocks and salt springs, and the waters are entirely impregnated with a saline substance, so that evaporation shows three-fourths parts in one hundred of salt, while the water of the sea shows only four parts in one hundred. The waters of Salt Lake, therefore, are of an extraordinary density. No fish can live there, and the borders of the lake are sterile. Happily, from this accursed lake, there is a passage to another lake called Utah, (the name of an Indian tribe), the level of which is one hundred feet above the surface of the first. The water in Utah Lake is drinkable fresh and limpid. The richness of the country in the four corners of these lakes caused Brigham Young to resolve upon settling the Mormons at this spot. He thought, with wisdom, that it was better for him to become exclusive master of this great basin, where the distance and nature offered an impenetrable fortress, than to go to California and encounter the hostility of a crowd of gold seekers.

The resemblance of Salt Lake to the Dead Sea could be presented as a Providential design, and an indication of the place where the New Jerusalem should be founded. The colony chose a position extremely advantageous, upon a straight strip of land, and founded there the Deseret, a term which signifies "beehive" in the pretended "Reformed Egyptian" language. The aspect presented by this young city is very picturesque. It is divided into twenty quarters, each forming a separate enclosure. The houses are built of adobe, or bricks, and are surrounded by a high wall. The only springs which descend the mountains flow in little rivulets into the gardens and streets. The stores are numerous and elegant. The State house is twenty by forty feet. The town is protected by a fortified inclosure, and the neighborhood is a fertile country is highly cultivated and returns with usury the products which are confined to it. The waterfall between the lakes is utilized for turning numerous mills. In fact this colony is a new and striking example of the creative and directive genius which seems to be the privilege of the Anglo-Saxon race.

A NEW MOTIVE POWER.—Sr. Carbia, of Cuba, has invented a new system of propelling vessels—so we learn from the Diario de la Marina. His plan proposes the building of windmills on the decks of his ships, with great wings, from which the motion is communicated to the side-wheels, similar to those of steam-ships. The models have been successfully worked; and it only remains to be seen whether the force of the wind will be sufficient, when thus

applied, to give vessels the velocity of ordinary sailing ships. If this problem is satisfactorily solved, the Diario says it is evident that a windmill ship will be able to sail just as well with a contrary wind as with a fair wind—because, it being perfectly easy to alter the position of the wings, they may always be opposed to the wind, whatever direction it may blow from. The inventor has asked for the protection of a patent from the Cuban Government, and as soon as it is granted, he will commence making his experiments upon a large scale.

The Propagation of Fish.

It appears to us, that this country is sadly behind hand in relation to the modern experiment of raising fish. The French and the Germans have gone to work in earnest, and thus immense quantities of fish are produced in natural as well as artificial ponds. The Legislature of Massachusetts, Connecticut, Ohio and New Hampshire have appointed special committees to investigate the subject, and report facts. We have recently read the report made to the Massachusetts and Connecticut Legislatures, and some portions of Garlick's Treatise on artificial propagation of certain kinds of fish. The conclusion arrived at by these reports is, that the trout, pickerel, yellow perch, sun-fish and eel can be easily and profitably propagated and raised in water adapted to their peculiar natures.

The Dicks and Shuykill Journal says "that the trout, the most beautiful of fish, might readily be raised by every farmer whose grounds are supplied with a clear and cool spring. A farmer in Franklin county has for several years raised one thousand pounds per annum, for family use. A greater and more healthy luxury for the table cannot be found. A spring of clear water issues from the hillside, under the shade of spreading elms, he has constructed artificial ponds, none of them exceeding three feet in depth or thirty feet in length. Some portions of each pond is provided with a sandy bottom at a shallow depth. The size of the stream is so small that none except the smallest trout can pass from one pond to the other. He usually feeds his stock during the summer season every morning, furnishing them with the common angel-worm, grasshoppers, garden worms, minced meat and corn bread, the rapidity of their growth depending on the abundance of the supply furnished."

The pickerel and perch, regarded by "many quite as palatable as the trout, can be raised in less cool and transparent water than the trout. The pickerel is a bold biter and a handsome, daring fish. The perch is a hardy fellow, perfectly adapted to sluggish waters, and as a table fish ranks very high, particularly in winter and spring."

In China for centuries the propagation of fish has been as common and well understood as the raising of corn and fruit in this country. Our people are not compelled to imitate the Celestials in producing the means of subsistence, but the raising of fish for food is a business, to a certain extent, made an agreeable and profitable business by those having the ownership of clear and cool waters.

Baltimore American.

The Last Lynching Tragedy in Iowa.—We have already said that the fact that the Regulators of Iowa had taken from the jail two horse thieves named Soper and Gleason, and had threatened them with death.

From the Tipton Advertiser of the 11th, we learn the following particulars: After they had been taken from the courthouse, they were brought to a grove near Tipton, Mo. Soper kept up his spirits, but Gleason was in terror, and when told to confess, Gleason replied with a joke, and Soper with protestations. Finally, they did confess to have delt in counterfeit money. Gleason was firm, and laughed. He was taken away and Soper brought forward. He confessed the whole matter, telling how and

J. H. SERVICE.
Mar. 25, 1857.—J. F.

MOFFAT & CO.,
LIFE PILLS
AND
Phenix Bitters.
THE BEST FAMILY MEDICINE
NOW before the public, for the cure of Scrophula, Fever, Scurvy, or Eruptions of the Skin, Piles, and Ague, Dyspepsia, dropsy, and in fact most all diseases soon yield to their curative properties.

It has been computed that during the last twenty years upwards of Four Millions of persons have been benefited by the use of these medicines; a fact which speaks volumes in favor of their curative properties—a single trial will place them beyond the reach of competition in the estimate of every patient. By their use the BLOOD IS RESTORED TO A HEALTHY STATE and freed from all impurities. The system is not reduced during their operation, but invigorated, and they require no restraint from business or pleasure.

The afflicted here in these medicines are made that will do for them all that medicine can possibly effect.

Land for Sale.
THE undersigned now offers for Sale his valuable tract of land lying in the northern part of Benton County, 7 miles west of Oxford, containing 440 acres. The soil is good, over 100 acres cleared land under good fence; the place well improved with dwelling and out houses, a cotton gin and press, &c. It is also well watered, embracing a portion of the head spring and greatest natural curiosities in the South west, besides several other fine springs of water. The land is within 3 miles of the Selma Railroad, convenient to fine Mills, also to Churches, Schools, &c. A good large lot will be given to the purchaser, in fact a premium of 40 acres to any one who will purchase the remainder at a fair price.
JOHN M. NEIGHBOURS.
June 17, 1857.—J. F.

Commissions for selling Cotton 50 cents per Bale, country produce 5 per cent, filling orders 2-1-2.
Selma, April 15, 1857.

POETRY.
The Crop of Acorns.
BY MRS. SMOCKREY.

There came a man in days of old,
To hire a piece of land for gold,
And urged his suit in accents meek—
"One crop alone is all I seek."
That harvest o'er, my whim I yield,
And to its lord resign the field."

The owner came in hissing fast,
And coldly with the stranger dealt,
But found his last objection fail,
And honey'd eloquence prevail:
So took the proffer'd price in hand,
And for one crop leased out the land.

The wily tenant sneer'd with pride,
And sow'd the spot with acorns wide;
As first like tiny shrubs they grew,
Then broad & wide their branches threw
But long before those oaks sublime
Aspiring reach'd their forest prime,
The cheated landlord morn'ring lay
Forsaken, with his kindred clay.

O ye, whose years unfolding fair,
Are fresh with youth and free from care,
Should Vice or Indulgence desire
The garden of your soul to hire,
No parley hold—eject the squire,
Nor let one seed the soil pollute.

My child, their first approach beware,
With firmness break the insidious snare,
Best as the acorns grew and thrive,
Into a sun-excluding grove,
The stars a dark surrounding trace,
Shut out the light of heaven from thee.

The Surgeon's Revenge.
The following deeply interesting story was related by Dr. Gibson in one of his lectures before the medical class of the University of Pennsylvania. The hero of the instructive story is Vesale, one of the most eminent surgeons of the 15th century.

Andre Vesale, first saw the light in the city of Brussels. His father was an apothecary attached to the service of the Princess Margaret, aunt of the Emperor Charles V., and Governor of the low countries.

Up to the period when Vesale first rendered himself conspicuous, the anatomy of the human body was so imperfectly understood as scarcely to merit that the term science should be applied to the dim and confused ideas relative to it. Vesale was the first to break through the trammels with which ignorance and bigotry had crimped the march of science, surrounded with the most noble courage and constancy the disgusting, the terror, and even the perils inseparable from the dissection of labor which he had devoted himself to be to be seen whole days and nights in the cemeteries, surrounded by the festering remains of mortality, or hovering about the gibbets, and disputing with the culture for his prey, in order to compose a perfect skeleton from the remains of the executed criminals, left to be devoured by the carrion bird.

It was during his sojourn at Basel, after his return from Italy, Vesale first beheld the house of Hans Holbein, the painter, Isabella Van Stegnik, who was destined to exercise some influence over his future life. He was scarcely twenty-eight years of age, and already had attained the summit of well-directed ambition.

The family of Van Stegnik was a wealthy and honorable one, far superior to that of Vesale in birth and fortune, but the destiny which position the latter had acquired for himself, entitled him to an alliance even more exalted. The son of the Princess Margaret's apothecary would have been rejected by the rich Hansman's daughter, but, as the Emperor's first physician, was accepted as the most eligible son-in-law. The marriage solemnized, Vesale, accompanied by his young bride, set off for Seville, where Charles then held his court.

Though she loved her husband, there was so much awe mingled with her affection as to throw an appearance of restraint over her demeanor towards him, even in the privacy of domestic life. The very nature of his profession and occupation was calculated to increase that awe, and even to create some degree of repugnance in a shrinking mind, which nothing but strong affection could overcome.

Isabella's nature required skillful drawing out and tender fostering. Vesale unfortunately mistook her timidity for coyness, and resented it accordingly. This led to estrangement on her part, which he attributed to dislike, and jealousy distrust at last took possession of his soul.

Vesale's house became the resort of all that was noble and gallant in Seville, and he for a time believed his own scientific conversation to be the attraction. At first the young wife showed her usual calm indifference to the admiration that followed wherever she was seen; but at last something in her manner and countenance, when ever one particular person appeared, or there did exist a being who had discovered the secret of causing the blood to flow more tumultuously through her veins. That person was Don Alvar de Solis, and as he was young and handsome the suspicions of Vesale were painfully aroused. He took silent note of the unusual emotions that agitated Isabella whenever the nobleman was in her presence.

The general conduct of Don Alvar was calculated to baffle suspicion, being marked by indifference. This would have misled the vigilant husband, and had he not on one occasion, when his back was turned toward Don Alvar, perceived him, in an opposite mirror, fix his

kindling eyes upon Isabella with an expression not to be mistaken, while she grew red and pale by turns, and then, as though unable to surmount her agitation, rose and left the room. Shortly afterwards, Vesale received an anonymous note, saying:

"Look to your wife and Don Alvar de Solis, and be not deceived by appearances. They only want a fitting opportunity to dishonor you. Even now he carries about him the gloves she dropped for him at mass."

Vesale shut himself up to ponder over the most effectual means of avenging himself. His resolution was soon taken. Having established schools of anatomy at San Lucar and Cordova, he obtained the Emperor's permission to visit them, quitting Seville for that purpose, but, returning the same night concealed himself in a tenement belonging to himself, at some distance from his abode in Alcazar, which was devoted to the double purpose of a laboratory and dissecting room. He had taken no person into his vengeance, and he listened to his own counsel.

At dark on the following evening he issued forth, muffled to the eyes in a woman's mantle hood, and left a note at Don Alvar's habitation, containing an embroidered glove of Isabella's, and these words:

"I have obtained the key to Vesale's laboratory during his absence. Be at the gate an hour after midnight, and you will be admitted on pronouncing the name of Isabella."

The assignment was promptly kept by Don Alvar. At an hour past midnight he left his house, alone; but he never returned to it. Whether he had gone, none could say, nor could any trace of him ever be discovered. It was supposed he must have missed his footing, and fallen into the Guadalquivir, near which his abode was situated, and that his body had been swept by the waves into the ocean.

Such an occurrence was calculated to produce a great sensation in the place where it had happened; and Vesale, recalled three weeks after by the illness of his wife, found the disappearance of Don Alvar the theme of every tongue. The altered appearance of Isabella was attributed, by Vesale, to grief for the mysterious absence of Don Alvar, and that conviction took from him the

It chanced to be the festival of Santa Isabella, and to do honor to her patron saint, as well as to celebrate the return of her husband, Isabella put on her wedding dress, and seated herself by an open casement that overlooked Alvar's gardens, she watched for his coming; but, while her eyes were vainly fixed upon the path by which she expected him to appear, a hand was laid on her shoulder, and, turning around, she beheld Vesale standing by her side.

"I have ordered the supper to be laid in my study," said he, and taking her by the hand he led her away to the room in question, dismissed the attendant, and closed the door. Everything was a festive air, yet the repast was cheerless. Perceiving that she had tasted nothing, Vesale poured a few drops from the rim of a glass in a cup of Malaga wine and presented it to her.

"Drink this," said he, "it is a sovereign cure for the complaint you are suffering from."

ed you by thought or deed? Don Alvar pressed me with his love and threats, but I repulsed him. I never loved but you. I feared and honored you as much as I loved. But I dare I not tell you of his pursuit. Oh, Andre, believe my words: the dying deal not in falsehood! Should I be thus calm, were I guilty?

Vesale, sinking upon his knees, solemnly protested his faith in the innocence of his wife, and with choking sobs, adjured her to believe that he only fainted to give her poison, that he could not nerve his hand to take away her life, but the terror of death not death itself, was upon her. And while he yet spoke Isabella murmured:

"Thanks be to Heaven for this! drawing his hand towards hers" laid it on her heart, and as she did, it ceased to beat.

A GOOD TEACHER.—At a late educational festival in New Hampshire, the following incident was related:

"Some years ago a teacher, about to open his school in Charleston, heard of one boy who had always made trouble for teachers and had succeeded in breaking up several schools by his turbulence. The teachers determined to take measures to awaken the boy's conscience. They visited his parents, talked with him; and evidently made an impression. At the close of the first day of the school he had occasion to tell the scholar that he had been a good boy. The prudent committee called on him & told him he must turn that boy out, or he would break up the school. The teacher replied that he would give him a fair trial. At the end of the second day, the committee repeated their advice but the teacher replied that he must and would give the boy a fair trial. The consequence was that that disorderly lad became the best scholar in school—and that boy was William L. Marcy, late secretary of state. And always on his return to his native place he called on his old teacher, Gen. Salem Town, & acknowledged his indebtedness to him for the happy transformation of character which had made him what he became."

A LOVE TRIP.—The steamboat Twilight, which left St. Louis on the 31st of May last, laden with Government stores & Indian goods, Trumble, a distance of two thousand five hundred and twenty miles, reached her destination on the 7th inst., and returned to St. Louis on the 20th, making a round trip of fifty-one days. She brought a cargo of furs and peltries, in addition to a number of specimens of the bear, mountain dog, wolf, beaver, eagles, and other beasts and birds. Capt. Shaw, of the Twilight, reports the Missouri rising all the way down, caused by the melting of the Rocky Mountain snows. He also reports the Indians all quiet and friendly. The Democrat remarks:

Such a trip as this of the Twilight, and the recent one of the Spread Eagle, will serve to impart to our Atlantic coast friends some true notion of the grand extent of the great West; and may also impress our citizens with that vast territory beyond our borders which it should ever be our aim to make tributary to our prosperity.

A BAD SIGN.
One fact connected with the Washington riot is full of alarm for the future. A majority of the mob is said to have been of boys under eighteen years of age. The mob which hung the negroes in Louisville a few weeks ago was partly composed of the same material & who ever a riot occurs we have the same report. And these are to be the men who in a short time will have control of the country! Where are the fathers & mothers of this land that their children thus run wild? Parental authority must be called into exercise, or there will be little hope for the Republic, and less for the miserable youths themselves.

Stanton (Va.) Spect.

A DEAD NIGGER.—When the cholera was at its worst in 1849, in New Orleans, an old negro, who had weathered the yellow fever many times, at length got frightened at the havoc which the new disease was making in all classes. His master, one night, heard him praying to "the angel of de Lord," by the light of a tallow candle, "to spare him dis time; to let him live a little longer, and den take him to glory." But he concluded his prayer by professing perfect submission to the will of the angel of the Lord, "even should he be called for to go immediately on his long journey. Sambo's master determined to test the sincerity of this last profession. He knocked, loud and distinct, at his door.

"Who dar?" says Sambo. The angel of the Lord," was answered. "What you want?" "I have called for Sambo!" The master heard the candle suddenly extinguished with a whoop, and Sambo energetically answered, "He not here! dat nigger is been dead three weeks!"

"Behold," he said, pointing to this ghastly spectacle, "the radiant and beautiful Don Alvar de Solis, the object of your glib love—contemplate him well, if the sight can render your moments happier, for you are about to die too—the wine I have given you was poisoned."

When the last dreadful sentence, and its more dreadful illustration burst upon her afflicted senses, she became paralyzed with excess of emotion, the scream that had arisen to her throat, died there in strangling murmur, and sinking she fell back as one dead upon the arms of Vesale.

She was not dead, however; he had not poisoned her that crime he had hesitated to commit, yet he was none
